Comerica may use other use-tracking devices, which may change from time-to-time as technology changes, to help diagnose problems and to administer our website. We also may track browser types to help us understand our visitors' needs related to our website design. Comerica may use Web-Becons and other devices on parts of the website. A Web-Becon, also known as a "Webbug" or "clear-gif," is a small, graphic image imbedded on a page of the website, included in a Web-based document or an e-mail message that is designed to permit the monitoring of who is visiting a website. Webbugs are often invisible to you because they may be very small (only 1-by-1 pixel) and/or are made to blend in with the background color of the webpage, document, or e-mail message. Webbugs are identified with HTML IMG tags in the webpage. You may use the "view profiles" of the webpage you are viewing on our website to see whether the page is using a Webbugs.

With the assistance of a cookie, Webbugs may collect the IP address of your computer, the URL of the page the Webbugs comes from and the time it was viewed, or other personal information. For example, Webbugs may add information to a personal profile of what sites a person is visiting and to determine what banner ads to display based on the profile. Another use of Webbugs is to provide an independent accounting of how many people have visited a particular website and to gather statistics about webbrowser usage at different places on the Internet.

Our website may include advertisements for third parties and their products, and those third-party advertisements and websites may include a cookie, Webbugs, or other device of the third party. Comerica does not have control over the cookies, Webbugs, or other devices used by third parties and does not have access to whatever information they may collect.
