COMMUNITY REINVESTMENT ACT PERFORMANCE EVALUATION

Comerica Bank RSSD # 60143 1717 Main Street Dallas, Texas 75201

Federal Reserve Bank of Dallas 2200 North Pearl Street Dallas, Texas 75201

NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, nor should it be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

INSTITUTION RATING

OVERALL RATING

Institution's Community Reinvestment Act Rating: Comerica Bank is rated Outstanding.

The following table indicates the Community Reinvestment Act (CRA) performance level of Comerica Bank (Comerica or the bank) with respect to the lending, investment, and service tests.

PERFORMANCE TEST RATINGS TABLE

Performance Levels	Comerica Bank Performance Tests					
	Lending Test*	Investment Test	Service Test			
Outstanding	X	X				
High Satisfactory			Χ			
Low Satisfactory						
Needs to Improve						
Substantial Non-Compliance						
* The Lending Test is weighted more heavily than the investment and service tests when arriving at an overall rating.						

SUMMARY OF MAJOR FACTORS SUPPORTING RATING

Major factors supporting the institution's rating include:

- Lending activity reflects good responsiveness and record of serving the credit needs of low-income individuals, very small businesses, and the assessment areas (AAs), including low-income areas.
- A substantial majority of loans are made in the bank's AAs.
- The geographic distribution of loans reflects excellent penetration throughout the AAs.
- The bank's distribution of loans among individuals of different income levels, including low- and moderate-income (LMI) individuals, and businesses of different revenue sizes is good.
- Comerica is a leader in making community development (CD) loans. Since the prior evaluation, the bank's CD lending increased by 181.5 percent by dollar amount despite the cessation of the Small Business Administration's (SBA's) Payroll Protection Program (PPP) in May 2021.
- The bank makes use of innovative and/or flexible lending practices in serving the AAs' needs
- Comerica is often in a leadership position given its excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors. Since the prior evaluation, the bank's qualified CD investments increased by 23.3 percent.
- The bank exhibits good responsiveness to credit and CD needs as well as occasionally uses innovative and/or complex investments to support CD initiatives.
- Delivery systems are accessible to individuals of different income levels throughout the bank's AAs.
- The record of opening and closing branches has not adversely affected the accessibility of the bank's delivery systems, particularly to LMI geographies and/or LMI individuals.
- Services do not vary in a way that inconveniences the bank's AAs, particularly LMI geographies and/or LMI individuals.
- Comerica provides a relatively high level of CD services, increasing the total hours by 47.1 percent since the prior evaluation.

INSTITUTION

DESCRIPTION OF THE INSTITUTION

Comerica is a financial institution headquartered in Dallas, Texas, which has the following characteristics:

- The bank is a wholly owned subsidiary of Comerica Incorporated, also headquartered in Dallas, Texas.
- As of June 30, 2023, the bank reported total assets of approximately \$90.9 billion and gross loans of \$55.5 billion.
- The bank operates 409 branches and 571 deposit-taking automated teller machines (ATMs) throughout the states of Arizona, California, Florida, Michigan, and Texas.
- Since the previous CRA performance evaluation, Comerica closed 26 branches and opened four branches within its AAs.
- The bank offers traditional deposit and loan products to meet the needs of the communities it serves.
 - Comerica is predominately a commercial lender, with commercial loans representing 78.9 percent of the bank's loan portfolio as of June 30, 2023.
 - Commercial loans are made for a variety of business purposes, including financing for interim construction of industrial and commercial properties; financing for equipment, inventories, and accounts receivable; and acquisition financing.
 - While residential real estate loans comprise a smaller portion of the total loan portfolio, at 6.9 percent, it is still considered significant.
 - During the COVID-19 pandemic, Comerica leveraged its knowledge and expertise of commercial lending to support and extend loans to small businesses within the bank's defined AAs.
- The bank's ability to meet various credit needs of the communities it serves has not been hampered by its capacity to lend, financial condition and size, product offerings, prior performance, legal impediments, or other factors.

Table 1 below reflects the bank's loan portfolio mix as of June 30, 2023.

Table 1

Composition of Loan Portfolio as of June 30, 2023						
Loan Type \$(000,000) Percent (%)						
Agricultural	53	0.1				
Commercial	43,731	78.9				
Consumer	483	0.9

The Federal Reserve Bank of Dallas rated the bank's CRA performance as Satisfactory at the previous performance evaluation dated February 8, 2021. The bank received a High Satisfactory rating under the Lending Test, a High Satisfactory rating under the Investment Test, and a High Satisfactory rating under the Service Test.

SCOPE OF THE EVALUATION

Examiners utilized the Federal Financial Institutions Examination Council's (FFEIC's) *Interagency Examination Procedures for Large Institutions* to evaluate the bank's CRA performance. The evaluation considered CRA performance context, including the bank's asset size, financial condition, business strategy, and market competition, as well as AAs' demographic and economic characteristics, and credit needs.

This evaluation consists of a review of the bank's 2020, 2021 and 2022 HMDA and CRA-reported small business lending data, as well as the CD loans, investments, and services extended between January 1, 2021, and June 30, 2023, including prior period CD investments. Given that the bank's volume of small business lending exceeds that of HMDA lending, small business lending carried more weight when assessing Comerica's CRA performance. While the CRA-reported small farm lending data is displayed, it was not considered in assessing the bank's CRA performance given that agricultural lending represents less than 1 percent of Comerica's total loan portfolio. Moreover, small farm lending volume was insufficient in every AA; thus, a meaningful analysis could not be performed for this product. Lastly, HMDA-related lending activity classified as Multi-Family, Other Purpose Closed/Exempt and Loan Purpose Not Applicable was not evaluated separately due to negligible volume.

Full-scope reviews were conducted for nine of the bank's 27 delineated AAs. Factors to determine which AAs would receive full-scope reviews include, but are not limited to, the level of the bank's lending, investment, and service activities as well as the availability of opportunities in the AAs; comments received from community groups and the public regarding the institution's CRA performance; population density; the number of other institutions located in the AAs; and the length of time since the most recent full-scope review.

Table 3 depicts the scope of the review for each AA.

Phoenix Metropolitan AA	None					

The evaluation of the bank's lending record in the individual AAs includes the use of and comparison to demographic characteristics. The primary sources for the demographic information are 2011-2015 U.S. Census Bureau's American Community Survey (ACS) data, 2020 U.S. Census data as well as Dun & Bradstreet (D&B) data for 2020, 2021, and 2022. Demographic characteristics of a particular AA are useful in analyzing the bank's record of lending, as they provide a means of estimating loan demand and identifying lending opportunities. To understand small businesses, examiners rely on D&B data, which consists of self-reported data of revenue size and geographical location by businesses entities. The demographic data should not be construed as defining an expected level of lending in a particular area or to a particular group of borrowers, as the information is used to understand the bank's performance context. Lastly, examiners interviewed community leaders serving the bank's AAs receiving a full-scope review to expand on the bank's performance context and understand the credit needs of such areas. Community contacts included representatives of community-based organizations, municipalities, and quasi-qovernmental agencies.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's overall Lending Test rating is Outstanding. While the state ratings for Michigan and Texas are consistent with the overall rating, the state ratings for Arizona, California, and Florida are high satisfactory. Greater weight was given to Comerica's performance in the states of Michigan and Texas, as the bank's operations in these states represent 71.4 percent of total branches, 65.7 percent of total deposits, and 60.8 percent of the loans reviewed.

Lending Activity

The bank's overall lending levels reflect good responsiveness to credit needs of the bank's AAs, taking into consideration performance context such as the bank's resources and business strategy. In alignment with its business focus, Comerica extended more small business loans than HMDA and small farm loans during the review period. Generally, the bank's small business lending carried more weight when assessing the overall CRA performance. Table 4 summarizes the bank's lending activity from January 1, 2020 through December 31, 2022.

Table 4

Summary of Lending Activity January 1, 2020 through December 31, 2022

Total Small Farm	630	1.1	43,881	0.3				
TOTAL LOANS	56,066	100.0	13,795,282	100.0				

The bank makes use of flexible lending practices in its AAs, including the National Faith Home Buyers Program, the Micro Business Lending Program, and government-insured loan programs. Comerica's Micro Business Lending Program offers secured business lines of credit and term loans in smaller dollar amounts. This well-established program, which is offered throughout the bank's footprint, uses flexible lending practices to better serve the credit needs of small businesses. The bank also offers a variety of government-insured loan programs to help meet the credit needs of LMI borrowers and small businesses. During the review period, Comerica extended Veteran Administration (VA) and Federal Housing Administration (FHA) loan products in California, Michigan and Texas, as well as loans insured by the SBA throughout its AAs.

Assessment Area Concentration

Comerica made a substantial majority of its loans in the delineated AAs. Table 5 displays the number volume and dollar amount of loans originated inside and outside of the bank's AAs.

Table 5

Lending Inside and Outside of the Assessment Areas

The remaining loan distribution analyses discussed in this performance evaluation consider only those loans originated within the bank's AAs. A detailed discussion of the facts and data supporting the overall conclusions for the geographic and borrower distribution and CD lending are presented in the Conclusions with Respect to Performance Criteria section for each AA.

Geographic Distribution of Loans

The overall geographic distribution of lending reflects excellent penetration throughout the bank's AAs.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's overall lending reflects good penetration among individuals of different income levels and businesses of different sizes.

Community Development Lending

Comerica is a leader in making CD loans. The bank originated 1,348 CD loans during the evaluation period for a variety of purposes, as noted in Table 6. Since the previous evaluation, the number of CD loans extended by the bank increased by 38.3 percent despite the cessation of the SBA's PPP on May 31, 2021. Comerica responded by substantially increasing the dollar amount of its non-PPP CD lending (up almost 350 percent from the previous evaluation), which reflects very favorably on its responsiveness to the CD needs of its AAs. Moreover, the bank focused primarily on CD lending that fosters economic development, with an increase of more than 1,000 percent by number and dollar amount since the prior evaluation.

Table 6

Revitalization and Stabilization	257	401,877								
Total	1,348	5,336,511								

INVESTMENT TEST

The bank's overall Investment Test rating is Outstanding. The state ratings for California, Michigan, and Texas are consistent with the overall rating. The state ratings for Arizona and Florida are high satisfactory.

Overall, Comerica is often in a leadership position given its excellent level of CD investments, grants, and donations. While the bank makes occasional use of innovative and/or complex investments, it exhibits good responsiveness to the credit and CD needs of its AAs. Consistent with prior performance evaluations, the bank's strategy focuses on selecting CD investments that are eligible for low-income housing tax credit (LIHTC), funding housing projects that meet certain rent affordability requirements in the bank's AAs. Additionally, the bank has a substantial volume of investments that foster economic development, noting an increase of 321.0 percent by number volume and 197.6 percent by dollar amount since the prior evaluation.

In addition to the CD investments, the bank's level of CD donations is particularly responsive to organizations that provide community services for LMI individuals and families. Comerica's philanthropic activities include donations to organizations that promote and support economic development. While the number of CD donations made by the bank decreased from the previous evaluation, Comerica's focus on targeted donations supporting small businesses increased by 400.0 percent by number volume and 1,728.6 percent by dollar amount.

Table 7 illustrates the bank's overall level of CD investments. Specific details regarding investments, grants, and donations can be found in the Conclusions with Respect to Performance Tests section for each AA.

SERVICE TEST

The bank's overall Service Test rating is High Satisfactory. The state ratings for Arizona, California, and Florida are consistent with the overall rating, while the state ratings for Michigan and Texas are outstanding.

Retail Services

Comerica's branch locations and alternative delivery systems, such as drive-through facilities and online and mobile banking, are accessible to the bank's various geographies and to individuals of different income levels in each AA. The overall distribution of the bank's branch offices and full-service ATMs generally favor upper-income census tracts, though branches are distributed among geographies of all income levels throughout Comerica's AAs. The bank operates 409 branches and 571 full-service ATMs in its AAs, of which 101 branches or 24.7 percent are located in LMI census tracts. Moreover, the bank's record of opening and closing branches has not adversely affected the accessibility of Comerica's delivery systems, particularly in LMI areas or to LMI individuals. Since the previous evaluation, Comerica closed 26 branches. Twenty of the closed branches or 76.9 percent were located in middle- and upper-income census tracts, limiting impact to LMI geographies. Lastly, the bank's products, services, and business hours do not vary in a way that inconveniences its AAs, particularly LMI geographies and/or LMI individuals. Lobby hours and drive-through services vary by branch location, with lobbies generally operating seven to nine hours on weekdays and offering extended drive-through hours daily. Additionally, Saturday drive-through hours are available at many bank locations.

Table 8 illustrates the distribution of banking offices and full-service ATMs by income level of geographies, as well as numbers of branch openings/closings during the evaluation period.

Table 8

Community Development Services

(1)

(3)

Net Change

Overall, the bank provides a relatively high level of CD services throughout its AAs. The state ratings for California, Florida, and Texas are consistent with the overall rating, while the state ratings for Arizona and Michigan reflect an adequate level and an excellent level of CD services,

(8)

(8)

(2)

(22)

respectively. Additionally, the volume of qualified CD services provided by the bank has grown substantially since the previous evaluation.

Bank representatives provided 7,002 services totaling 22,340 hours to 877 organizations, with a significant portion of services provided to local grassroots and well-known organizations that provide varying levels of community services to LMI individuals and families in the bank's AAs. This level of CD services represents an increase of 119.4 percent in services and 47.1 percent in hours since Comerica's previous evaluation. The increase is attributable to the bank's commitment to CRA through various initiatives, such as designating paid time-off for employees to volunteer and requiring senior officers to incorporate qualified volunteer hours in their annual performance plans. Two noteworthy initiatives are:

- Comerica Financial Education Brigade consists of approximately 1,000 employees who
 volunteer virtually or in person to help meet the identified need for financial education
 throughout the AAs' diverse communities.
- Comerica BusinessHQ, a collaborative space established in the Dallas-Fort Worth Metropolitan AA in early 2023, has the express mission of serving small businesses in the severely underserved South Dallas region. This proof-of-concept location, at an estimated cost of \$5 million, has served more than 400 individuals by providing approximately \$4,500 worth of no-cost coworking space and tailored technical assistance by bank employees. In response to the overwhelming success of Comerica BusinessHQ and the development of new avenues to serve the area created through the program, Comerica plans to extend the concept to other AAs. This commitment to community service, despite it not fitting within established definitions of qualified CD activity, reflects very favorably on the bank's responsiveness and creativity to meet the needs of its AAs.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) established the Consumer Financial Protection Bureau (CFPB). In general, the Dodd-Frank Act gives the CFPB, among other things, primary supervisory authority over insured depository institutions with total assets of more than \$10 billion when assessing compliance with the requirements of federal consumer financial laws. The Federal Reserve System retains authority to enforce compliance with the CRA and certain other consumer compliance laws and regulations. During the review period of this evaluation, the Federal Reserve Bank of Dallas did not cite violations involving illegal discrimination or other illegal credit practices that adversely affected the evaluation of the bank's CRA performance. As of the date of this evaluation, the Federal Reserve Bank of Dallas is unaware of any violations of the Equal Credit Opportunity Act or Regulation B, or any unfair, deceptive, or abusive acts or practices identified by the CFPB.

STATE OF MICHIGAN

CRA RATING FOR MICHIGAN:

The Lending Test is Rated:

The Investment Test is Rated:

The Service Test is Rated:

Outstanding

Outstanding

Outstanding

Major factors supporting the institution's rating include:

- Lending activity reflects excellent responsiveness and record of serving the AAs' credit needs, including low-income individuals, low-income areas, and very small businesses.
- The geographic distribution of loans reflects excellent penetration throughout the AAs.
- The bank's distribution of loans among individuals of different income levels and businesses of different revenue sizes is good.
- Comerica is a leader in making CD loans.
- The bank makes use of innovative and/or flexible lending practices in serving AAs' needs.
- Comerica is often in a leadership position given its excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors.
- The bank makes occasional use of innovative and/or complex investments to support CD initiatives.
- Comerica exhibits good responsiveness to credit and CD needs.
- Delivery systems are readily accessible to individuals of different income levels throughout the bank's AAs.
- The record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals.
- Services that do not vary in a way that inconveniences the bank's AAs, particularly LMI geographies and/or LMI individuals.
- Comerica is a leader in providing CD services.

SCOPE OF THE EVALUATION

The scope of the review for the state of Michigan is consistent with the overall scope for the institution, including evaluations under the Lending, Investment, and Service tests. The time period and products evaluated for this state are also unchanged from the scope discussed in the Institution section of this report.

Two of the 11 AAs in the state of Michigan were reviewed using full-scope procedures.

- Southeast Michigan Metropolitan AA
- Ann Arbor MSA AA

The remaining nine AAs received limited-scope reviews.

- Battle Creek, MI MSA AA
- Flint, MI MSA AA
- Grand Rapids-Kentwood Metropolitan AA
- Jackson, MI MSA AA
- Kalamazoo-Portage MSA AA

- Lansing-East Lansing Metropolitan AA
- Midland, MI MSA AA
- Muskegon, MI MSA AA
- Lenawee County Nonmetropolitan AA

AAs were selected for full-scope reviews based on the strategic importance of the AA, considering volume of lending, number of branches, and percentage of total deposits, as well as the length of time since the AA last received a full-scope review. Approximately 81.4 percent of lending activity (by number of loans), 92.3 percent of the deposits, and 76.3 percent of branches within the state of Michigan were evaluated through the full-scope reviews. The bank's performance in the Southeast Michigan Metropolitan AA was given greater consideration as it is Comerica's largest AA in any state, representing more than 30 percent of total branches and more than 40 percent of total deposits.

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN MICHIGAN

The bank delineates 11 of its 27 AAs and operates 177 of its 409 branches in the state of Michigan. As of June 30, 2022, Comerica had \$37.7 billion in deposits in the state, representing 49.1 percent of total deposits. According to the June 30, 2022, FDIC Summary of Deposits, the bank had a deposit market share of 12.0 percent and ranked 3rd out of 103 FDIC-insured financial institutions across the state.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in Michigan is Outstanding. The Lending Test conclusions in the Southeast Michigan Metropolitan AA is considered excellent, which is consistent with the overall state rating, while the Lending Test conclusion in the Ann Arbor MSA AA is good. Overall, the bank's performance in its AAs receiving limited-scope reviews support the bank's state rating.

Lending Activity

Comerica's lending activities in the state of Michigan reflect excellent responsiveness to the credit needs of its AAs. The bank makes use of innovative and/or flexible lending programs through its participation in numerous industry-recognized, government-guaranteed programs, including 33 FHA/VA loans, 9,734 SBA loans, and 2,001 small business micro loans in the state of Michigan.

As outlined in Table 9, this evaluation considered 21,917 loans totaling \$3.9 billion. The loan products and origination volumes appear consistent with the credit needs of the bank's Michigan AAs. The number of small business and HMDA loans extended by the bank was compared against the number of loans made by aggregate lenders during the review period. Comerica ranked 12th out of 229 CRA reporters and 27th of 807 HMDA reporters in its Michigan AAs.

Table 9

Summary of Lending Activity – January 1, 2020 through December 31, 2022 Michigan Assessment Areas											
Loan Type # % \$000s %											
Home Purchase	655	3.0	142,159	3.7

Total Small Business	15,515	70.8	2,806,724	72.2							
Total Small Farm	257	1.2	14,498	0.4							
TOTAL LOANS	21,917	100.0	3,888,835	100.0							

Geographic Distribution of Loans

The overall geographic distribution of lending reflects excellent penetration throughout the bank's Michigan AAs. This performance is consistent across Comerica's Southeast Michigan Metropolitan AA, while the geographic distribution of lending in the Ann Arbor MSA AA is adequate.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's overall lending reflects good penetration among individuals of different income levels and businesses of different revenue sizes. This performance is consistent across the bank's Southeast Michigan Metropolitan and Ann Arbor MSA AAs. A detailed discussion of the facts and data supporting the overall conclusions are presented in the Conclusions with Respect to Performance Criteria section for each AA.

Community Development Lending

Comerica is a leader in making CD loans in the state of Michigan. As reflected in Table 10, the bank originated 612 CD loans totaling approximately \$2.2 billion within the state, which comprises 45.4 percent of overall bank-wide CD loan volume by number and 41.7 percent by dollar amount. The level of CD lending is excellent in the Southeast Michigan Metropolitan and Ann Arbor MSA AAs.

The number of CD loans originated by the bank in the state of Michigan decreased slightly from the review period of the previous evaluation; however, this is attributed to the cessation of the SBA's PPP, in which the bank was heavily involved, making up 37.9 percent of the bank's qualified CD loans at the previous evaluation. Despite the decrease in the number of qualified originations in the state, the dollar amount of qualified originations increased substantially, growing by approximately 103.4 percent.

CD loans originated by the bank during the evaluation period were extended for a variety of purposes, as noted in Table 10. Specific details regarding the CD lending can be found in the Conclusions with Respect to Performance Tests section for each AA.

Revitalization and Stabilization	102	161,765								
Total	612	2,226,789								

INVESTMENT TEST

Comerica's performance under the Investment Test in the state of Michigan is Outstanding. The Investment Test conclusions in the bank's Southeast Michigan AA is excellent, which is consistent with the overall state rating. In the bank's Ann Arbor MSA AA, the bank's performance is good. Generally, the bank's performance in its AAs that received limited-scope reviews is consistent with the overall performance in the state of Michigan.

Comerica is often in a leadership position, as it has an excellent level of qualified CD investments and grants. The bank exhibits good responsiveness to the credit and CD needs of its AAs while occasionally using innovative and/or complex investments. Since the previous evaluation, the bank has increased the dollar amount of investments by 30.1 percent or \$54.1 million. As illustrated in Table 11, the bank made a significant number of investments in affordable housing initiatives within the AA, which was identified as a CD need by a community contact. Many of these investments were comprised of LIHTC funds to assist with building affordable housing, reflecting favorably on the bank's responsiveness in meeting AA CD needs. Additionally, the level of the bank's CD investments and donations are particularly responsive to area organizations that support community services for LMI individuals, with Comerica extending 502 donations for a total of \$4.4 million.

Details regarding investments and donations in each of the bank's Michigan AAs can be found in the Conclusions with Respect to Performance Tests section for each AA. In addition to the volume of qualified CD investments and donations within the bank's delineated AAs, Comerica made five additional qualified CD investments in the broader statewide area. These investments include a \$5 million investment in a large rent-restricted affordable housing project as well as multiple deposits in minority- and women-owned financial institutions.

SERVICE TEST

Comerica's performance under the Service Test in the state of Michigan is Outstanding. The Service Test conclusions in the Southeast Michigan Metropolitan and Ann Arbor MSA AAs are excellent and good, respectively. Generally, the bank's performance in the AAs that received limited-scope reviews is consistent with the performance in the full-scope review areas and the state of Michigan. A notable example of the bank's CD services is its Financial Education Brigade, which consists of approximately 1,000 employees who volunteer virtually or in person to provide financial education throughout the AAs' diverse communities.

Retail Services

Branch locations and alternative delivery systems, such as drive-through facilities and online and mobile banking, are readily accessible to the bank's various geographies and to individuals of different income levels in each AA. Of Comerica's 177 full-service offices and 277 full-serve ATMs in the state of Michigan, 45 branches and 80 ATMs are located in LMI tracts. During the review period, the bank closed 14 branches, three of which were in moderate-income census tracts, and opened two branches, one of which is in a low-income census tract. The branches closed in LMI tracts were in geographies that are reasonably served by other branches. In the state of Michigan, Comerica's record of opening and closing branches has not adversely affected the accessibility of its delivery systems. Table 12 depicts the distribution of the Michigan banking offices and full-service ATMs by income level of geographies.

Table 12

	Branch and Full-Service ATM Locations Michigan Assessment Areas											
Tract	% of % of Branches Full-Service A											
Income	Geographies	Households	Businesses	#	%	#	%					
Low	8.7	7.1	5.9	9	5.1	18	6.5					
Moderate	23.6	22.8	20.3	36	20.3	62	22.3					
Middle	33.9	37.5	35.5	61	34.5	88	31.8					
Upper	28.2	31.4	36.1	64	36.2	90	32.5					
Unknown	5.6	1.2	2.2	7	4.0	19	6.9					
Total	100.0	100.0	100.0	177	100.0	277	100.0					

The bank's products, services, and business hours do not vary in a way that inconveniences LMI geographies and/or individuals in the AAs. Moreover, Comerica's operations and product and service offerings in the state generally mirror that of the overall institution, which is described in the overall Retail Services section of this evaluation.

Community Development Services

Comerica is a leader in providing CD services in its Michigan AAs. While this conclusion is consistent with the bank's Southeast Michigan Metropolitan AA, Comerica provides a relatively high level of CD services in its Ann Arbor MSA AA. Bank representatives provided 3,481 CD services, totaling 11,235 hours, to 429 unique organizations within the state of Michigan. This represents approximately 49.7 percent of the bank's total CD services. Details regarding CD services can be found in the respective Conclusions with Respect to Performance Tests section for each AA.

SOUTHEAST MICHIGAN METROPOLITAN ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE SOUTHEAST MICHIGAN METROPOLITAN ASSESSMENT AREA

- The bank's Southeast Michigan Metropolitan AA consists of Livingston, Oakland, Macomb, Lapeer, and Wayne counties in Michigan. These counties represent part of the Detroit-Warren-Dearborn, MI MSA, with St. Clair County excluded from the AA. See Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is comprised of 1,305 census tracts, of which 9.3 percent are designated as low-income, 25.6 percent are moderate-income, 29.3 percent are middle-income, 29.4 percent are upper-income, and 6.4 percent are designated as unknown-income.
- Following the 2020 U.S. Census, 54 new census tracts were drawn within the AA, representing a 4.3 percent increase in the AA geographies. Census tracts designated as LMI decreased by 6.6 percent.
- The bank operates 126 full-service branches in the AA, including eight branches in low-income, 23 in moderate-income, 37 in middle-income, 52 in upper-income, and six in unknown-income census tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 17.3 percent market share, ranking 2nd out of 37 FDIC-insured depository institutions operating in the AA
- In 2022, the bank ranked 20th out of 683 HMDA reporters in the AA with 1,462 HMDA originations and purchases, and 12th out of 198 CRA reporters with 1,908 CRA small business loans.
- Community contacts indicated a shortage of affordable housing, a need for small business loans given the conclusion of the SBA's PPP, and job creation and retention. Additionally, community contacts indicated a need for activities that promote revitalization and stabilization and support for small businesses, as the AA is still recovering from significant population decline experienced in the 1970s.

2011-2015 U.S. Census Bureau: American Community Survey

* The Detroit-Dearborn-Livonia, MI Metropolitan Division (MD) is solely comprised by Wayne County, MI.

- The AA population moderately grew from 2015 to 2020, primarily driven by the growth experienced in Livingston, Macomb, and Oakland counties. The AA population growth is similar the statewide growth rate. A community contacted noted growth in the Macomb area as a result of the revitalization of the automobile manufacturing industry in recent years.
- The Detroit-Warren-Dearborn, MI MSA represents a significant portion of the statewide population, making it the 14th largest MSA in the United States as identified by the 2020 U.S. Census.
- A community contact noted that the AA is still recovering from historical population decline
 from major automobile plants closing in the 1970s. The downtown area is undergoing a
 revitalization process that attracts young adults to the area. However, families who can
 afford to move to the suburbs, move given the poor quality of urban neighborhoods.

Note: Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.

* The Detroit-Dearborn-Livonia, MI Metropolitan Division (MD) is solely comprised by Wayne County, MI.

- The AA MFI grew at a comparable rate to that of the state of Michigan. The AA growth is mostly driven by the population growth experienced in Oakland and Wayne counties.
- According to FFIEC Census Data, 13.3 percent of households in the AA lived below the poverty level.
- A community contact noted an increase in the cost of living within the AA, such as groceries, daycare, and car insurance, yet wages have not been able to keep pace.

Table 15

Housing Cost Burden Assessment Area: Southeast Michigan Metropolitan											
	Cost	Burden – Re	nters	Cost	Burden - Ov	ners

Cost burden is housing cost that equals 30 percent or more of household income.

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy * The Detroit-Dearborn-Livonia, MI Metropolitan Division (MD) is solely comprised by Wayne County, MI.

- Housing affordability within the AA for low-income renters is a substantially greater burden
 than the burden on homeowners at any other level. A community contact stated that
 families living under the poverty level in the AA cannot afford reasonably priced housing.
 Additionally, the community contact noted that many landlords delay housing repairs due
 to cost, which contributes to blight.
- Overall, the cost burden for homeowners and renters in the AA is greater than the housing cost burden for homeowners and renters statewide.
- With a median housing age of 60 years, the AA housing stock is aging. Community contacts indicated that much of the AA is comprised of blighted or abandoned housing. Additionally, a community contact identified the Highland Park neighborhood, a suburb within the Detroit area, as particularly comprised of abandoned and aging housing stock.
- The AA median housing value is \$180,383, which exceeds the state's median housing value, at \$162,600.
- A community contact also noted that there is a shortage of affordable rental properties.

* The Detroit-Dearborn-Livonia, MI Metropolitan Division (MD) is solely comprised by Wayne County, MI.

- Unemployment rates in the AA are comparable to the statewide rates between 2018 and 2022
- Unemployment rates more than doubled in 2020 due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the AA unemployment rate stabilized and returned to pre-pandemic levels
- Major employment industries within the AA include manufacturing, healthcare and social services, retail trade, and professional and technical services.
- The AA employment industry is primarily dominated by the domestic automobile sector, as it is the home of Ford Motor Company, General Motors Company, and Fiat Chrysler Automobiles (collectively the "Big Three.")

Table 17 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the Southeast Michigan Metropolitan AA is excellent. Comerica's retail lending performance was bolstered by the bank's substantial efforts to meet AA needs through CD lending. For this evaluation, small business lending generally carried more weight, as it comprised the largest volume of lending in the AA. Additionally, multifamily, other purpose closed/exempt, and loan purpose not applicable lending were not separately reviewed in the evaluation of the bank's home mortgage lending.

Details of Comerica's 2020 mortgage and small business lending as well as aggregate data can be found in Appendix C.

Lending Activity

The bank's lending activity in the Southeast Michigan Metropolitan AA reflects excellent responsiveness to AA credit needs. Comerica makes extensive use of innovative and/or flexible lending practices through its participation in numerous industry-recognized, government-guaranteed programs, including FHA, VA, and SBA loans. During the review period, the bank extended 7,993 SBA loans and 1,657 small business micro loans in the AA and actively partnered with the National Faith HomeBuyers Program to provide flexible lending and downpayment assistance for first-time home buyers in the area. The bank's level of lending to these programs demonstrates Comerica's excellent record of serving the credit needs of low-income individuals and very small businesses.

Comerica extended 4,455 home mortgage and 12,169 small business loans between January 1, 2020, and December 31, 2022. The loan products and origination volumes are responsive to the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

The geographic distribution of small business and home mortgage lending, including both originations and purchases, was compared with available demographic and aggregate lending data. The bank's geographic distribution of loans reflects excellent penetration throughout the AA. There were no significant gaps or lapses in contiguous geographies noted.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage loans in the AA is good. The distribution of 2021 and 2022 home mortgage loans among low-income census tracts is comparable to aggregate data and the demographic figure. Among moderate-income census tracts, the bank's performance is below the demographic figure, but comparable to aggregate lending. Aggregate lending serves as a better proxy for loan demand than the demographic figure when evaluating the bank's geographic distribution of HMDA lending.

The bank's 2020 lending performance reflected penetration levels similar to those of 2021 and 2022, with a distribution of loans to LMI tracts that was comparable to aggregate data but below the demographic figure.

Home Purchase Lending

The geographic distribution of home purchase lending in the AA is excellent. Among low-income census tracts, the bank's 2021 home purchase lending performance level is slightly below aggregate data, as well as below the demographic figure. In 2022, Comerica's performance in low-income geographies is above aggregate data and comparable to the demographic figure.

Comerica's 2021 and 2022 distribution of home purchase loans among moderate-income tracts is notably above aggregate lending and exceeds the percentage of owner-occupied units. The number of home purchase loans originated by the bank within LMI census tracts almost doubled from 2020 to 2021 (with 23 and 41 originations, respectively) and remained elevated in 2022, with 42 loans, which reflects favorably on the bank's responsiveness to credit needs of these geographies. During the same period, the percentage of owner-occupied housing units located in LMI census tracts grew by only 0.2 percent (growing from 25.5 percent in 2020 to 25.7 percent in 2021). This is particularly noteworthy as a community contact the difficulty homebuyers face when securing financing options, often leveraging predatory lending options or entering into land contracts at much higher interest rates.

The bank's lending performance for 2020 reflects penetration levels below those of 2021 and 2022, with a distribution of loans to LMI tracts that is below aggregate data and the demographic figure. This further validates the improvement in the bank's overall performance despite rising interest rates.

Home Refinance Lending

The geographic distribution of home refinance lending is good. The distribution of 2021 home refinance loans among low-income census tracts is above aggregate data and comparable to the demographic figure. The distribution of 2022 home refinance lending reflects comparable performance to both figures.

The penetration level of the bank's 2022 home refinance lending among moderate-income census tracts is below the aggregate data and the demographic figure, while the bank performed slightly above aggregate data in 2021.

The bank's 2020 lending performance reflects penetration levels consistent with 2021 and 2022, with a distribution of loans to LMI tracts that is comparable to aggregate data but below the demographic figure. A community contact emphasized the significant role refinance loans played in meeting the needs of the community. The bank's lending performance of home refinances in the AA is responsive as these loans predominantly helped LMI in the AA.

Home Improvement Lending

The geographic distribution of home improvement lending is good. The distribution of 2021 and 2022 home improvement loans among LMI census tracts is comparable to the level of aggregate data but below the demographic figure. The bank's performance improved between 2021 and 2022 among moderate-income census tracts, though it declined by a similar margin among low-income tracts.

The bank's lending performance in 2020 reflected penetration levels consistent with 2021 and 2022 with a distribution of loans to LMI tracts that is slightly above aggregate data but below the demographic figure.

Other Purpose Lines of Credit Lending

The geographic distribution of other purpose lines of credit is good. The bank's 2021 performance reflects a distribution among LMI census tracts that is comparable to the aggregate data but below the percentage of owner occupied. While the bank's 2022 performance in low-income geographies declined slightly, it remained comparable to aggregate lending. Notably, among moderate-income census tracts, Comerica's 2022 other purpose lines of credit lending increased from the 2021 level, outperforming aggregate data, but remaining below the demographic figure.

The bank's 2020 lending performance is consistent with the 2021 and 2022 levels, with a distribution of loans to LMI tracts that is slightly above aggregate data but below the demographic figure.

Tables 18A and 18B provide details about the bank's 2021 and 2022 home mortgage lending by income level of geography within the AA.

Small Business Lending

Comerica's geographic distribution of small business loans reflects excellent penetration throughout the AA. As noted on Table 19, the bank's small business lending among LMI census tracts in 2021 exceeds aggregate data and the percentage of businesses located in such geographies. In 2022, the bank's performance remains above aggregate data but comparable to the demographic figure.

The bank's lending performance among low-income census tracts is above aggregate data in 2022 but comparable in 2021. Comerica's lending performance among moderate-income census tracts in 2022 is comparable to aggregate data but slightly above in 2021.

The bank's 2020 distribution of small business loans among LMI census tracts exceeds aggregate data while comparable to the demographic figure. A community contact noted the need for small business loans within the AA to help small businesses retain and create jobs. Another contact identified a need for lending to small businesses to recover from the 2008 recession and the COVID-19 pandemic. The bank has sustained performance levels despite the rising interest rates, economic environment, and the SBA's PPP conclusion.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to borrowers reflects good penetration among individuals of different income levels and businesses of different revenue sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the AA is excellent when compared to demographic data and the performance of aggregate HMDA lenders. As shown on Tables 20A and 20B, the dispersion of home mortgage loans among low-income borrowers exceeds the 2021 and 2022 aggregate data but is below the percentage of AA families classified as low-income. It is often more difficult for low-income borrowers to qualify for mortgages, especially in a rising interest rate environment, as noted in 2022. Despite the increase in mortgage costs, the bank outperformed aggregate lending in 2022 by a larger margin than it did in 2021, reflecting very favorably on its willingness to extend credit to low-income borrowers. Additionally, the bank's performance among moderate-income borrowers exceeds than the demographic figure and is comparable to aggregate data.

The bank's performance in 2020 is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that exceeds aggregate data.

Small Business Lending

Comerica's borrower distribution of small business lending by revenue size of businesses is adequate despite the sharp reduction in volume and steady decline in performance when compared to the aggregate lenders' performance year after year. Table 21 shows the distribution of 2022 small business loans to businesses with revenues of \$1 million or less is below aggregate data and well below the percentage of small businesses in the AA. The bank's distribution of loans to small businesses in 2021 exceeds the 2022 performance and is slightly below to aggregate data. This is reasonable as Comerica made significantly more small business loans in 2021 than in 2022, and aggregate data serves as a better proxy for loan demand than the demographic figure.

The bank's 2020 small business lending to businesses with revenues of \$1 million or less exceeds the 2021 and 2022 performance, with a distribution of loans to small businesses greater than the aggregate data.

Community Development Lending

The bank is a leader in making CD loans in the AA. Comerica originated 402 qualified CD loans totaling \$1.5 billion in the AA, which represents 29.8 percent of the bank's total CD loan volume and 27.6 percent of the total dollar amount of CD loan originations. The dollar amount of the bank's CD lending activity in the AA grew by 70.1 percent since the previous evaluation, even as the number volume dropped by 21.0 percent. Comerica made a concerted effort to increase CD lending to fill the void left by the cessation of the SBA's PPP in May 2021, with a specific focus on promoting economic development through small business financing and permanent job creation, retention, or improvement impacting LMI persons or LMI geographies. Loans for this purpose comprised the largest portion of the bank's qualified CD lending during the review period. Examples of Comerica's CD lending activities that were considered responsive to the credit needs of the AA include:

- A \$13.5 million loan to support the business operations of a metal stamping small business located in Detroit, Michigan. The loan allows the business to continue operating in the AA, employing skilled trade workers, who are mostly LMI individuals living in the LMI geographies.
- A \$7 million construction loan, in conjunction with an \$8 million CD investment, for a 30-unit housing project that includes 11 subsidized units set expressly aside to provide housing and wrap-around services for chronically homeless individuals in the AA.
- A \$36 million line of credit to an organization providing tuition-free education for children in the AA, of which 63 percent qualify for free or reduced-price lunch.

Table 22 summarizes the CD loans extended in the AA during the review period.

Table 22

Revitalization and Stabilization	81	137,813								
Total	402	1,473,416								

INVESTMENT TEST

The bank's performance under the Investment Test in the AA is excellent. Comerica is often in a leadership position given its excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors. The dollar amount of CD investments and grants made in the AA grew by 48.6 percent since the previous evaluation. Though Comerica makes occasional use of innovative and/or complex investments, it exhibits good responsiveness to credit and CD needs of the AA.

Table 23 illustrates the breakdown of the bank's CD investments and donations within the AA, including prior period investments that remain on Comerica's ledger, current period investments purchased during the review period, and CD donations made since the previous evaluation. Examples of CD investment and donation activities include:

- An \$8 million LIHTC equity investment, in conjunction with a \$7 million CD loan, for a 30-unit new housing construction project that includes 11 subsidized units set expressly aside for chronically homeless individuals in the AA. The project also includes a provision of wrap-around services including mental health services, employment training, and financial literacy education. This investment is particularly responsive given the shortage of affordable housing, as indicated by community contacts.
- A \$250,000 deposit with a minority-owned depository institution to support the institution with a mentor-protégé relationship focused on capacity building and developing community engagement opportunities for the bank.
- A \$100,000 donation to an organization providing assistance to technology startups and local businesses through entrepreneurship training, business-focused financial education, and networking events. This donation demonstrates the bank's commitment to serving the credit needs of the AA, as a community contact noted that AA small businesses require support and investments to help revitalize the AA.

SERVICE TEST

The bank's Service Test performance is excellent.

Retail Services

Comerica's delivery systems are readily accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of the bank's 126 branch offices and 213 ATMs as of April 1, 2023, was compared to the distribution of the households and businesses among the tract categories within the AA. Table 24 summarizes the bank's retail locations in the AA.

Table 24

	Branch and Full-Service ATM Locations Assessment Area: Southeast Michigan Metropolitan												
Tract Income	% of Geographies	% of Households	% of Businesses	Bran	-	Full-Service ATMs # %							
Low	9.3	7.8	6.5	8	6.4	17	8.0						
Moderate	25.6	25.4	21.8	23	18.3	44	20.7						
Middle	29.3	32.7	30.8	37	29.4	61	28.6						
Upper	29.4	33.1	38.6	52	41.3	76	35.7						
Unknown	6.4	0.9	2.3	6	4.8	15	7.0						
Total	100.0	100.0	100.0	126	100.0	213	100.0						

Comerica has a large presence in the AA, with more than 10 percent of the 1,305 AA census tracts containing either a branch or full-service ATM. Additionally, a large percentage of the LMI census tracts in the AA are congregated in the region stretching north from downtown Detroit just inland from Lake St. Claire. This region includes more than 35 of the bank's branches, which appropriately service the area.

The bank opened two branches (one in a middle-income and one in an upper-income census tract) and closed 11 branches (two located in moderate-income, four located in middle-income, and five in upper-income census tracts) in the AA. Each of the branches closed served an area that is sufficiently serviced by another location. Therefore, the bank's record of opening or closing branches has not adversely affected the accessibility of its delivery systems, including to LMI

² Original market value of investment

geographies or LMI individuals. Banking services and hours of operations do not vary in a way that inconveniences the AA, particularly in LMI geographies or to LMI individuals.

Community Development Services

The bank is a leader in providing CD services in the AA. Comerica's employees served in various capacities for 314 organizations offering CD services targeted toward LMI individuals. During the review period, bank employees provided 2,470 CD services totaling 8,171 hours. This represents a substantial increase from the previous evaluation, with the number of qualified CD services growing by 234.2 percent and total hours by 107.2 percent. The bank's efforts in providing qualified services throughout the AA reflect very favorably on Comerica's commitment to addressing the AA needs by giving more than just dollars. Examples of services performed by bank employees include:

- Forty-three bank employees helped facilitate pop-up financial education simulations in partnership with an organization that focuses on elevating young innovators beyond societal constraints. The simulations taught budgeting, savings, credit, and career readiness to students and other young people, more than 75 percent of which were LMI.
- Eighty-three bank employees in the AA provided more than 350 hours of qualified service through a non-profit which empowers high school and college students through targeted education and mentorships with local business professionals. The employees provided education to LMI students regarding financial literacy, goal setting, and career preparedness.
- Bank employees served an organization that provides home ownership tools and services, including downpayment assistance, to LMI individuals in the AA. Services rendered include providing financial education to the organization's beneficiaries and providing counsel on marketing and strategic planning to help organization grow and increase its impact across the area.

ANN ARBOR MSA ASSESSEMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE ANN ARBOR MSA ASSESSMENT AREA

- Comerica's Ann Arbor MSA AA consists of the entirety of Washtenaw County, which is also the Ann Arbor, MI MSA. See Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is comprised of 107 census tracts, of which 12.1 percent are designated as low-income, 12.1 percent as moderate-income, 37.4 percent as middle-income, 28.0 percent as upper-income, and 10.3 percent as unknown-income.
- Following the 2020 U.S. Census, seven new census tracts were drawn within the AA, decreasing the number of LMI geographies by 23.1 percent.
- The bank operates nine full-service branches in the AA, including one branch in a low-income, one in a moderate-income, four in middle-income, three in upper-income census tracts.
- According to the June 30, 2022, FDIC Market Share Report, Comerica had a 8.5 percent market share, ranking 5th out of 16 FDIC-insured depository institutions operating in the AA
- In 2022, the bank ranked 28th out of 352 HMDA reporters in the AA with 97 HMDA originations and purchases, and 11th out of 92 CRA reporters with 133 CRA small business and small farm loans.

1 2011-2015 H.S. Cens	us Kureau. America	n Community Survey										

- Ann Arbor is the 5th largest city in Michigan.
- The AA population grew significantly between 2015 and 2020, more than doubling the statewide growth rate. The rapid growth rate is primarily attributed to the University of Michigan, which has an annual enrollment of 50,000 students, and technology companies drawn to the area by the university's research and development infrastructure.

Table 26

Median Family Income Change												
Assessment Area: Ann Arbor MSA												
Area	2015 Median 2020 Median Percentage

Michigan	' '											

Source: 2011-2015 U.S. Census Bureau: American Community Survey 2016-2020 U.S. Census Bureau: American Community Survey

Note: Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.

- The AA MFI grew at a rate comparable to the statewide. It is noteworthy that the AA MFI in 2020 is 39.4 percent higher than the MFI for the state of Michigan.
- According to FFIEC Census data, 6.3 percent of families in the AA lived below the poverty level, which is lower than the 9.2 percent at the state level.

Table 27

		iubic											
Housing Cost Burden													
Assessment Area: Ann Arbor MSA													
Cost Burden - Renters Cost Burden - Owners													
Area	Low												
	Income Income Renters Income Income Owners												
Ann Arbor MSA AA	75.5	25.0	44.6	64.6	29.5	18.4							
Michigan	74.2	31.3	43.2	61.7	26.5	18.2							
Cost burden is housing cost that equals 30 percent or more of household income. Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy													

- Housing affordability within the AA for low-income renters is a substantially greater burden than the burden on owners at any other level.
- The AA median age of housing stock is 47 years, points to an aging housing stock. However, the AA median age of housing stock is similar to the statewide, at 49 years.
- Despite the aging housing stock in the AA, the median housing value, at \$278,480 is 71.3 percent higher than the statewide, at \$162,600.

Table 28

1 4510 20												
Unemployment Rates Assessment Area: Ann Arbor MSA												
Region 2018 2019 2020 2021 2022												
Ann Arbor MSA AA	•											
Michigan	4.2	4.1	10.0	5.9	4.2							
Source: Bureau of Labor Statistics: Local Area Unemployment Statistics												

- Generally, the AA unemployment rates are low, trailing the statewide rates between 2018 and 2022. In 2020, the unemployment rates more than doubled due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the unemployment rates stabilized and returned to pre-pandemic levels.
- Major employment industries within the AA include healthcare and social assistance, retail trade, professional and technical services, and accommodation and food services.
- A community contact indicated that the University of Michigan in Ann Arbor significantly shapes the AA economy as it employs a substantial number of workers in the AA. The university's impact to the state of Michigan is \$12.1 billion¹.
- Many technology companies serve as top employers in the AA including JSTOR, ProQuest, and Truven Health Analytics.

Table 29 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the AA is good. Comerica's small business lending generally carried more weight when assessing performance, as this product represents the highest volume of lending in the AA during the review period. Additionally, only home refinance and home improvement loans were evaluated separately, as the other home mortgage lending products did not have sufficient volume to conduct a meaningful analysis.

Details of the bank's 2020 mortgage and small business lending and aggregate data can be found in Appendix C.

Lending Activity

Comerica's lending activity reflects good responsiveness to the AA credit needs. The bank makes use of innovative and/or flexible lending practices through its participation in numerous industry-recognized, government-guaranteed programs. During the review period, Comerica originated 460 SBA loans and 79 small business micro loans, for a combined total of \$89.9 million.

The bank extended 296 home mortgage and 719 small business loans between January 1, 2020, and December 31, 2022. The loan products and origination volumes are consistent with the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

The geographic distribution of lending reflects adequate penetration throughout the AA. The bank's small business and home mortgage lending performance among geographies of different income levels is consistent with the overall performance. The distribution of Comerica's lending in middle- and upper-income geographies did not affect conclusions about the bank's lending performance in LMI geographies. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects adequate penetration throughout the AA. The 2021 and 2022 distribution of home mortgage lending among low-income census tracts is comparable to aggregate data and the percentage of owner-occupied units. Among moderate-income census tracts, the bank performed below aggregate data but comparable to the demographic figure.

The bank's 2020 lending performance is consistent with Comerica's 2021 and 2022 performance, with penetration levels slightly below aggregate data and the demographic figure in LMI geographies.

Home Refinance Lending

Comerica's geographic distribution of home refinance lending is adequate. Distribution of 2021 home refinance loans among LMI census tracts in the AA is comparable to aggregate lending performance and the demographic figure. In 2022, the bank made no home refinance loans in low-income census tracts; however, the distribution among moderate-income geographies is comparable to aggregate data and the demographic figure. The lack of home refinance loans in low-income areas aligns with the overall decrease in the number of originations in 2022. The sharp decrease is primarily due to rising interest rates.

The bank's 2020 lending performance is consistent with its 2021 and 2022 performance, with a distribution of loans in LMI census tracts comparable to aggregate data but below the demographics.

Home Improvement Lending

The geographic distribution of home improvement lending is good. The 2021 and 2022 distribution of home improvement loans among low-income census tracts is comparable aggregate data and the demographic figure. In moderate-income census tracts, the bank's 2021 and 2022 home improvement lending performance is below aggregate data and the demographic figure. Despite increases in interest rates and a 23.1 percent decrease of LMI geographies in the AA, Comerica sustained its lending levels in 2022.

The bank's 2020 lending performance in low-income tracts is below aggregate and demographic data while in moderate-income geographies, Comerica's performance exceeds aggregate data and is comparable to demographics.

Small Business Lending

The geographic distribution of small business loans reflects adequate penetration throughout the AA. The 2021 and 2022 distribution of small business loans among low-income census tracts is comparable to aggregate data as well as the percentage of businesses in these tracts. Comerica's 2021 small business lending in moderate-income census tracts is below aggregate data and the demographic figure, while the 2022 performance is comparable to aggregate lending and the demographic figure.

The bank's 2020 lending performance is consistent with that of 2021 and 2022, with the bank performing comparable to aggregate data in LMI census tracts.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to borrowers reflects a good penetration among individuals of different income levels and businesses of different revenue sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the AA is excellent when compared to demographic characteristics and the performance of aggregate HMDA lenders. The 2021 and 2022 dispersion of home mortgage loans among LMI borrowers in the AA exceeds the aggregate lenders' performance and is comparable to the demographic figure. Aggregate data serves as a better proxy for loan demand than the demographic figure.

The bank's home mortgage lending to low-income borrowers in the Ann Arbor MSA AA was greater than the performance of aggregate lenders in both 2021 and 2022 by a consistent margin. Though the bank's performance was below the percentage of families in the AA categorized as low-income, it reflects favorably on the bank's responsiveness to the credit needs of low-income borrowers in the AA while also operating in a safe and sound manner. Among moderate-income borrowers, the bank also outperformed aggregate HMDA lenders by a steady margin, though in this demographic, the bank also performed above the percentage of AA families categorized as moderate-income.

Comerica's 2020 lending performance is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that exceeds aggregate data and is below to the demographic figure.

Small Business Lending

Comerica's borrower distribution of small business loans by revenue size of business is adequate. The 2021 and 2022 loan distribution to businesses with revenues of \$1 million or less is below the percentage of small businesses in the AA as well as aggregate lending. Aggregate data serves as a better proxy for loan demand than the demographic figure; therefore, being below the demographic figure does not reflect poorly on the bank's performance. Given the conclusion of the SBA's PPP in 2021 and rising interests in 2022, Comerica's sustained performance is favorably viewed in light of significant decline in the number of small business loans extended. Moreover, the bank's 2022 performance by dollar amount is comparable to aggregate data, which is an improvement from 2021 and reflects Comerica's willingness to extend larger dollar amount loans to small businesses.

The bank's 2020 small business lending performance among businesses with revenues of \$1 million or less is above aggregate data.

Community Development Lending

The bank is a leader in making CD loans in the AA. During the review period, Comerica originated 35 qualified CD loans totaling \$197.0 million. Since the previous evaluation, the number of CD loans in the AA grew by 45.8 percent by number volume and 323.8 percent by dollar amount.

Comerica made efforts to fill the void left by the cessation of the SBA's PPP in May 2021, with a specific focus on promoting economic development through small business financing and permanent job creation, retention, or improvement impacting LMI persons or LMI geographies. Examples of the bank's CD lending activities that were considered responsive to the credit needs of the AA include:

- A \$25 million line of credit to support an organization providing evidence-based counseling and virtual access to doctors for patients suffering from substance abuse, of which the majority receives Medicaid and are considered LMI individuals.
- A \$22.6 million loan for the purchase of a 184-unit LIHTC apartment complex to provide affordable housing in the bank's AA.
- A \$5 million line of credit to meet the cash flow needs of an organization that provides education and significant after-school programming for charter school students, of which 90 percent come from LMI families.

Table 34

Affordable Housing	1	22,600								
Community Services	8	43,860								
Economic Development	22	126,307								
Revitalization and Stabilization	4	4,194								
Total	35	196,961								

INVESTMENT TEST

The bank's performance under the Investment Test in the AA is good. The bank is occassionally in a leadership position given the significant level of qualified CD investments and grants, particularly those not routinely provided by private investors. The dollar amount of CD investments and grants made in the AA grew by 12.5 percent since the previous evaluation. Though the bank makes rare use of innovative and/or complex investments, Comerica exhibits good responsiveness to credit and CD needs of the AA.

Table 35 illustrates the breakdown of the bank's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the review period, and CD donations made since the previous evaluation. An example of a CD investment that is notably responsive to the AA is a \$3 million LIHTC equity investment in a newly constructed 50-unit apartment complex specifically targeted to serve families, including those with special needs. The development includes discounted rents as well as 30 units that will be fully subsidized to target the chronically homeless.

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

The bank's delivery systems are accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of Comerica's nine branches and 13 ATMs as of April

² Original market value of investment

1, 2023, was compared to the distribution of the households and businesses among the income tract categories. Table 36 summarizes the bank's retail locations in the AA.

Table 36

			ıll-Service ATM ıt Area: Ann Art		ıs

Total	100.0	100.0	100.0	9	100.0	13	100.0

The bank did not open or close any branches in the AA during the review period. Banking services and hours of operations are basically the same throughout the AA; thus, they do not vary in a way that inconveniences LMI geographies or LMI individuals.

Community Development Services

The bank provides a relatively high level of CD services in the AA. Comerica's employees served in various capacities for organizations offering CD services targeted toward LMI individuals. During the review period, bank employees provided 47 CD services totaling 125 hours, representing an 80.8 percent increase in number volume since the previous evaluation. Examples of services performed by bank employees include:

- An employee serving on the board of directors for an organization that supports homeless families by providing housing as well as career training and financial education.
- Bank employees provided financial education and resources to small business owners and aspiring entrepreneurs as part of a program that actively facilitates, educates, and advocates for small businesses in the AA.

METROPOLITAN ASSESSMENT AREAS (LIMITED-SCOPE REVIEW)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN LIMITED-SCOPE MICHIGAN METROPOLITAN ASSESSMENT AREAS

The bank's branch operations and deposit market share for each metropolitan AA receiving a limited-scope review were determined as of April 1, 2023, and June 30, 2022, respectively.

Battle Creek, MI MSA AA

- The Battle Creek, MI MSA AA is comprised of the entirety of Calhoun County, which is coterminous with the Battle Creek, MI MSA.
- The AA is comprised of 40 census tracts, including three low-, 13 moderate-, 15 middle-, and nine upper-income tracts.
- Based upon 2020 ACS data, the AA population was 134,310, which reflects a 0.4 percent decrease from the 2015 ACS data.
- The AA includes 33,314 families, 21.9 percent are low-, 17.2 percent moderate-, 19.8 percent middle-, and 41.2 percent are upper-income.
- o The bank operated four branches, representing 1.0 percent of its total branches.
- Comerica held \$259.3 million in deposits, representing a market share of 17.7 percent and 0.3 percent of the bank's total deposits.

Flint, MI MSA AA

- The Flint, MI MSA AA is comprised of the entirety of Genesee County, which is coterminous with the Flint, MI MSA.
- The AA is comprised of 134 census tracts, which includes 16 low-, 33 moderate-, 41 middle-, 39 upper-, and five unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 406,211, which reflects a 2.3 percent decrease from the 2015 ACS data.
- The AA includes 108,430 families, 21.3 percent are low-, 17.5 percent moderate-, 20.8 percent middle-, and 40.5 percent are upper-income.
- The bank operated one branch, representing 0.2 percent of its total branches.
- Comerica held \$57.6 million in deposits, representing a market share of 1.0 percent and 0.1 percent of the bank's total deposits.

Grand Rapids-Kentwood Metropolitan AA

- The Grand Rapids-Kentwood Metropolitan AA is comprised of the entirety of Ottawa and Kent counties which, along with Ionia and Montcalm counties (excluded from the delineation) make up the Grand Rapids-Kentwood, MI MSA.
- The AA is comprised of 210 census tracts, including 11 low-, 38 moderate-, 104 middle-, 53 upper-, and four unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 954,174, which reflects a 6.5 percent increase from the 2015 ACS data.
- The AA includes 237,965 families, 18.0 percent are low-, 17.9 percent moderate-, 23.2 percent middle-, and 40.9 percent are upper-income.
- o The bank operated 11 branches, representing 2.7 percent of its total branches.
- Comerica held \$646.6 million in deposits, representing a market share of 2.2 percent and 0.8 percent of the bank's total deposits.

• Jackson, MI MSA AA

- The Jackson, MI MSA AA is comprised of the entirety of Jackson County, which is coterminous with the Jackson, MI MSA.
- The AA is comprised of 46 census tracts, including three low-, 14 moderate-, 15 middle-, 12 upper-, and two unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 160,366, which reflects a 0.4 percent increase from the 2015 ACS data.
- The AA includes 39,908 families, 18.7 percent are low-, 19.0 percent moderate-, 21.0 percent middle-, and 41.3 percent are upper-income.
- The bank operated seven branches, representing 1.7 percent of its total branches.
- Comerica held \$550.9 million in deposits, representing a market share of 19.5 percent and 0.7 percent of the bank's total deposits.

Kalamazoo-Portage, MI MSA AA

- The Kalamazoo, MI MSA AA is comprised of the entirety of Kalamazoo County, which is coterminous with the Kalamazoo-Portage, MI MSA.
- The AA is comprised of 68 census tracts, which include six low-, 17 moderate-, 23 middle-, 21 upper-, and one unknown-income tract.
- Based upon 2020 ACS data, the AA population was 261,752, which reflects a 1.9 percent increase from the 2015 ACS data.
- The AA includes 62,664 families, 21.5 percent are low-, 18.3 percent moderate-, 19.7 percent middle-, and 40.5 percent are upper-income.
- o The bank operated six branches, representing 1.5 percent of its total branches.
- Comerica held \$324.4 million in deposits, representing a market share of 6.9 percent and 0.4 percent of the bank's total deposits.

Lansing-East Lansing Metropolitan AA

- The Lansing-East Lansing Metropolitan AA is comprised of the entirety of Eaton, Clinton, and Ingham counties which, along with Shiawassee County (excluded from the delineation) make up the Lansing-East Lansing, MI MSA.
- The AA is comprised of 136 census tracts, including seven low-, 26 moderate-, 57 middle-, 34 upper-, and 12 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 473,203, which reflects a 1.0 percent increase from the 2015 ACS data.
- The AA includes 111,157 families, 20.0 percent are low-, 17.0 percent moderate-, 21.8 percent middle-, and 41.2 percent are upper-income.
- o The bank operated six branches, representing 1.5 percent of its total branches.
- Comerica held \$649.0 million in deposits, representing a market share of 6.1 percent and
 0.8 percent of the bank's total deposits.

Midland, MI MSA AA

- The Midland, MI MSA AA is comprised of the entirety of Midland County, which is coterminous with the Midland, MI MSA.
- The AA is comprised of 21 census tracts, including one low-, four moderate-, 12 middle-, and four upper-income tracts.
- Based upon 2020 ACS data, the AA population was 83,494, which reflects a 0.2 percent decrease from the 2015 ACS data.
- The AA includes 23,057 families, 19.8 percent are low-, 18.1 percent moderate-, 22.0 percent middle-, and 40.0 percent are upper-income.
- o The bank operated two branches, representing 0.5 percent of its total branches.

 Comerica held \$130.8 million in deposits, representing a market share of 11.3 percent and 0.2 percent of the bank's total deposits.

Muskegon, MI MSA AA

- The Muskegon, MI MSA AA is comprised of the entirety of Muskegon County, which is coterminous with the Muskegon, MI MSA.
- The AA is comprised of 46 census tracts, including five low-, eight moderate-, 21 middle-, 11 upper-, and one unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 175,824, which reflects a 2.5 percent increase from the 2015 ACS data.
- The AA includes 44,390 families, 20.4 percent are low-, 18.7 percent moderate-, 21.2 percent middle-, and 39.8 percent are upper-income.
- The bank operated four branches, representing 1.0 percent of its total branches.
- Comerica held \$234.3 million in deposits, representing a market share of 10.6 percent and 0.3 percent of the bank's total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix D contains detailed performance and demographic information reviewed for the limited-scope AAs. Table 37 discusses conclusions regarding the bank's performance.

The institution's lending, investment, service performance in the AAs is generally consistent with the overall state performance.

NONMETROPOLITAN AREA (LIMITED-SCOPE REVIEW)

DESCRIPTION OF OPERATIONS

Lenawee County Nonmetropolitan AA

- The Lenawee County Nonmetropolitan AA is comprised of the entirety of Lenawee County.
- The AA is comprised of 25 census tracts, including five moderate-, 14 middle-, and six upper-income tracts.
- Based upon 2020 ACS data, the AA population was 99,423, which reflects a 0.5 percent increase from the 2015 ACS data.
- The AA includes 25,851 families, 15.7 percent are low-, 19.0 percent moderate-, 21.6 percent middle-, and 43.8 percent are upper-income.
- As of April 1, 2023, the bank operated one branch, representing 0.2 percent of its total branches.
- As of June 30, 2022, Comerica held \$45.1 million in deposits, representing a market share of 3.1 percent and 0.1 percent of the bank's total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix E contains detailed performance and demographic information reviewed for the limited-scope AAs. Table 38 discusses conclusions regarding the bank's performance.

Table 38

Assessment Area	Lending Test	Investment Test	Service Test
Lenawee County Nonmetropolitan AA	Below	Below	Below

The institution's lending, investment, and service performance in the AA is below Comerica's lending, investment, and service performance in the state; however, it does not impact the assessed rating.

STATE OF TEXAS

CRA RATING FOR TEXAS: Outstanding

The Lending Test is Rated:

Outstanding
The Investment Test is Rated:

Outstanding
Outstanding
Outstanding

Major factors supporting the institution's rating include:

- Lending activity reflects excellent responsiveness and record of serving the AAs' credit needs, including low-income individuals, low-income areas, and very businesses.
- The geographic distribution of loans reflects excellent penetration throughout the AAs.
- The bank's distribution of loans among individuals of different income levels, including LMI individuals, and businesses and farms of different sizes is good.
- Comerica is a leader in making CD loans.
- The bank makes use of innovative and/or flexible lending practices in serving AAs' needs.
- Comerica is often in a leadership position given its excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors.
- The bank makes significant use of innovative and/or complex investments to support CD initiatives.
- Comerica exhibits good responsiveness to credit and CD needs.
- Delivery systems are accessible to individuals of different income levels throughout the bank's AAs.
- The record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals.
- Services that do not vary in a way that inconveniences the bank's AAs, particularly LMI geographies and/or LMI individuals.
- Comerica provides a relatively high level of CD services.

SCOPE OF THE EVALUATION

The scope of the review for the state of Texas is consistent with the overall scope for the institution, including evaluations under the Lending, Investment, and Service tests. The time period and products evaluated for this state are also unchanged from the scope discussed in the Institution section of this report.

The two of the five AAs in the state of Texas were reviewed using full-scope procedures.

- Dallas-Fort Worth Metropolitan AA
- San Antonio Metropolitan AA

The remaining three AAs received limited-scope reviews.

- Austin Metropolitan AA
- Houston Metropolitan AA
- Bank of the Hills Nonmetropolitan AA

AAs were selected for full-scope reviews based on the strategic importance of the AA, considering volume of lending, number of branches, and percentage of total deposits, as well as the length of time since the AA last received a full-scope review. Overall, approximately 45.5 percent of lending activity (by number of loans), 57.0 percent of deposits, and 53.0 percent of total branches within Texas were evaluated through the full-scope reviews. The bank's performance in the Dallas Fort Worth Metropolitan AA was given greater consideration as it represents the majority of Comerica's activity in the state and is a strategic focus of the institution.

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN TEXAS

The bank delineates five of its 27 AAs and operates 115 of its 409 branches in the state of Texas. As of June 30, 2022, Comerica had \$12.8 billion in deposits in the state, representing 16.6 percent of total deposits. According to the June 30, 2022, FDIC Summary of Deposits, the bank had a deposit market share of 0.9 percent and ranked 13th out of 247 FDIC-insured financial institutions across the state.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the state of Texas is Outstanding. The Lending Test performance in the Dallas-Fort Worth Metropolitan AA is excellent, which is consistent with the overall state rating, while the bank's performance in the San Antonio Metropolitan AA is considered good. Overall, Comerica's performance in the AAs receiving limited-scope reviews supports the rating for the state.

Lending Activity

Comerica's lending levels reflect excellent responsiveness to AA credit needs. The bank makes use of innovative and/or flexible lending programs through participation in government-guaranteed programs, small business initiatives, and affordable housing projects.

As outlined in Table 39, this evaluation considered 12,153 loans totaling \$2.7 billion extended between January 1, 2020 and December 31, 2022. The loan products and origination volumes are consistent with the credit needs of the Texas AAs and the bank's business strategy. The number of small business and HMDA loans extended by the bank was compared against the number of loans originated by aggregate lenders. Comerica ranked 51st out of 239 CRA reporters and 88th of 978 HMDA reporters in its Texas AAs.

Table 39

Summary of Lending Activity – January 1, 2020 through December 31, 2022 Texas Assessment Areas						
	exas Assessmei

Total Small Farm	126	1.0	5,736	0.2		
TOTAL LOANS	12,153	100.0	2,683,594	100.0		

Geographic Distribution of Loans

The overall geographic distribution of lending reflects excellent penetration throughout the bank's Texas AAs. This performance is consistent across Comerica's Dallas-Fort Worth Metropolitan and San Antonio Metropolitan AAs.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's overall lending reflects good penetration among individuals of different income levels and businesses of different revenue sizes. This performance is consistent across the bank's Dallas-Fort Worth Metropolitan and San Antonio Metropolitan AAs. A detailed discussion of the facts and data supporting the overall conclusions are presented in the Conclusions with Respect to Performance Criteria section for each AA.

Community Development Lending

Comerica is a leader in making CD loans in the state of Texas. As reflected in Table 40, the bank originated 309 CD loans totaling approximately \$1.0 billion within the state, which comprises 22.9 percent of overall bank-wide CD loan volume by number and 18.8 percent by dollar amount. The level of CD lending is excellent in the Dallas-Fort Worth Metropolitan and San Antonio Metropolitan AAs.

The bank's Texas CD loans increased notably since the previous evaluation. While the number of qualified loans decreased by 24.8 percent, the dollar amount increased by 45.0 percent since the prior evaluation. This growth occurred despite the substantial decrease in loans originated through the SBA's PPP, which made up approximately 40.9 percent of the bank's CD loans at the previous evaluation.

CD loans originated by the bank during the evaluation period were extended for a variety of purposes, as noted in Table 40. Specific details regarding the CD lending can be found in the Conclusions with Respect to Performance Tests section for each AA.

Table 40

Community Development Lending Texas Assessment Areas								
Purpose	#	\$(000s)

Community Services	22	21,247						
Economic Development	194	713,873						
Revitalization and Stabilization	88	178,264						
Total	309	1,004,179						

INVESTMENT TEST

The bank's performance under the Investment Test in the state of Texas is Outstanding. The Investment Test conclusions in the Dallas-Fort Worth Metropolitan AA is considered excellent and consistent with the overall state rating. The bank's performance under the Investment Test in the San Antonio Metropolitan AA is adequate. Greater weight was given to the Dallas-Fort Worth Metropolitan AA, as 48.0 percent by number volume and 47.4 percent by dollar amount of the bank's CD investments in the state of Texas occurred in that AA. Conversely, the CD investments in the San Antonio Metropolitan AA represented 5.1 percent by number volume and 15.8 percent by dollar amount of the total CD investments in the state of Texas. Generally, the bank's performance in the AAs that received limited-scope reviews is consistent with the performance in the state of Texas.

Comerica has an excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors, often in a leadership position. The bank's occasional use of innovative and/or complex investments exhibits good responsiveness to the credit and CD needs of its AAs. Specific details regarding CD qualified investments and donations within the bank's Texas AAs can be found in the Conclusions with Respect to Performance Tests section for each AA.

In addition to the activity within its delineated AAs, the bank also made five qualified CD investments in the broader statewide region. These investments totaled \$6.6 million, including a \$4 million investment in a Small Business Investment Company that promotes economic development across the region through the financing of small businesses. Comerica also made a sizeable donation in a minority-owned financial institution that serves LMI geographies within the state.

SERVICE TEST

The bank's performance under the Service Test in the state of Texas is Outstanding. The Service Test conclusions in the Dallas-Fort Worth Metropolitan and San Antonio Metropolitan AAs are considered excellent and consistent with the overall state rating. Generally, Comerica's performance in the AAs that received limited-scope reviews is consistent with the performance in the state of Texas.

Retail Services

Branch locations and alternative delivery systems, such as drive-through facilities and online and mobile banking, are accessible to the bank's various geographies and to individuals of different income levels in each AA. Of Comerica's 115 full-service branches and 158 full-service ATMs in the state of Texas, 34 branches and 39 ATMs are located in LMI tracts. Refer to Table 42 for the distribution of Texas branches and full-service ATMs by income level of geographies.

The bank's delivery systems in the state of Texas are accessible to the geographies and individuals of different income levels in Comerica's AAs. The bank's record of opening or closing branches in the state has not adversely affected the accessibility of its delivery systems. Banking services and hours of operations do not vary in a way that inconveniences the state, particularly LMI geographies or LMI individuals. Moreover, Comerica's operations and product and service offerings in the state generally mirror that of the overall institution, which is described in the overall Retail Banking Services section of this evaluation.

Table 42

Community Development Services

The bank is a leader in providing CD services in the state of Texas. While the San Antonio Metropolitan AA is adequate in providing CD services, greater weight was given to the Dallas-Fort Worth Metropolitan AA. Bank representatives provided 1,778 services, totaling 5,617 hours, to 248 organizations within its Texas AAs. The bank's directors, officers, and personnel are involved with numerous organizations that extend CD services to LMI individuals and/or geographies. The bank significantly increased the hours and more than doubled the number of organizations served since the previous evaluation. The bank's significant efforts to promote CD are noted through board participation, financial literacy, and entrepreneurship training. Details of the bank's explicit CD services AA can be found in the Conclusions with Respect to Performance Tests section for each AA.

DALLAS-FORT WORTH METROPOLITAN ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE DALLAS-FORT WORTH METROPOLITAN ASSESSMENT AREA

- The Dallas-Fort Worth Metropolitan AA consists of the entirety of six of the eleven counties that make up the Dallas-Fort Worth-Arlington, TX MSA: Collin, Dallas, Denton, Ellis, Rockwall, and Tarrant counties. Refer to Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is made up of 1,572 census tracts, of which 9.5 percent are designated as low-income, 26.0 percent as moderate-income, 28.9 percent as middle-income, 34.0 percent as upper-income, and the remaining 1.5 percent as unknown-income.
- The 2020 U.S. Census added 355 new census tracts within the AA, resulting in an increase of 29.2 percent. The number of geographies designated as LMI increased by 14.5 percent, with low-income census tracts decreasing by 9.1 percent and moderate-income tracts increasing by 30.7 percent.
- The bank operates 55 full-service branches in the AA, including seven branches in low-income, eight in moderate-income, 19 branches in middle-income, and 21 branches in upper-income census tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 0.8 percent market share, ranking 11th out of 160 FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 72nd out of 1,064 HMDA reporters in the AA with 571 HMDA originations and purchases, and 23rd out of 309 CRA reporters with 740 CRA small business loans.
- Community contacts indicated a significant need for affordable housing, access to homeownership and credit for LMI individuals, as well as buydown interest rate programs and small businesses lending.

2011-2015 U.S. Census Bureau: American Community Survey

- Population trends between 2015 and 2020 reflect significant growth throughout the AA.
 Four of the six counties reporting population growth exhibit increases of 20 percent or more.

 With the exception of Dallas County, the population growth in every AA county exceeded the statewide and national growth rates, at 9.8 percent and 1.6 percent, respectively.
- A community contact noted that significant population growth can be attributed to employment opportunities offered by the nearly 24 Fortune 500 companies headquartered in the AA. Some of these companies include American Airlines, Southwest Airlines, AT&T, Texas Instruments, and ExxonMobil.
- According to U.S. Census Bureau estimates, four of the 15 cities with the largest increase in population between July 1, 2020, and July 1, 2021, are located inside of the AA.

Note: Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.

- The AA MFI grew at a rate comparable to the state MFI, with half of the AA counties reporting 2020 MFIs greater than \$100,000.
- Collin County has the lowest MFI growth between 2015 and 2020; however, it has maintained the highest 2020 MFI at \$118,341.
- According to the FFIEC Census data, 8.2 percent of AA families live below the poverty level. Dallas County has the highest rate of families living below the poverty level, at 11.4 percent, which slightly exceeds the statewide rate, at 10.9 percent.

Table 45

Housing Cost Burden Assessment Area: Dallas-Fort Worth Metropolitan								
Assessment		Burden - Re			Cost Burden – Owners

Texas	77.4	42.4	42.4	57.5	30.9	19.2		

Cost burden is housing cost that equals 30 percent or more of household income.

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

- Housing affordability within the AA for low-income renters is a substantially greater burden than the burden on homeowners at any other level.
- Overall, the cost burden for homeowners and renters in the AA is greater than the housing cost burden for homeowners and renters statewide.
- The AA median housing value is \$241,896 while the statewide median housing value is \$187,200. Moreover, the AA median age of housing stock is 38 years, with Rockwall County reporting it at 18 years. In comparison, the state of Texas' median age of housing stock is 33 years.
- A community contact reported a shortage of affordable housing in the AA, noting that housing affordability is a significant issue impacting LMI households.

Source: Bureau of Labor Statistics: Local Area Unemployment Statistics									

- Unemployment rates for the AA and its counties between 2018 and 2022 are comparable to the statewide rate.
- Unemployment rates almost doubled in 2020 due to the COVID-19 pandemic, as many businesses laid off employees due to the statewide stay at home and social distancing

orders. The impact of the COVID-19 pandemic in the Dallas and Tarrant counties' unemployment rate was significant, driving the AA unemployment rate in 2020. In 2022, the AA and statewide unemployment rates stabilized to pre-pandemic levels.

• Major employment industries within the AA include healthcare and social assistance, accommodation and food services, and retail trade.

Table 47 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

Comerica's Lending Test performance in the AA is excellent. The bank's small business lending generally carried more weight as this product comprised the largest volume of lending in the AA. Additionally, a separate evaluation of multifamily loans, other purpose closed/exempt, and loan purpose not applicable was not performed due to insufficient volume of originations during the review period to conduct a meaningful analysis.

Details of the bank's 2020 mortgage and small business lending and corresponding aggregate data can be found in Appendix C.

Lending Activity

The bank's lending activity in the AA reflects good responsiveness to AA credit needs. Comerica makes use of innovative and/or flexible lending practices to serve AA credit needs, including LMI borrowers. The bank originated 1,808 home mortgage and 3,824 small business loans in the AA between January 1, 2020, and December 31, 2022. Comerica sustained the volume of home mortgage lending between 2020 and 2022; however, the volume of small business lending significantly decreased year after year. The reduction in small business lending is primarily attributed to the cessation of the SBA's PPP in May 2021 and rising interest rates in 2022. It is noteworthy that the level of home mortgage lending has not been adversely impacted by the interest rate hikes. This level of lending reflects favorably on the bank as it aligns with the bank's strategic focus on small business lending.

Geographic Distribution of Loans

The geographic distribution of lending reflects excellent penetration throughout the AA. Comerica's home mortgage and small business lending reflects excellent penetration among geographies of different income levels, especially LMI geographies. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about Comerica's performance in LMI geographies. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects excellent penetration throughout the AA. The bank's 2021 and 2022 distribution of home mortgage loans by number volume among low-income census tracts is comparable to aggregate data and demographic figure. The penetration in moderate-income census tracts exceeds aggregate data in 2021 and is comparable 2022. In 2022, Comerica's home mortgage lending to LMI census tracts by dollar amount is comparable aggregate and slightly below the demographic figure.

The bank's 2020 loan distribution in LMI geographies is comparable with 2021 and 2022.

Home Purchase Lending

The geographic distribution of home purchase lending is excellent. The distribution of 2022 home purchase loans among low-income census tracts doubles the aggregate data and exceeds the demographic figure, which is noteworthy given the decrease of low-income geographies in the AA. While Comerica did not extend any home purchase loans in low-income geographies in 2021, its 2020 and 2021 lending performance is comparable to aggregate data.

The distribution of the bank's home purchase loans among moderate-income census tracts in 2021 and 2022 also exceeds aggregate data, though Comerica's lending is comparable to aggregate lending in 2020. The bank's performance in 2020, 2021, and 2022 is below the demographic figure, which does not adversely impact the bank's overall performance given that aggregate data serves as a better proxy for loan demand.

Home Refinance Lending

The geographic distribution of home refinance lending is excellent. The distribution of 2020 and 2021 home refinance loans among low-income census tracts exceeds aggregate data and the demographic figure, though it is slightly lower in 2022. The bank's lending in moderate-income census tracts significantly exceeds aggregate data and is comparable to the demographic figure.

The bank's lending performance in 2020 reflected penetration levels consistent with 2021 and 2022 performance, with a distribution of loans in LMI census tracts above aggregate data.

Home Improvement Lending

The geographic distribution of home improvement lending is excellent. The bank's 2021 and 2022 distribution of home improvement loans among low-income census tracts exceeds aggregate data and the demographic figure. However, the bank's 2021 and 2022 home improvement lending in moderate-income tracts significantly exceeds aggregate data but is slightly below the demographic figure.

Lending in LMI census tracts increased since the prior evaluation. The bank's 2020 lending performance in LMI geographies is consistent with its 2021 and 2022 loan distribution, with Comerica's performance in LMI census tracts exceeding aggregate data.

Other Purpose Lines of Credit Lending

The geographic distribution of other purpose lines of credit is excellent. The bank's 2020 and 2021 lending performance in low-income census tracts exceeds aggregate lenders and is comparable to the percentage of owner-occupied units in these tracts. The 2022 loan distribution among low-income census tracts is comparable to aggregate data and slightly below the demographic figure. Aggregate data serves as a better proxy for loan demand than the demographic figure.

Small Business Lending

The geographic distribution of small business loans reflects excellent penetration throughout the AA when compared to demographics and the performance of the aggregate lenders. The bank's distribution of small business loans among LMI census tracts during the review period consistently exceeds aggregate data and the demographic figure. This performance reflects favorably on the bank's responsiveness to the credit needs of small businesses in the AA given the cessation of the SBA's PPP in 2021 and rising interest rates in 2022.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to individuals of different income levels and businesses of revenue different sizes is good. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the AA is excellent when compared to demographic characteristics and the performance of aggregate HMDA lenders in the AA. The bank's 2021 and 2022 lending to low-income borrowers significantly exceeds the performance of aggregate lenders. In 2022, lending to moderate-income borrowers also exceeds aggregate lending data, though the bank's performance to moderate-income borrowers decreased.

The shift in performance toward higher income borrowers occurred as interest rates began to rise from historic lows in early 2022, making mortgage loans more expensive and pricing some lower-income borrowers out of the market. However, the bank's lending to low-income borrowers for home refinance loans and other purpose lines of credit was noteworthy, as the bank lent these products at levels above aggregate lenders.

The bank's lending performance in 2020 is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that is comparable to aggregate data but below the demographic figure.

Small Business Lending

Comerica's borrower distribution of small business loans by revenue size of businesses is adequate. The distribution of 2020 loan originations to businesses with revenues of \$1 million or less is slightly above the performance of aggregate lenders. The percentage of the bank's 2021 and 2022 lending originated to businesses with revenues of \$1 million or less is lower than the percentage reflected in aggregate lending data. However, in 2022 the bank lent a larger percentage of the dollar amount of small business loans to businesses with revenues of \$1 million or less than reflected by aggregate data. This is reflective of the bank's willingness to lend larger sums to small businesses.

Community Development Lending

Comerica is a leader in making CD loans in the AA. During the review period, the bank originated a total of 168 qualifying CD loans, totaling \$685.5 million, which represents an increase of 69.2 percent since the prior evaluation. This increase is reflective of the bank's strategic focus on identifying and responding to CD opportunities and LMI needs. During the earliest portion of the review period, the bank was heavily involved with the SBA's PPP. When the program ended in May 2021, Comerica remained committed to responding to identify credit and community development needs of small business by engaging in activities that promote economic development through the financing of small businesses in the AA. To that end, the bank dramatically increased its lending in this area, originating 116 loans for a total of \$484.2 million, representing a 38.8 percent increase by number volume and a 127.5 percent by dollar amount. Examples of the bank's CD lending activities that were considered responsive to the AA credit needs include:

- Lines of credit to support ongoing operations of small businesses (e.g. wholesale egg company, wholesale boot company, and a textile manufacturer) that provide permanent employment to LMI individuals.
- A \$27.5 million line of credit to a small business that partners with a local municipality in the AA to develop an industrial building park. The development will promote economic development, by stimulating commerce, creating employment opportunities, and generating tax revenue.

Table 52

Revitalization and Stabilization	41	121,785									
Total	168	685,528									

INVESTMENT TEST

Comerica is often in a leadership position given its excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors. Despite the 25.7 percent decrease in the number of CD investments and grants since the previous evaluation, the dollar amount increased by 102.6 percent. The bank makes extensive use of innovative and/or complex investments to support CD initiatives, including significant work with CDFIs and unique and creative affordable housing projects, and exhibits excellent responsiveness to credit and CD needs. Comerica's investments primarily focused on affordable housing, which reflects favorably on the bank since multiple community contacts emphasized the need for affordable housing in the AA. Additionally, housing cost burden data from the U.S. Department of Housing and Urban Development (HUD) demonstrated a significant need for affordable housing.

Table 53 illustrates the breakdown of the bank's CD investments, grants, and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the current evaluation period, and CD donations made since the previous evaluation. Examples of notable investment and donation activities made by the bank include:

- Nineteen investments totaling \$18.2 million in LIHTC-eligible funds for the construction or preservation of rent-restricted units for LMI individuals in the AA. This investment is particularly responsive given community contacts indicated a significant shortage of affordable housing in the AA.
- A \$500,000 equity investment to a CDFI that provides access to capital for small businesses located in the AA.

SERVICE TEST

The bank's Service Test performance is excellent.

Retail Services

Comerica's delivery systems are accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of the bank's 55 branch offices and 89 ATMs as of April 1, 2023, was compared to the distribution of the households and businesses among the AA census tract income categories. Table 54 summarizes the bank's retail locations in the AA.

Table 54

	Branch and Full-Service ATM Locations Assessment Area: Dallas-Fort Worth Metropolitan													
Tract Income	Tract % of % of Branches Full-Service ATMs													
Low	9.5 9.2 5.4 7 12.7 10 11.2													
Moderate	26.0	24.7	19.3	8	14.6	9	10.1							
Middle	28.9	30.7	30.5	19	34.6	33	37.1							
Upper	34.0	34.5	44.0	21	38.2	37	41.6							
Unknown	1.5	0.8	0.9	0	0.0	0	0.0							
Total	100.0	100.0	100.0	55	100.0	89	100.0							

The bank opened one branch in an upper-income census tract and closed one branch in moderate-income census tract. The bank's record of opening or closing branches has not adversely affected the accessibility of its delivery systems, including to LMI geographies. Banking services and hours of operations do not vary in the AA, particularly in LMI geographies or to LMI individuals. The level of branch services and hours offered are consistent throughout the AA.

Community Development Services

Comerica is a leader in providing CD services in the AA. The bank's employees served in 148 organizations offering 1,243 CD services that aid LMI individuals for a total of 3,655 hours. The bank demonstrates significant responsiveness to AA CD needs, by increasing the number of community service hours served since the previous evaluation by 121.4 percent.

Comerica employees devoted over 800 hours serving nonprofit organizations in various capacities, demonstrating the bank's significant commitment to the well-being of LMI individuals and geographies. In addition to the significant community service hours noted, Comerica BusinessHQ opened in early 2023 to support small businesses in the AA. This \$5 million proof-of-concept collaborative space has served more than 400 individuals, providing approximately \$4,500 worth of no-cost coworking and tailored technical assistance by bank employees at the location. In response to the overwhelming success of the location and the development of new avenues to serve the area created through Comerica BusinessHQ, the bank intends to extend the concept to other AAs. This commitment to serving the bank's AA through such a program, despite it not fitting within established definitions of qualified CD activity, reflects very favorably on the bank's responsiveness and innovation to the needs of its communities.

SAN ANTONIO METROPOLITAN ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE SAN ANTONIO ASSESSMENT AREA

- The San Antonio Metropolitan AA is comprised of Bexar and Kendall counties, which represent a portion of the San Antonio-New Braunfels, TX MSA. The AA excludes the following MSA counties: Atascosa, Bandera, Comal, Guadalupe, Medina, and Wilson. Refer to Appendix A for an AA map and Appendix B for additional demographic data.
- The AA consists of 384 census tracts, of which 9.1 percent are designated as low-income, 35.7 percent as moderate-income, 26.8 percent as middle-income, 27.3 percent as upper-income, and 1.0 percent as unknown-income.
- The 2020 U.S. Census added 12 new census tracts within the AA, resulting in an increase of 3.2 percent. The number of geographies designated as LMI increased by 4.7 percent.
- The bank operates six full-service branches in the AA: three branches in moderate-income, two branches in middle-income, and one branch in an upper-income census tract.
- According to the June 30, 2022, FDIC Market Share Report, Comerica had a 0.1 percent market share, ranking 19th out 49 of FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 146th out of 719 HMDA reporters in the AA with 26 HMDA originations and purchases, and 40th out of 189 CRA reporters with 74 CRA small business loans.
- A community contact noted a significant need for affordable housing, mortgage payment assistance, and access to credit for LMI individuals and families as well as small businesses and entrepreneurs. The community contact also noted that financial institutions should continue to invest in CDFIs, as they support small business by providing financing and technical support.

Table 55

Population Change Assessment Area: San Antonio Metropolitan														
Assessment Area: S	<u>San Antonio Me</u>	tropolitan												
Area 2015 2020 Percentage Population Population Change														
San Antonio Metropolitan AA	1,862,863	2,053,603	10.2											
Bexar County, TX	1,825,502	2,009,324	10.1											
Kendall County, TX	37,361	44,279	18.5											
San Antonio-New Braunfels, TX MSA	2,286,702	2,558,143	11.9											
Texas	26,538,614	29,145,505	9.8											
	, , , , ,													

The AA population growth between 2015 and 2020 is comparable to the statewide rate.
 While population growth in Bexar County mirrors the AA and the statewide rates, Kendall County experienced a significant increase in population, at a 18.5 percent, during the same period.

Table 56

Median Far Assessment Area	mily Income Chan : San Antonio Me		
Area	2015 Median Family Income	2020 Median Family Income	Percentage Change
San Antonio Metropolitan AA	65,503	70,666	7.9
Bexar County, TX	64,842	70,280	8.4
Kendall County, TX	96,812	117,734	21.6
San Antonio-New Braunfels, TX MSA	67,989	74,284	9.3
Texas	68,523	76,073	11.0
Source: 2011-2015 U.S. Census Bureau: America 2016-2020 U.S. Census Bureau: America Note: Median family incomes have been inflation	an Community Survey	pressed in 2020 dollars.	

- While the AA's MFI increased at a lower rate than the state of Texas' MFI between 2015 and 2020, Bexar County's MFI grew at a comparable rate. Conversely, Kendall County's MFI grew significantly, at a 21.6 percent, almost doubling the statewide percentage change during the same period.
- The 2020 MFI in Kendall County exceeds the MFI for the AA and the state by at least \$40,000. It is noteworthy that only 2.6 percent of the AA families reside in Kendall County, limiting the impact in the AA MFI.
- According to 2020 FFIEC data, 11.6 percent of AA families live below the poverty level. In contrast, only 3.0 percent of Kendall County's families live below the poverty level.

l able 57														
	Housing Cost Burden													
Assessment Area: San Antonio Metropolitan														
Cost Burden - Renters Cost Burden - Owners														
Area	Low	Moderate	All	Low	Moderate	All								
	Income	Income	Renters	Income	Income	Owners

Texas 77.4 42.4 42.4 57.5 30.9 19.2														
Cost burden is housing cost that equals 30 percent or more of household income. Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy														

- Housing affordability within the AA for low-income renters is a substantially greater burden than the burden on homeowners at any other level.
- The cost burden for LMI renters is lower in Kendall County, with a median gross rent of \$1,278, than the Bexar County and the statewide cost burden.
- The AA median housing value, at \$173,821, is below the statewide, at \$187,200. Kendall County's median housing value, at \$378,500, significantly exceeds the AA and state of Texas housing values.

Table 58

Unemployment Rates													
Assessment A	rea: San Aı	ntonio Met	tropolitan										
Region 2018 2019 2020 2021 2022													
San Antonio Metropolitan AA	3.4	3.1	7.6	5.3	5.3								
Bexar County, TX	3.4	3.2	7.6	5.4	5.4

Texas	3.9	3.5	7.7	5.7	3.9								
Source: Bureau of Labor Statistics: Local Area L	Inemployment	Statistics		•									

- Unemployment rates for the AA and Bexar County between 2018 and 2021 are comparable to the statewide rate. However, Kendall County's unemployment rates are consistently below the statewide during the same period.
- Unemployment rates almost doubled in 2020 due to the COVID-19 pandemic, as many businesses laid off employees due to the statewide stay at home and social distancing orders. While AA unemployment rates stabilized in 2021 and 2022, they have not reached pre-pandemic rates levels. The statewide unemployment rates reached pre-pandemic levels in 2022.
- Major employment industries within the AA include accommodation and food services, healthcare and social assistance, and retail trade.

Table 59 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

Comerica's Lending Test performance in the AA is good. The bank's small business lending generally carried more weight, as this product comprised the largest volume of lending in the AA. The bank's home mortgage lending activity was evaluated as a whole given the insufficient volume by sub-products to conduct a meaning analysis.

Details of the bank's 2020 mortgage and small business lending and corresponding aggregate data can be found in Appendix C.

Lending Activity

The bank's lending activity in the San Antonio Metropolitan AA reflects good responsiveness to AA credit needs. Comerica makes use of innovative and/or flexible lending practices to serve AA credit needs, including LMI borrowers. The bank originated 84 home mortgage and 351 small business loans in the AA between January 1, 2020, and December 31, 2022. These volumes represent 2.7 percent of the HMDA-reportable loans and 4.2 percent of the CRA-reportable loans in the state of Texas during the review period. Comerica sustained a constant volume of home mortgage lending between 2020 and 2022; however, the volume of small business lending significantly decreased year after year. The reduction in small business lending is primarily attributed to the cessation of the SBA's PPP in May 2021 and rising interest rates in 2022. It is noteworthy that the level of home mortgage lending has not been adversely impacted by the interest rate hikes. This level of lending reflects favorably on the bank as it aligns with the bank's strategic focus on small business lending.

Geographic Distribution of Loans

Comerica's geographic distribution of lending reflects excellent penetration throughout the AA. The distribution of home mortgage and small business lending is consistent with the overall conclusion, reflecting excellent penetration among geographies of different income levels, especially LMI census tracts. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about the bank's performance in LMI geographies. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects excellent penetration throughout the AA. The distribution of 2020 and 2021 home mortgage loans among low-income census tracts exceeds aggregate data and the demographic figure, though the bank did not make any loans in low-income census tracts in 2022. The distribution of the bank's home mortgage lending in moderate-income census tracts is also well above aggregate data and comparable to demographic figures in each year of the review period.

Small Business Lending

The geographic distribution of small business loans reflects excellent penetration throughout the AA when compared to demographics and the performance of the aggregate lenders. While the volume of small business lending decreased year after year during the review period, the distribution of small business loans among low-income census tracts consistently exceeds aggregate data and the demographic figure. Additionally, the bank's small business lending in moderate-income census tracts generally exceeds aggregate data and the demographic figure. Comerica's 2021 performance in moderate-income tracts declined slightly but remained comparable to both figures. This performance reflects favorably on the bank's responsiveness to the credit needs of small businesses in the AA.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to borrowers reflects a good penetration among individuals of different income levels and businesses of different revenue sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the AA is excellent when compared to demographic characteristics and the performance of aggregate lenders. The bank's 2021 and 2022 lending to low-income borrowers significantly exceeds aggregate data and is comparable to the demographic figure, reflecting improvement from its 2020 performance.

The bank's lending to moderate-income borrowers improved year after year. In 2020, the bank's performance is below aggregate and demographic data. While Comerica's 2021 performance is comparable to aggregate and demographic data, it significantly exceeds both figures in 2022. The shift in performance is especially notable given the rising interest rate environment in 2022.

The bank's 2020 lending performance exceeds aggregate data and is significantly below the demographic figure. However, this has limited impact in rating the bank's performance, as aggregate data serves as a better proxy for loan demand.

Small Business Lending

The borrower distribution of small business loans by revenue size of businesses is good. The 2022 loan distribution to businesses with revenues of \$1 million or less is below the percentage of small businesses in the AA and aggregate data by number of originations; however, Comerica's performance by dollar amount is comparable to aggregate data. This is reflective of the bank's willingness to lend larger sums to small businesses. Moreover, aggregate data serves as a better indicator for loan demand than the demographic figure.

In 2021, the bank's lending to businesses with annual revenues of \$1 million or less is comparable to aggregate lending performance, but well below the demographic figure. Conversely, Comerica's lending performance in 2020 reflected penetration levels greater than 2021 and 2022, originating a significantly larger portion of small business loans to businesses with revenues of \$1 million or less than aggregate lenders. It is noteworthy that Comerica's number volume of small business loans has decreased by 69.1 percent between 2020 and 2022, but only 23.8 percent by dollar amount. This declining performance is primarily attributed to the cessation of the SBA's PPP in May 2021 and rising interest rates in 2022.

Community Development Lending

Note: Percentages may not total 100.0 percent due to rounding.

The bank makes a relatively high level of CD loans in the AA, originating a total of 14 qualifying CD loans, totaling \$47.5 million. Since the previous evaluation, the bank substantially increased the dollar amount of CD loans by 90.9 percent. The majority of the CD loans were extended for the purpose of economic development, focusing on financing small businesses and supporting permanent job creation or retention or improvement for LMI persons or in LMI geographies. Examples of the bank's CD lending activities that were considered responsive to the credit needs in the AA include:

- A \$15 million line of credit extended to a small business that processes and distributes nuts, seeds, dried fruit, and snack mixes. Funds expected to support ongoing business operations and permanent jobs for LMI employees.
- A \$638,000 line of credit extended to a small business to expand its car wash operations and support permanent jobs for LMI employees.

INVESTMENT TEST

The bank's performance under the Investment Test in the AA is good. Comerica is occasionally in a leadership position given its significant level of qualified CD investments and grants, particularly those not routinely provided by private investors. The bank makes significant use of innovative or complex investments to support CD initiatives and exhibits good responsiveness to AA needs. The bank's overall dollar amount of CD investments and grants significantly increased by 28.7 percent since the previous evaluation while the number volume decreased by 31.0 percent. Comerica's investments primarily focused on affordable housing, which reflects good responsiveness as community contacts emphasized the need for affordable housing in the AA.

Table 65 illustrates the breakdown of the bank's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the review period, and CD donations made since the previous evaluation. Examples of notable investment and donation activities that reflect Comerica's efforts to meet the CD and credit needs of the AA include:

- A \$250,000 equity investment to a CDFI that provides access to capital for small businesses in the AA.
- A \$5.9 million investment in LIHTC-eligible funds for the construction or preservation of rent-restricted units for LMI individuals.

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

Comerica's delivery systems are accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of the bank's six branch offices and six ATMs as of April 1, 2023, was compared to the distribution of the households and businesses among the income tract categories within the AA. Table 66 summarizes the bank's retail locations in the AA.

Book value of investment

² Original market value of investment

Table 66

	Branch and Full-Service ATM Locations Assessment Area: San Antonio Metropolitan										
Tract											
Income	Geographies	Households	Businesses	#	%	#	%

Total	100.0	100.0	100.0	6	100.0	6	100.0				

The bank did not open or close any branches in the AA during the review period. Banking services and hours of operations do not vary the AA, particularly in LMI geographies or to LMI individuals.

Community Development Services

The bank provides an adequate level of CD services in the AA. Comerica's employees served six organizations, offering 22 community services that aided LMI individuals for a total of 67 hours. This level of CD services represents an improvement from the previous evaluation, with an 146.3 percent increase in the number of hours rendered. Examples of services performed by bank employees include:

- Serving on the board of directors of a nonprofit that unites communities to identify and solve relevant CD issues, such as financial education and affordable housing.
- Providing over 17 hours of financial education to LMI youth.

METROPOLITAN ASSESSMENT AREAS (LIMITED-SCOPE REVIEW)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN LIMITED-SCOPE TEXAS METROPOLITAN ASSESSMENT AREAS

The bank's branch operations and deposit market share for each metropolitan AA receiving a limited-scope review were determined as of April 1, 2023, and June 30, 2022, respectively.

Austin Metropolitan AA

- The Austin Metropolitan AA is comprised of the entirety of Travis and Williamson counties which, along with Bastrop, Caldwell, and Hays counties (excluded from the AA) make up the Austin-Round Rock-Georgetown, TX MSA.
- The AA is comprised of 425 census tracts, including 27 low-, 100 moderate-, 142 middle-, 140 upper-, and 16 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 1,899,205, which reflects a 19.1 percent increase from the 2015 ACS data.
- The AA includes 416,236 families, 20.4 percent are low-, 16.8 percent moderate-, 20.8 percent middle-, and 42.0 percent are upper-income.
- o The bank operated ten branches, representing 2.5 percent of its branches.
- Comerica held \$1.5 billion in deposits, representing a market share of 2.2 percent and 1.9 percent of the bank's total deposits.

Houston Metropolitan AA

- The Houston Metropolitan AA is comprised of the entirety of Brazoria, Fort Bend, Galveston, Harris, and Montgomery counties which, along with Austin, Chambers, Liberty, and Waller counties (excluded from the AA) make up the Houston-The Woodlands-Sugarland, TX MSA.
- The AA is comprised of 1,562 census tracts, including 215 low-, 385 moderate-, 408 middle-, 505 upper-, and 49 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 6,897,080, which reflects a 12.0 percent increase from the 2015 ACS data.
- The AA includes 1,650,859 families, 23.6 percent of which are low-, 16.6 percent moderate-, 17.8 percent middle-, and 42.0 percent are upper-income.
- o The bank operated 41 branches, representing 10.0 percent of its branches.
- Comerica held \$3.9 billion in deposits, representing a market share of 1.0 percent and 5.3 percent of the bank's total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix D contains detailed performance and demographic information reviewed for the limited-scope AAs. Table 67 discusses conclusions regarding the bank's performance.

Table 67

Assessment Area	Lending Test	Investment Test	Service Test
Austin Metropolitan AA	Consistent	Below	Consistent
Houston Metropolitan AA	Consistent	Consistent	Consistent

The institution's lending, investment, and service performance in the areas is generally consistent with Comerica's lending, investment, and service performance in the state.

NONMETROPOLITAN ASSESSMENT AREA (LIMITED-SCOPE REVIEW)

DESCRIPTION OF OPERATIONS

Comerica Bank

Dallas, Texas

Bank of the Hills Nonmetropolitan AA

- The Bank of the Hills Nonmetropolitan AA is comprised of the entirety of Kerr County.
- The AA is comprised of 14 census tracts, including two moderate-, six middle-, and six upper-income tracts.
- Based upon 2020 ACS data, the AA population was 52,598, which reflects a 4.9 percent increase from the 2015 ACS data.
- The AA includes 14,712 families, 17.6 percent are low-, 17.8 percent moderate-, 19.0 percent middle-, and 45.6 percent are upper-income.
- As of April 1, 2023, the bank operated three branches, representing 0.7 percent of its branches.
- As of June 30, 2022, Comerica held \$193.2 million in deposits, representing a market share of 10.7 percent and 0.3 percent of the bank's total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix E contains detailed performance and demographic information reviewed for the limited-scope AAs. Table 68 summarized the conclusions regarding the bank's performance.

Table 68

Assessment Area	Lending Test	Investment Test	Service Test	
Bank of the Hills Nonmetropolitan AA	Below	Below	Below	

The institution's lending, investment, and service performance in the AA is below Comerica's performance in the state; however, it does not affect the rating for the state.

STATE OF CALIFORNIA

CRA RATING FOR CALIFORNIA: Satisfactory

The Lending Test is Rated: High Satisfactory
The Investment Test is Rated: Outstanding
The Service Test is Rated: High Satisfactory

Major factors supporting the institution's rating include:

- Lending activity reflects good responsiveness to the AAs credit needs.
- The geographic distribution of loans reflects good penetration throughout the AAs.
- The distribution of loans among individuals of different income levels and businesses of different revenue sizes is adequate.
- Comerica is a leader in making CD loans.
- The bank has a good record of serving the credit needs of low-income individuals and areas as well as very small businesses.
- The bank makes use of innovative and/or flexible lending practices in serving AAs' needs.
- Comerica is often in a leadership position given its excellent level of qualified CD investments and grants.
- The bank makes occasional use of innovative and/or complex investments to support CD initiatives.
- Comerica exhibits good responsiveness to credit and CD needs.
- Delivery systems are reasonably accessible to individuals of different income levels throughout the bank's AAs.
- The record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals.
- Services do not vary in a way that inconveniences the bank's AAs, particularly LMI geographies and/or LMI individuals.
- Comerica provides a relatively high level of CD services.

SCOPE OF THE EVALUATION

The scope of the review for the state of California is consistent with the overall scope for the institution, including evaluations under the lending, investment, and service tests. The time period and products evaluated for this state are also unchanged from the scope discussed in the Institution section of this report.

Three of the eight AAs in the state of California were reviewed using full-scope procedures.

- Greater Los Angeles AA
- Salinas MSA AA
- San Jose Metropolitan AA

The remaining five AAs received limited-scope reviews.

- Inland Empire MSA AA
- San Diego MSA AA
- San Francisco Bay Metropolitan AA
- Santa Cruz MSA AA
- Ventura MSA AA

AAs were selected for full-scope reviews based on the strategic importance of the AA, considering volume of lending, number of branches, and percentage of total deposits, as well as the length of time since the AA last received a full-scope review. Overall, approximately 58.8 percent of the bank's lending activity by number of loans, 62.5 percent of the total deposits, and 56.5 percent of total branches within the state of California were evaluated through the full-scope reviews. The bank's performance in the Greater Los Angeles AA was given greater consideration as it is a strategic focus of the institution and represents the majority of the bank's activity in the state. The Salinas MSA AA was given the least consideration based upon the AA's size and the bank's limited presence and activity in the AA relative to other full-scope AAs.

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN CALIFORNIA

The bank delineates eight of its 27 AAs and operates 92 of its 409 branches in the state of California. As of June 30, 2022, the bank had approximately \$25.2 billion in deposits in the state, representing 32.8 percent of total deposits. According to the June 30, 2022, FDIC Summary of Deposits, the bank had a deposit market share of 1.2 percent and ranked 13th out of 183 FDIC-insured financial institutions across the state.

Of the 20,205 HMDA-reportable loans and 35,231 small business loans originated and purchased by Comerica during the review period, 7,520 HMDA-reportable loans (37.2 percent) and 7,193 small business loans (20.4 percent) were extended in the California AAs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's lending test performance in the state of California is High Satisfactory. The lending test conclusions in the Greater Los Angeles MSA and San Jose Metropolitan AAs are considered good, which is consistent with the overall state rating, while the Lending Test conclusion in the Salinas Metropolitan AA is adequate. Overall, Comerica's performance in the AAs receiving limited-scope reviews support the state rating.

Lending Activity

The bank's lending activities in the state of California reflect good responsiveness to the credit needs of its AAs. The bank makes use of innovative and/or flexible lending programs through its participation in numerous industry-recognized, government-guaranteed programs, including the origination of 5,026 SBA loans and 1,266 small business micro loans within the state of California.

As outlined in Table 69, this evaluation considered 14,887 loans totaling \$4.4 billion. The loan products and origination volumes appear consistent with the credit needs of the bank's California AAs. The number of small business and HMDA loans extended by the bank was compared against the number of loans made by aggregate lenders in the area during the review period. The bank ranked 38th out of 353 CRA reporters in its California AAs and 53rd of 1,035 HMDA reporters.

Table 69

Summary of Lending Activity – January 1, 2020 through December 31, 2022 California Assessment Areas										
Loan Type # % \$000s %										
Home Purchase	304	2.0	211,861	4.8						
Refinancing	1,535	10.3	848,692	19.3

Multifamily	29	0.2	404,131	9.2						
Other Purpose Lines of Credit	1,932	13.0	514,044	11.7						
Other Purpose Closed-End/Exempt	45	0.3	122,896	2.8						
Total HMDA-Related	7,520	50.5	2,935,076	66.7						
Total Small Business	7,193	48.3	1,451,923	33.0						
Total Small Farm	174	1.2	14,796	0.3						
TOTAL LOANS	14,887	100.0	4,401,795	100.0						

Geographic Distribution of Loans

The overall geographic distribution of lending within the state of California reflects good penetration throughout the bank's AAs. This performance is consistent across the bank's Greater Los Angeles and San Jose Metropolitan AAs, while the geographic distribution of lending in the Salinas Metropolitan AA is adequate.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's overall lending reflects adequate penetration among individuals of different income levels and businesses of different sizes. This performance is consistent across the bank's Greater Los Angeles, Salinas Metropolitan, and San Jose Metropolitan AAs. A detailed discussion of the facts and data supporting the overall conclusions are presented in the Conclusions with Respect to Performance Criteria section for each AA.

Community Development Lending

The bank is a leader in making CD loans in the state of California. As reflected in Table 70, the bank originated 361 CD loans totaling approximately \$1.9 billion within the state, which comprises 26.8 percent of overall bank-wide CD loan volume by number and 35.0 percent by dollar amount. The level of CD lending was excellent in the Greater Los Angeles MSA AA, adequate in the Salinas MSA AA, and good in the San Jose Metropolitan AA. Additionally, it is noted that approximately 30 percent of the bank's CD lending occurred in the California AAs that received a limited-scope review at this evaluation.

The bank's total California CD loans increased notably since the previous evaluation. Overall, the number of qualified loans grew by 36.7 percent since the previous evaluation, while the dollar amount of CD lending grew by more than 233.3 percent. This growth occurred despite the substantial decrease in loans originated through the SBA's PPP, which made up approximately half of the bank's CD loans during the previous evaluation period.

CD loans originated by the bank during the evaluation period were extended for a variety of purposes, as noted in the table below. Specific details regarding the CD lending can be found in the Conclusions with Respect to Performance Tests section for each AA.

Table 70

Community Development Lending California Assessment Areas								
Purpose # \$(000s)								
Affordable Housing	57	215,347						
Community Services	36	97,208						
Economic Development	223	1,521,675						
Revitalization and Stabilization	45	36,061						
Total	361	1,870,291						

INVESTMENT TEST

The bank's performance under the Investment Test in the state of California is Outstanding. The investment test conclusions in the bank's Greater Los Angeles MSA AA are considered excellent, which is consistent with the overall state rating. In the bank's San Jose Metropolitan AA, the bank's performance is good, and in the Salinas MSA AA, the bank's investment test performance is adequate. Generally, the bank's performance in its AAs that received limited-scope reviews is consistent with the overall performance in the state of California.

The bank has an excellent level of qualified CD investments and grants and is often in a leadership position. While Comerica makes occasional use of innovative and/or complex investments, the bank exhibits good responsiveness to the credit and CD needs of its AAs. As illustrated in Table 71, the bank maintains an increased balance of prior period investments, the substantial majority of which are comprised of Low-Income Housing Tax Credit funds, compared to current period investments. While the level of the bank's CD investments and donations to area organizations that support community services for LMI individuals represent a smaller dollar amount, the breadth of impact reflects favorably on the bank's responsiveness to this category of CD needs. In the state of California, the bank made qualifying CD donations to more than 140 distinct community organizations across it's delineated AAs, each of which serves a unique subset of individuals and extending the reach of the bank's CD funds.

Details regarding investments and donations in each of the bank's California AAs can be found in the Conclusions with Respect to Performance Tests section for each AA. In addition to the investments made within the bank's delineated AAs, the bank also made several investments in the broader statewide or regional area. These investments included, notably, more than \$5 million worth of deposits in minority-owned financial institutions serving the region.

SERVICE TEST

The bank's performance under the Service Test in the state of California is High Satisfactory. While the Service Test conclusion in the Greater Los Angeles MSA is excellent, Comerica's performance in the Salinas MSA and the San Jose Metropolitan AAs are good, which is consistent with the overall state rating. Generally, the bank's performance in its AAs that received limited-scope reviews is consistent with the performance in the full-scope review areas and the state.

Retail Services

Branch locations and alternative delivery systems, such as drive-through facilities and online and mobile banking, are reasonably accessible to the bank's various geographies and to individuals of different income levels in each AA. Of the bank's 92 full-service offices in the state of California, 17 are located in LMI tracts. Additionally, the bank operates 22 of its 108 full-service ATMs in LMI tracts. The bank's record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly in LMI areas or to LMI individuals.

Refer to Table 72 below for the distribution of California banking offices and full-service ATMs by income level of geographies.

The bank's products, services, and business hours do not vary in a way that inconveniences its AAs, particularly LMI geographies and/or LMI individuals. The bank's operations and product and service offerings in the state generally mirror that of the overall institution, which is described in the overall Retail Banking Services section of this evaluation.

Branch and Full-Service ATM Locations California Assessment Areas % of % of % of **Branches Full-Service ATMs Tract** Geographies Households Income **Businesses** # # % % 2 2 Low 6.2 5.3 4.0 2.2 1.9 Moderate 24.4 25.9 19.2 15 16.3 20 18.5 Middle 32.9 33.9 31.7 34.8 32 39 36.1 32.7 35.3 41 44.6 45 41.7 Upper 42.9 Unknown 2.3 2.2 2 2.1 2 1.8 1.1 **Total** 100.0 100.0 100.0 92 100.0 108 100.0

Table 72

Community Development Services

The bank provides a relatively high level of CD services in its California AAs. This conclusion is consistent across all California AAs. Bank representatives provided 1,199 CD services, totaling 3,880 hours, to 122 unique organizations within the state of California. This represents approximately 17.1 percent of the bank's total CD services, while 14.6 percent of the bank's 7,382 employees are located in California. Details regarding CD services can be found in the respective Conclusions with Respect to Performance Tests section for each AA.

GREATER LOS ANGELES MSA ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE GREATER LOS ANGELES MSA ASSESSMENT AREA

- The bank's Greater Los Angeles MSA AA consists of the entirety of the Los Angeles-Long Beach-Anaheim, CA MSA. Refer to Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is made up of 3,112 census tracts, of which 5.7 percent are designated as low-income, 27.5 percent are moderate-income, 29.8 percent are middle-income, 34.4 percent are upper-income, and 2.6 percent are designated as unknown-income.
- Following the 2020 U.S. Census, 183 new census tracts were drawn within the AA, representing a 6.2 percent increase. Additionally, the income level designations of many existing census tracts changed, resulting in a reduction of LMI geographies of 5.1 percent between 2021 and 2022. It is noteworthy that the number of low-income geographies decreased by 33.1 percent.
- The bank operates 36 full-service branches in the AA, including six branches in moderateincome, ten in middle-income, 19 in upper-income census tracts, and one branch in an unknown-income tract.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 1.3 percent market share, ranking 15th out of 109 FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 46th out of 881 HMDA reporters in the AA with 1,217 HMDA originations and purchases, and 42nd out of 286 CRA reporters with 549 CRA small business loans.
- Community contacts identified affordable housing, homelessness, small business lending, and small business financial literacy as credit and CD needs in the AA.

Source: 2011-2015 U.S. Census Bureau: American Community Survey 2016-2020 U.S. Census Bureau: American Community Survey									

• The AA MFI grew at a rate comparable to the state, with Orange County reflecting an MFI greater than \$100,000 in 2020.

Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.

 Los Angeles County has the lowest MFI between 2015 and 2020; however, it reported the largest growth at 17.2 percent.

Table 75

Housing Cost Burden Assessment Area: Greater Los Angeles MSA									
	Cost	Burden - Re	enters	Cost	Burden – Ov	urden – Owners			
Area	Low Income	Moderate Income	All Renters	Low Income	Moderate Income	All Owners			
Greater Los Angeles MSA AA	81.1	47.1	52.7	66.7	47.5	32.7			
Los Angeles-Long Beach-Glendale, CA MD Los Angeles County	80.9	45.4	52.8	68.0	48.0	33.7

California	80.6	50.9	50.0	65.9	46.8	29.5			

Cost burden is housing cost that equals 30 percent or more of household income.

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

- Overall, the cost burden for homeowners and renters in the AA is higher than the statewide
 rates for all LMI segments other than moderate-income renters, which is comparable.
 While housing affordability within the AA is a noted problem, this is especially true for lowincome renters who face substantially greater burden than homeowners at any other level.
- The AA median housing value is \$641,000 and the median rent is \$1,625. Moreover, 45.7 percent of the housing units in the AA are owner-occupied and 48.1 percent are rental. Conversely, the state of California has more owner-occupied units, at 51.0 percent, and less rental units, at 41.3 percent.
- A community contact indicated that the AA is significantly impacted by homelessness and housing-overcrowding, which occurs when the number of occupants exceeds the capacity of the dwelling. The overcrowding issue, which is attributed to a unique combination of low-wage jobs and high-cost housing, has impacted the AA for over three decades.

Table 76

Unemployment Rates Assessment Area: Greater Los Angeles MSA								
Region	2018	2019	2020	2021	2022			
Greater Los Angeles AA	4.2	4.0	11.5	8.2	4.5			
Los Angeles-Long Beach-Glendale, CA MD Los Angeles County	4.6	4.4	12.3	8.9	4.9			
Anaheim-Santa Ana-Irvine, CA MD Orange County	3.0	2.8	9.0	6.0	3.2			
California	4.3	4.1	10.2	7.3	4.2			
Source: Bureau of Labor Statistics: Local Area Unemployme	nt Statistics	•	•	•				

- Unemployment rates almost tripled in 2020 due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the AA unemployment rate stabilized and returned to pre-pandemic levels.
- A community contact noted that a substantial number of small businesses within the AA with less than 20 employees were adversely impacted by the COVID-19 pandemic.
- Major employment industries within the AA include healthcare and social assistance, professional and technical services, and retail trade.

Table 77 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the Greater Los Angeles MSA AA is good. For this evaluation, the bank's home mortgage and small business lending carried equal weight, as Comerica extended a similar volume of these products during the review period. Additionally, multifamily, other purpose closed/exempt, and loan purpose not applicable lending products were not evaluated separately from the evaluation of the bank's home mortgage lending.

Details of the bank's 2020 mortgage and small business lending and information regarding lending by aggregate lenders can be found in Appendix C.

Lending Activity

The bank's lending activity in the Greater Los Angeles MSA AA reflects good responsiveness to AA credit needs. The bank makes use of innovative and/or flexible lending practices to serve AA credit needs, including LMI borrowers. During the review period, the bank demonstrated flexible lending practices through its participation in numerous industry-recognized, government-guaranteed lending programs. It is noteworthy that Comerica extended \$767 million through 2,252 SBA loans and 588 small business micro loans.

During the review period, the bank originated 3,357 home mortgage and 3,072 small business loans. While the number of home mortgage loans increased year after year between 2020 and 2022, the volume of small business loans decreased by 64.1 percent during the same period of time. The significant reduction in small business lending is primarily due to the conclusion of the SBA's PPP in May 2021 and rising interest rate environment. Loan products and origination volumes are consistent with the credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

For this analysis, the geographic distribution of small business lending and HMDA lending, including both originations and purchases, was compared to available demographic and aggregate data. Aggregate lending serves as a better proxy for loan demand than the demographic figure when evaluating the bank's geographic distribution. The bank's geographic distribution of loans reflects good penetration throughout the AA. There were no significant gaps or lapses in contiguous geographies noted.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage loans in the AA is adequate. The distribution of 2021 and 2022 home mortgage loans among low-income census tracts is comparable to aggregate data and the percentage of owner-occupied units in these tracts. The penetration of the bank's HMDA lending in moderate-income census tracts is below aggregate data and the demographic figure.

The bank's lending performance for 2020 reflected penetration levels consistent with those of 2021 and 2022, with a distribution of loans to LMI tracts that was comparable to aggregate data but below the demographic figure.

Home Purchase Lending

The geographic distribution of home purchase lending is excellent. The distribution of these loans by number among low-income census tracts was above aggregate data and the demographic figure in 2021 and comparable to both data points in 2022. Distribution of home purchase loans among moderate-income census tracts was significantly above the aggregate data and the demographic figure in 2021 and 2022. The bank originated almost double the percentage of home purchase loans in moderate-income census tracts compared to the performance of aggregate data.

The bank's lending performance by number volume in 2020 reflected penetration levels consistent with 2021 and 2022 performance in LMI census tracts, though performance in 2020 by dollar amount was below the aggregate.

Home Refinance Lending

The geographic distribution of home refinance lending is good. The distribution of 2021 and 2022 home refinance loans among low-income census tracts is comparable to aggregate data and the demographic figure. The penetration level of the bank's 2022 home refinance lending among moderate-income census tracts is comparable to the aggregate data and the demographic figure, while in 2021, the bank performed well above aggregate data. Opportunities for home refinance lending, particularly in low-income census tracts, were limited due to the substantial increase in interest rates in 2022.

Home Improvement Lending

The geographic distribution of home improvement lending is adequate. The distribution of home improvement loans among low-income census tracts is comparable to aggregate data and the demographic figure. The bank's performance improved between 2021 and 2022 but remained close to aggregate performance.

In moderate-income census tracts, the distribution of the bank's 2021 home improvement lending is comparable to aggregate lending performance, but below the demographic figure. The bank's performance declined slightly between 2021 and 2022, with the distribution level of 2022 home improvement loans below both the aggregate data and the demographic figure.

The bank's lending performance for 2020 reflected penetration levels consistent with 2022, with a distribution of loans to low-income tracts that was comparable to aggregate data and a distribution of loans to moderate-income tracts that was below the aggregate.

Other Purpose Lines of Credit Lending

The geographic distribution of other purpose lines of credit is adequate. The 2021 loan distribution among low-income census tracts is comparable to aggregate data but below the percentage of owner-occupied units in these tracts, while the 2022 loan distribution in these tracts is above aggregate data and comparable to the demographic figure. The bank's 2020 performance in low-income tracts is comparable to both aggregate and demographic data.

Comerica Bank Dallas, Texas

In moderate-income census tracts, the loan distribution is slightly below the aggregate data, with the bank's performance decreasing in 2022 after being comparable in 2020 and 2021. However, the bank's performance in the three years is below the demographic figure. Greater weight was placed on the bank's performance in comparison to aggregate lenders', as aggregate data is a better indicator of loan demand.

Small Business Lending

The geographic distribution of small business loans reflects excellent penetration throughout the Greater Los Angeles MSA AA. The distribution of 2022 small business loans among LMI census tracts are above aggregate data and the percentage of businesses located in these tracts. While the 2021 lending in low-income census tracts mirrors the 2022 performance, the lending in moderate-income census tracts is comparable to aggregate data and the demographic figure.

The bank's lending performance for 2020 reflected penetration levels that were below 2021 and 2022 performance, with distribution among low-income census tracts comparable to aggregate data and the demographic figure, and distribution among moderate-income census tracts below both metrics. The improvement in the bank's performance in LMI geographies in 2021 and 2022 is attributed to Comerica's strategic focus on leveraging its commercial lending expertise to meet the needs of small businesses in the AA even through interest rates hikes.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to borrowers reflects an adequate penetration among individuals of different income levels and businesses of different sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the Greater Los Angeles MSA AA is adequate. The bank's 2021 and 2022 lending to LMI borrowers is slightly below aggregate data and well below the demographic figure. The bank's lending performance in 2020 is consistent with that of 2021 and 2022.

The bank's performance decreased slightly in 2022, coinciding with hikes in interest rates which made mortgage loans more expensive. Additionally, 2022 median housing values were substantially higher than the national median values, further exacerbating difficulties faced by lower-income borrowers in qualifying for mortgage loans. As a result, neither then bank's performance nor aggregate data aligns with the demographic figures.

Small Business Lending

Comerica's borrower distribution of small business loans to businesses of different revenue size is adequate. The 2021 and 2022 loan distribution to businesses with annual revenues of \$1 million or less by volume of originations is below the aggregate data and significantly below the percentage of small businesses in the AA. Though the percentage of originations to small businesses in 2021 was below aggregate, the dollar amount of loans was comparable to aggregate data, which is reflective of Comerica's willingness to lend larger sums to small businesses.

The bank's lending performance in 2020 reflected penetrations levels greater than 2021 and 2022, originating a larger portion to businesses with revenues of \$1 million or less than aggregate lenders. Comerica's originations of small business loans decline year after year between 2020 and 2022, as well as the volume of originations to borrowers with unknown revenue. The decline in small business loan originations is partly attributed to the rise of interest rates.

Community Development Lending

The bank is a leader in making CD loans in the AA. During the review period, Comerica originated 166 CD loans totaling \$1.1 billion in the Greater Los Angeles MSA AA, making up 12.3 percent of bank-wide CD loan volume by number and 19.9 percent by dollar amount. The number and dollar amount of CD loans originated in the AA increased significantly by 45.6 percent and 330.0 percent, respectively, since the previous evaluation. Despite the substantial decrease in loans originated through the SBA's PPP since the prior evaluation, this substantive increase in number and dollar amount is reflective of the bank's focus on identifying CD opportunities and being responsive through qualified activities.

The largest portion of the bank's CD lending in the AA is comprised of loans that promote economic development by financing small businesses and supporting permanent job creation, retention, or improvement for LMI persons or in LMI geographies. Examples of the bank's CD lending activities that are responsive to the AA credit needs include:

- A \$60 million line of credit to an apparel manufacturer, providing for the retention and improvement of more than 300 LMI jobs.
- A \$25 million line of credit to the largest after-school program in southern California, which
 delivers nationally recognized expanded learning and school improvement programs
 through more than 400 schools to over 200,000 students, 80 percent of which are LMI.
- A \$17 million loan for the construction of 53 studio apartments serving special needs, homeless veterans, and chronically homeless individuals. The program serves lowincome individuals, earning less than 30 percent of the area median income, providing a full range of supportive services including employment training, educational services, and

transportation. This loan was originated in conjunction with a LIHTC investment provided by the bank, increasing the overall financial commitment. This loan particularly reflects favorably on the bank, as community contacts noted housing over-crowding and housing affordability as a significant need in the AA.

 Twenty-five loans totaling \$20.9 million originated through the SBA's PPP in response to the ongoing effects of the COVID-19 pandemic, which continued to impact the nation during the early portion of the review period for this evaluation.

Total	166	1,062,036								

INVESTMENT TEST

Comerica's performance under the Investment Test in the Greater Los Angeles MSA AA is excellent. The bank has an excellent level of qualified CD investments and grants, particularly those not routinely provided by private investors, which often positions it as a leader in the AA. Since the prior evaluation, the dollar amount of CD investments and grants made in the AA has increased by 30.4 percent despite the number of individual investments and grants decreasing by 43.4 percent. The bank makes occasional use of innovative and/or complex investments and exhibits good responsiveness to the AA credit and CD needs.

Table 83 illustrates the breakdown of the bank's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the current evaluation period, and CD donations made since the previous evaluation. Examples of CD investment and donation activities include:

- A \$2 million investment in a small business investment company, with funds targeted to serve low-income communities within the bank's Greater Los Angeles MSA AA, as well as women- and minority-owned small businesses. This investment reflects favorably on the bank, as a community contact noted a need for financial institutions to invest in intermediaries who extend loans to eligible small businesses.
- A \$500,000 investment in a business development center serving the AA through flexible business solutions including targeted education and small business loan programs.
- A \$7.5 million LIHTC investment in the construction of 53 studio apartments serving special needs, homeless veterans and chronically homeless individuals, a project for which the bank also provided a \$17 million loan.
- Three recurring donations totaling \$300,000 to a local organization's Emergency Economic Fund and Workforce Emergency Response Fund. The economic fund provides food vouchers, housing support, and technology to the most vulnerable AA families, while the workforce fund provides direct training to low-income workers who were negatively impacted by the COVID-19 pandemic.

SERVICE TEST

The bank's Service Test performance is excellent.

Retail Services

Comerica's delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of the bank's 36 branch offices and 41 ATMs as of April 1, 2023, was compared to the distribution of the population and businesses among the tract categories within the AA. Table 84 summarizes the bank's retail locations in Greater Los Angeles MSA AA.

Table 84

	Branch and Full-Service ATM Locations Assessment Area: Greater Los Angeles MSA												
Tract % of % of Branches Full-Service ATMs													
Income	Geographies												
Low	5.7	4.9	3.5	0	0.0	0	0.0						
Moderate	27.5	25.7	19.3	6	16.7	8	19.5						
Middle	29.8	30.1	28.0	10	27.8	13	31.7						
Upper	34.4	38.2	46.7	19	52.8	19	46.3						
Unknown	2.6	1.2	2.5	1	2.8	1	2.4						
Total	100.0	100.0	100.0	36	100.0	41	100.0						

The bank closed two branches in the AA: one in a middle-income census tract and one in an unknown-income geography. The bank's record of opening or closing branches has not adversely affected the accessibility of its delivery systems, including to LMI geographies. Banking services and hours of operations are tailored to the convenience and needs of the AA, particularly in LMI geographies or to LMI individuals.

Products and services are uniformly offered in all branches within the AA. Hours of operation for AA branches vary slightly, based upon transaction volume and demographic needs. Of the six branches located in moderate income census tracts, four offer extended and/or weekend hours of operation to better serve the community. Branches in middle- and upper-income census tracts

follow a similar pattern, with the majority offering extended hours and approximately half offering weekend hours.

Community Development Services

The bank is a leader in providing CD services in the Greater Los Angeles MSA AA. The bank's employees served in various capacities, including boards of directors and as trustees, for 64 organizations offering CD services targeted toward LMI individuals. This represents a broadening of the bank's approach to providing CD services in the AA, as the bank provided services to more than twice as many community organizations than during the previous evaluation. During the review period, bank employees provided 723 CD services totaling 2,179 hours. Examples of services performed by bank employees include:

- Several bank representatives provided services to an organization which provides life skills training to LMI individuals with developmental disabilities. The organization provides job development and college preparation programs as well as providing access to affordable housing.
- Bank employees provided a significant volume of financial education to LMI individuals through partnerships with several organizations, including a local community health network serving underrepresented individuals, and an organization focused on serving women who grew up in foster care, have been homeless, or escaped from domestic violence or trafficking.
- A bank employee served on the board of directors of an organization with an express mission of improving California's economic future by teaching economics and financial literacy to Title 1 students. The Every Student Succeeds Act defines Title 1 schools, as those that provide financial assistance to children who are from low-income families to help ensure that all children meet academic standards.

SALINAS MSA ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE SALINAS MSA ASSESSMENT AREA

The bank's Salinas MSA AA consists of the entirety of Monterey County, which is coterminous with the Salinas, CA MSA. See Appendix A for an AA map and Appendix B for additional demographic data.

- The AA is made up of 104 census tracts, of which 3.9 percent are designated as low-income, 25.0 percent are moderate-income, 32.7 percent are middle-income, 34.6 percent are upper-income, and 3.8 percent are designated as unknown-income.
- Following the 2020 U.S. Census, ten new census tracts were drawn within the AA, representing a 10.6 percent increase. In addition, the number of geographies designated as LMI increased by 20.0 percent.
- The bank operates three full-service branches in the AA, including one branch in a moderate-income census tract and two in upper-income tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 2.7 percent market share, ranking 8th out of 14 FDIC-insured depository institutions operating in the AA
- In 2022, the bank ranked 32nd out of 388 HMDA reporters in the AA with 51 HMDA originations and purchases, and 31st out of 88 CRA reporters with 18 CRA small business and small farm loans.
- Community contacts identified the following as credit and CD needs in the AA: financial literacy and resources for the underbanked and unbanked communities (particularly in rural areas); capital for small businesses; affordable housing for low-income individuals and families; financial institutions' participation in loan guarantee programs that benefit small businesses; and volunteering on the loan committees of CD organizations. A community contact indicated that the AA has a significant shortage of affordable housing for low-income individuals and families due to population growth. Additionally, the contact stated that low paying wages hinder homeownership. Lastly, the community noted that financial institutions have limited opportunities to participate in CD programs and financing of housing projects given the county's concerns with steering.

Table 85

2011-2015 U.S. Census Bureau: American Community Survey

- Population between 2015 and 2020 grew 2.5 percent in the AA, which is comparable to the state population growth rate.
- The Salinas MSA AA consists of a small population compared to larger cities within the state of California.

Table 86

Median Family Income Change											
Assessment Area: Salinas MSA											
Area	2015 Median	2020 Median	Percentage								
Family Income Family Income Change											
Salinas MSA AA	68,222	83,052	21.7

2016-2020 U.S. Census Bureau: American Community Survey											
Note: Median family incomes have	e been inflation-adjusted	and are expressed in 2	020 dollars.								

- The AA's MFI grew significantly, at 21.7 percent, which is higher than the 16.2 percent state level change.
- According to the 2022 FFIEC Census data, 13,242 households out of the 128,003 total households in the AA live below the poverty level. Additionally, 28.8 percent of households within the AA are LMI.
- A community contact characterized the families in the local community as either very wealthy or very poor.

Table 87

Table of												
Housing Cost Burden												
	Assessment Area: Salinas MSA											
	Cos	t Burden - Re	enters	Cost	Burden - Ov	wners						
Area	Low	Moderate	All	Low	Moderate	All Owners						
	Income	Income	Renters	Income	Income							
Salinas MSA AA	82.6	55.2	50.7	67.3	48.0	30.3						
California	80.6	50.9	50.0	65.9	46.8	29.5						
Cost burden is housing cost that equals 30 percent or more of household income.												
Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy												

- The AA housing cost burden is comparable to the state of California. The housing cost burden has a greater impact on renters than homeowners.
- The AA lacks affordable housing, as noted by the community contact, with the median housing value being \$559,000. The median housing value for the state of California, at \$539,000, is slightly more affordable but still challenging for LMI families.
- The AA's median age of housing stock is 53 years, which is slightly older than the median age of housing stock for state of California, at 45 years.
- A community contact noted a significant shortage of affordable housing for LMI due to population growth in the AA. Additionally, housing affordability is difficult for LMI to achieve due to low wage paying jobs and high housing costs.

Table 88

Unemployment Rates												
Assessment Area: Salinas MSA												
Region 2018 2019 2020 2021 2022												
Salinas MSA AA	Salinas MSA AA 6.4 6.4 11.2 8.3 6.0											
California 4.3 4.1 10.2 7.3 4.2												
Source: Bureau of Labor Statistics: Local Area Unemployment Statistics												

- During each of the most recent five years, the AA unemployment rate has been consistently higher than that of the state of California.
- Unemployment rates almost doubled in 2020 due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the AA unemployment rate stabilized and returned to pre-pandemic levels.
- Employment within the AA is dominated by agriculture. Other major employment industries within the AA include accommodation and food services and healthcare and social assistance. A community contact noted that tourism also drives the local AA economy.
- A community contact indicated that the Salinas MSA AA economy was impacted by the COVID-19 pandemic and storms that occurred in late 2022. The storms caused flooding, mud slides, and widespread power outages that adversely impacted crops and employment.

Table 89 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

Comerica's Lending Test performance in the Salinas MSA AA is adequate. For this evaluation, the bank's home mortgage and small business lending carried comparable weight, as they represented similar lending volume in the AA. Additionally, the volume of home mortgage sub products was insufficient to allow for a separate analysis.

Details of the bank's 2020 mortgage and small business lending and information regarding aggregate lenders' performance can be found in Appendix C.

Lending Activity

The bank's lending activity in the Salinas MSA AA reflects good responsiveness to AA credit needs. Comerica makes use of innovative and/or flexible lending practices to meet such needs. During the review period, the bank demonstrated flexible lending practices through its participation in numerous industry-recognized, government-guaranteed lending programs, including 117 SBA loan originations and 15 small business micro loans.

Comerica originated 137 home mortgage and 139 small business loans in the AA between January 1, 2020, and December 31, 2022. The number of home mortgage loans slightly increased by 13.3 percent between 2020 and 2022, while the number small business loans decreased by 77.3 percent during the same period of time. The significant decrease in small business lending is primarily due to the conclusion of the SBA's PPP in May 2021 and rising interest rates. Loan products and origination volumes are consistent with the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

The geographic distribution of lending reflects adequate penetration throughout the Salinas MSA AA. The bank's small business and home mortgage lending reflect adequate penetration among geographies of different income levels, especially LMI geographies. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about Comerica's performance in LMI census tracts. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects adequate penetration throughout the Salinas MSA AA. While the bank did not make any home mortgage loans in the AA's low-income census tracts, this is comparable to aggregate data as well as the demographic figure. Distribution of the bank's home mortgage lending among moderate-income census tracts in 2021 is comparable to aggregate data and below the demographic figure. Conversely, Comerica's 2022 lending is below aggregate lending but comparable to the demographic figure.

The bank's 2020 lending performance reflected penetration levels that exceeded Comerica's 2021 performance but was below the one in 2022. Nevertheless, the bank's overall performance was not adversely impacted.

Small Business Lending

The geographic distribution of small business loans reflects adequate penetration throughout the AA. The total number of small business loans in LMI census tracts between 2020 and 2022 decreased due to the conclusion of the SBA's PPP and increasing interest rates. Comerica did not extend any small business loans within the AA low-income census tracts in 2022; however, the distribution among moderate-income census tracts is comparable to aggregate and demographic data. In 2021, small business lending in low-income tracts is comparable to aggregate while the distribution of loans among moderate-income tracts is below aggregate data and the demographic figure.

The bank's 2020 lending performance is consistent with 2021. A community contact identified small businesses loans and access to capital as credit and CD needs in the AA. The bank's participation in the SBA's PPP in 2020 and 2021 demonstrates its efforts in meeting the needs of small businesses in the AA.

2016-2020 U.S. Census Bureau: American Community Survey

Note: Percentages may not total 100.0 percent due to rounding.

Lending to Borrowers of Different Income Levels

The bank's borrower distribution of lending reflects an excellent penetration among individuals of different income levels. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Comerica's borrower distribution of home mortgage lending in the AA is excellent when compared to the performance of aggregate HMDA lenders. The bank's 2021 and 2022 home mortgage lending among LMI borrowers is greater than the level of penetration reflected by aggregate data though below the demographic figure.

The bank's lending performance in 2020 is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that is materially greater than aggregate.

Small Business Lending

Comerica's borrower distribution of small business loans by revenue size of businesses is adequate. Aggregate lending serves as a better proxy for loan demand than the total business figure when evaluating the borrower distribution of loans; as such, it carried more weight when rating the bank's performance.

The bank's 2022 small business lending distribution among businesses with annual revenues of \$1 million or less is below aggregate data by number volume and dollar amount. In 2021, the number volume of loans to businesses with revenues of \$1 million or less is comparable while exceeding it by dollar amount. The bank's lending performance in 2020 is consistent with its performance in 2021. Comerica's originations of small business loans decline year after year between 2020 and 2022, as well as the volume of originations to borrowers with unknown revenue, which primarily attributed to the end of the SBA's PPP in May 2021.

Community Development Lending

Comerica makes an adequate level of CD loans in the Salinas MSA AA, with the bank originating three CD loans totaling \$26 million. The number of CD loan originations in the Salinas MSA AA decreased by 70.0 percent since the previous evaluation, which is partially attributable to the cessation of the SBA's PPP in May 2021. Despite this decrease in the number volume, the dollar amount of CD loans in the AA increased by 214.3 percent since from the previous evaluation, highlighting the bank's willingness to make sizable CD loans when the opportunity arises. Comerica's CD lending activities considered responsive to credit needs in the AA include:

- A \$25 million line of credit promoting economic development by financing a small business and supporting permanent retention of 126 LMI jobs.
- A \$500,000 line of credit to a local organization providing drug prevention education, residential housing assistance, and outpatient counseling services targeted at LMI individuals and families in the AA.

Total	3	26.000								

INVESTMENT TEST

Comerica's performance under the Investment Test in the Salinas MSA AA is good. The bank has an adequate level of qualified CD investments and grants, particularly those not routinely provided by private investors. The bank's overall number of CD investments and grants decreased since the previous evaluation, though the dollar amount increased substantially. While Comerica makes occasional use of innovative and/or complex investments and exhibits good responsiveness to credit and CD needs of the AA, it is rarely in a leadership position.

Table 95 illustrates the bank's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the current evaluation period, and CD donations made since the previous evaluation. The bank's qualified CD investments consist entirely of LIHTC investments, aiming for increasing affordable housing in the AA. On the other hand, the bank's CD donations were granted to organizations that provide community services targeted to LMI individuals and geographies.

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

The bank's delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in the AA. The distribution of the bank's three branch offices and three ATMs as of April 1, 2023, was compared to the distribution of the population and businesses among the tract categories within the AA. Table 96 summarizes the bank's retail locations in the Salinas MSA AA.

² Original market value of investment

The bank's branches are located in the northern portion of the AA and are distributed among the cities of Salinas, Monterey, and Prunedale. The largest concentration of LMI census tracts in the AA are in the central and southern portions of Monterey County, where population groups are relatively distant from each other, and a large portion of the geography is a designated state park.

The bank closed one branch in the AA during the review period in an upper-income census tract. The bank's record of opening or closing branches has not adversely affected the accessibility of its delivery systems, including to LMI geographies. Banking services and hours of operations do not vary in a way that inconveniences the AA, particularly in LMI geographies or to LMI individuals. The level of branch services and hours offered are materially the same throughout the AA.

Community Development Services

The bank provides a relatively high level of CD services in the Salinas MSA AA. The bank's employees served in various capacities for three organizations offering CD services targeted toward LMI individuals. Overall, bank representatives provided nine CD services totaling 37 hours. Examples of services performed by bank employees include:

- Four bank employees provided financial education to LMI students and their families through two different organizations. In each instance, the education focused on saving, budgeting, and other tools vital for a student to build financial security as they approach graduation and beyond.
- A bank employee serves on the board of director for an organization that provides a wide array of services including alcohol and drug prevention, legal, financial, and clinical counseling, as well as temporary housing for low-income individuals and families.

SAN JOSE METROPOLITAN ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE SAN JOSE METROPOLITAN ASSESSMENT AREA

- The San Jose Metropolitan AA consists of the entirety of Santa Clara County, which along with San Benito County (excluded from the AA) comprises the San Jose-Sunnyvale-Santa Clara, CA MSA. See Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is comprised of 408 census tracts, of which 7.1 percent are designated as low-income, 21.8 percent are moderate-income, 40.4 percent are middle-income, 30.4 percent are upper-income, and 0.2 percent are designated as unknown-income.
- Following the 2020 U.S. Census, 36 new census tracts were drawn within the AA, representing a 9.7 percent increase. Geographies designated as LMI increased by 5.9 percent.
- The bank operates 13 full-service branches in the AA, including one branch in a moderate-income census tract, six in middle-income tracts, and six in upper-income tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 3.3 percent market share, ranking 7th out of 42 FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 30th out of 508 HMDA reporters in the AA with 246 HMDA originations and purchases, and 21st out of 149 CRA reporters with 217 CRA small business loans.
- A community contact indicated there is a shortage of affordable housing in the AA, and that there are many opportunities for financial institutions to participate in CD and other financing projects.

Table 97

Source: 2011-2015 U.S. Census Bureau: American Community Survey 2016-2020 U.S. Census Bureau: American Community Survey

Note: Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.

- MFI reported throughout the AA exceeded the state MFI growth rate by 8.5 percent. It is noteworthy that the AA MFI between 2015 and 2020 is significantly higher than that of the state.
- The AA population is mostly affluent, with 42.4 percent of AA households considered as upper-income as well as 70.8 percent of the AA census tracts designated as middle- and upper-income geographies. Only 7.0 percent of households in the AA live below the poverty level.

Table 99

1 51010 00														
	Housing Cost Burden Assessment Area: San Jose Metropolitan													
Cost Burden - Renters Cost Burden - Owners														
Area														
San Jose Metropolitan AA	80.0	52.3	42.7	61.8	44.0	26.4								
San Jose-Sunnyvale- Santa Clara, CA MSA	79.9	52.3	42.7	62.0	44.5	26.6								
California	80.6	50.9	50.0	65.9	46.8	29.5								

Cost burden is housing cost that equals 30 percent or more of household income.

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

- The AA housing cost burden for low-income renters is a substantially greater than the burden on homeowners at any other level. However, the overall the cost burden for homeowners and renters in the AA is comparable to the statewide figures.
- The AA median housing value is \$1.0 million, with a median age of 52 years. The AA
 median housing value almost doubles the median housing value for the state of California
 is, at \$539,000.
- A community contact indicated that there is a shortage of affordable housing in the AA; thus, there are significant needs and opportunities for the development of affordable housing.

Table 100

Unemployment Rates												
Assessment Area: San Jose Metropolitan												
Region	2018	2019	2020	2021	2022							
San Jose Metropolitan AA	2.7	2.5	7.2	4.7	2.7

California 4.3 4.1 10.2 7.3 4.2												
Source: Bureau of Labor Statistics: Local Area Unempl	oyment Statis	tics										

- In 2020, the unemployment rates almost tripled due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the unemployment rates stabilized and returned to pre-pandemic levels.
- Major employment industries within the AA include professional and technical services, manufacturing, and healthcare and social assistance. The AA serves as a hub for many Fortune 500 technology companies, such as Adobe, PayPal, eBay, and Cisco, which provide significant employment opportunities.
- A community contact noted construction labor shortages in the AA.

Table 101 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the San Jose Metropolitan AA is good. For this evaluation, the bank's small business lending carried more weight, as it is a strategic focus for the bank in the AA and represents the largest volume of lending. Home refinance and home improvement lending, as well as other purpose lines of credit, received individual evaluation, as the other HMDA lending products did not have sufficient volume for a meaningful analysis.

Appendix C provides details of the bank's 2020 mortgage and small business lending, as well as corresponding aggregate data.

Lending Activity

Comerica's lending activity reflects good responsiveness to AA credit needs, as the bank makes use of innovative and/or flexible lending practices. The bank demonstrated flexible lending practices through its participation in numerous industry-recognized, government-guaranteed lending programs, including, 773 SBA loans and 157 small business micro loans in the AA during the review period.

For this evaluation, the total volume of loans in the AA included 751 home mortgage and 1,187 small business loans originated between January 1, 2020, and December 31, 2022. The loan products and origination volumes are consistent with the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

The geographic distribution of lending reflects good penetration throughout the AA. The bank's small business lending reflects excellent penetration among geographies of different income levels, especially LMI geographies, while home mortgage lending reflects adequate penetration. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about the bank's performance in LMI geographies. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects adequate penetration throughout the AA. The distribution of 2021 and 2022 home mortgage lending among low-income census tracts is comparable to aggregate data and the demographic figure. Comerica's home mortgage lending in low-income census tracts declined in 2022, which aligns with the performance of aggregate lenders. This drop in performance correlates to lower demand due to the rising interest rate environment, which makes borrowing more expensive.

Lending in moderate-income census tracts is below aggregate lending data in 2021 and 2022. The bank's performance in 2022 is improved but remains slightly below the level of aggregate lending in these tracts as well as the demographic figure.

The bank's 2020 lending performance reflects penetration levels consistent with 2021 and 2022 performance, with penetration levels comparable to aggregate data and the demographic figure.

Home Refinance Lending

The geographic distribution of home refinance lending is poor. The distribution of 2022 home refinance loans among low-income census tracts is below aggregate data and the demographic figure. The bank's lending in moderate-income census tracts is well below that of aggregate lenders and the demographic figure.

The bank's lending performance for 2021 reflects penetration levels that were greater than that of 2022. Distribution of 2021 home refinance loans among low-income census tracts in the AA is below aggregate lending performance and the demographic figure, while lending in moderate-income census tracts is comparable to aggregate lending but below the demographic figure.

The bank's lending performance in 2020 reflected penetration levels consistent with 2021 and 2022 performance, with a distribution of loans in LMI census tracts below aggregate data.

Home Improvement Lending

The geographic distribution of home improvement lending is adequate. The distribution of 2021 home improvement loans among low-income census tracts is above aggregate data and the demographic figure. Distribution of 2022 home improvement loans is comparable to aggregate data and the demographic figure, declining slightly from the previous year's performance. In moderate-income census tracts, the bank's 2021 and 2022 home improvement lending performance is comparable to aggregate data and below the demographic figure. Additionally, greater weight was assigned to the bank's performance compared to aggregate lenders', as aggregate data is a better indicator of loan demand.

The bank's 2020 lending performance reflects penetration levels greater than that of 2021 and 2022, with a distribution of loans in LMI census tracts above aggregate data and comparable to the demographic figure.

Other Purpose Lines of Credit Lending

The geographic distribution of other purpose lines of credit is good. The 2021 distribution of other purpose lines of credit among LMI census tracts is comparable to aggregate data and below the percentage of owner-occupied units in these geographies. Among low-income census tracts, the bank's 2022 distribution matches aggregate data. The bank's performance in moderate-income census tracts is substantially exceeded the performance reflected by aggregate lenders and almost doubled the demographic figure.

The bank's 2020 lending performance reflects penetration levels comparable to that of 2021, with a distribution of lending in LMI census tracts similar to aggregate data and the demographic figure.

Small Business Lending

The geographic distribution of small business loans reflects excellent penetration throughout the AA. The distribution of 2021 and 2022 small business loans among low-income census tracts is greater than aggregate data as well as the percentage of businesses in these tracts (the demographic figure). The bank's small business lending in moderate-income census tracts is also above aggregate lending and the demographic figure in both years. This performance reflects favorably on the bank's responsiveness to the credit needs of small businesses in the AA.

The bank's 2020 lending performance reflects penetration levels consistent with 2021 and 2022 performance, with the lending levels comparable to aggregate data in low-income census tracts and above aggregate lenders in moderate-income tracts.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's borrower loan distribution reflects an adequate penetration among individuals of different income levels and businesses of different revenue sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers. Greater weight was given to home mortgage lending, as the bank originated more HMDA loans than small business loans in the AA.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the AA is adequate when compared to demographic characteristics, as well as the performance of aggregate lenders. The dispersion of home mortgage loans in the AA among LMI borrowers was comparable to aggregate data, which is far below the percentage of families in the AA classified as LMI. This is indicative of the demand for home mortgage products among LMI borrowers in the AA, where median home values are more than double the average of the state of California.

The bank's 2020 lending performance is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that is comparable to aggregate data but below the demographic figure.

Small Business Lending

Comerica's borrower distribution of small business loans by revenue size of businesses is poor. The distribution of 2022 loan originations to businesses with revenues of \$1 million or less is well below the percentage of small businesses in the AA as well as aggregate data by number and dollar amount of originations. The bank's 2021 small business loan distribution is also below the performance of aggregate lenders, though by a smaller margin than 2022.

The bank's 2020 small business lending distribution among businesses with annual revenues of \$1 million or less is slightly above the performance of aggregate lenders. Viewed in conjunction with 2021 and 2022 performance, it is notable that bank's performance declined each year, even as the performance of aggregate lenders improved during the same period of time.

Community Development Lending

Note: Percentages may not total 100.0 percent due to rounding.

The bank makes a relatively high level of CD loans in the AA. The bank originated 56 CD loans totaling \$149.2 million, which comprised 4.2 percent of bank-wide CD loans by number volume and 2.8 percent by dollar amount. The number of CD loan originations in the AA decreased by 5.1 percent since the previous evaluation. This is attributable to the substantial decrease in loans originated through the SBA's PPP, which made up 52.5 percent of the bank's CD loans in the AA. Despite the decrease in number of CD loans, the dollar amount increased by 41.9 percent since the previous evaluation, highlighting the bank's willingness to make sizable CD loans when the opportunity arises.

The largest portion of the bank's CD lending in the AA promotes economic development through small business financing and permanent job creation, retention, or improvement impacting LMI persons or LMI geographies. Examples of the bank's CD lending activities that are considered responsive to credit needs in the AA include:

- A \$15 million line of credit to a manufacturer of industrial automation equipment securing 133 LMI jobs in the AA.
- A \$2.4 million loan to a SBA 504 Certified Development Company to support a qualified small business to replace its current rental property by purchasing commercial property.
- A \$17.6 million loan for a 115-unit LIHTC apartment project for households earning less than 80 percent of the area median income. Additionally, 25 percent of the units are set aside for individuals with intellectual and developmental disabilities. Given the affordable

housing shortage in the AA, as indicated by the community contact, the extension of this CD loan reflects favorably on the bank.

 A \$1 million line of credit to a local organization that focuses on building a community free from poverty for LMI children and providing community services, such as educational programs, food and housing assistance.

Revitalization and Stabilization	8	3,788					
Total	56	149,220					

INVESTMENT TEST

Comerica's performance under the Investment Test in the AA is good. The bank has a significant level of qualified CD investments and grants, particularly those not routinely provided by private investors. Comerica is occassionally in a leadership position given its volume of CD investments. The bank's overall number of CD investments and grants decreased since the previous evaluation, though the dollar amount of qualified investments and services increased. The bank makes occasional use of innovative and/or complex investments and exhibits good responsiveness to credit and CD needs of the AA.

Table 107 illustrates the bank's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, investments purchased during the current evaluation period, and CD donations made since the previous evaluation. The bank's qualified CD investments consist entirely of LIHTC investments that provide affordable housing in the AA, while the bank's CD donations were provided for a wide array of qualified purposes. Examples of donations extended by the bank include:

- Three donations to an organization to support COVID-19 recovery efforts that provide wraparound services to clients who have experienced job loss, loss of healthcare, rent difficulties, and food scarcity. Approximately 98 percent of the organization's clients, including those benefitting directly from the donations, are LMI.
- A \$12,500 donation to a program providing essential financial education to an elementary school where 78 percent of students qualify for free or reduced-price lunches.

Table 107

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

Comerica's delivery systems are accessible throughout the AA geographies and to individuals of different income levels and businesses of different revenue size. The distribution of the bank's 13 branch offices and 15 ATMs as of April 1, 2023, was compared to the distribution of the households and businesses among the AA census tracts by income level. Table 108 below summarizes the bank's retail locations in the AA.

Table 108

Branch and Full-Service ATM Locations Assessment Area: San Jose Metropolitan										
Tract % of % of Branches Full-Service ATMs										
Income	Geographies	Households	Businesses	#	%	#	%			
Low	7.1	5.5	4.9	0	0.0	0	0.0			
Moderate	21.8	19.1	18.0	1	7.7	1	6.7			
Middle	40.4	43.4	39.0	6	46.2	7	46.7			
Upper	30.4	32.0	37.9	6	46.2	7	46.7			
Unknown	0.2	0.1	0.2	0	0.0	0	0.0			
Total	100.0	100.0	100.0	13	100.0	15	100.0			

The bank's branches are well distributed among the northwest portion of the AA. Though only a single branch is located within a moderate-income census tract, four additional branches are in very close proximity to and serve LMI geographies.

Comerica did not open or close any branches in the AA during the review period. Banking services and hours of operations do not vary in a way that inconveniences the AA, particularly in LMI geographies or to LMI individuals. The level of branch services and hours offered are materially the same throughout the AA.

² Original market value of investment

Community Development Services

The bank provides a relatively high level of CD services in the AA. Comerica's employees served in various capacities for 17 organizations offering CD services targeted toward LMI individuals. The 118 CD services provided by bank representatives total approximately 481 hours. Examples of CD services performed include:

- A bank representative serving on the board of directors for an organization that provides transitional housing, career training, and mental and behavioral health support to formerly incarcerated individuals. A 100 percent of the individuals served are LMI.
- A bank employee serving on the board of directors for an organization that provides access to safe, stable, and affordable housing in an area of the AA where it is particularly difficult to acquire. The employee provides financial oversight and strategic planning services, aiding the organization in its ongoing efforts to address the lack of affordable housing in the area.

METROPOLITAN AREAS (LIMITED-SCOPE REVIEW)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN LIMITED-SCOPE CALIFORNIA METROPOLITAN ASSESSMENT AREAS

The bank's branch operations and deposit market share for each metropolitan AA receiving a limited-scope review were determined as of April 1, 2023, and June 30, 2022, respectively.

Inland Empire MSA AA

- The Inland Empire MSA AA is comprised of the entirety of San Bernadino and Riverside counties which make up the Riverside-San Bernadino-Ontario, CA MSA.
- The AA is comprised of 984 census tracts, including 48 low-, 282 moderate-, 362 middle-, 279 upper-, and 13 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 4,599,839, which reflects a 4.7 percent increase from the 2015 ACS data.
- The AA includes 1,029,309 families, 21.8 percent are low-, 17.5 percent moderate-, 19.3 percent middle-, and 41.4 percent are upper-income.
- The bank operated three branches, representing 0.7 percent of its branches.
- Comerica held \$104.5 million in deposits, representing a market share of 0.1 percent and 0.1 percent of its total deposits.

San Diego MSA AA

- The San Diego MSA AA is comprised of the entirety of San Diego County which is coterminous with the San Diego-Chula Vista-Carlsbad, CA MSA.
- The AA is comprised of 737 census tracts, including 46 low-, 167 moderate-, 262 middle-, 248 upper-, and 14 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 3,298,634, which reflects a 2.3 percent increase from the 2015 ACS data.
- The AA includes 759,418 families, 22.8 percent are low-, 17.3 percent moderate-, 18.7 percent middle-, and 41.2 percent are upper-income.
- The bank operated 13 branches, representing 3.2 percent of its branches.
- Comerica held \$889.2 million in deposits, representing a market share of 0.6 percent and
 1.2 percent of its total deposits.

San Francisco Bay Metropolitan AA

- The San Francisco Bay Metropolitan AA is comprised of the entirety of Alameda, Contra Costa, San Francisco, and San Mateo counties which, along with Marin County (excluded from the AA) make up the San Francisco-Oakland-Berkeley, CA MSA.
- The AA is comprised of 1,039 census tracts, including 91 low-, 240 moderate-, 330 middle-, 337 upper-, and 41 unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 4,486,687, which reflects a 5.1 percent increase from the 2015 ACS data.
- The AA includes 1,022,205 families, 23.5 percent are low-, 16.4 percent moderate-, 18.7 percent middle-, and 41.4 percent are upper-income.
- o The bank operated 17 branches, representing 4.2 percent of its branches.
- Comerica held \$3.4 billion in deposits, representing a market share of 0.6 percent and 4.4 percent of its total deposits.

Santa Cruz MSA AA

- The Santa Cruz MSA AA is comprised of the entirety of Santa Cruz County, which is coterminous with the Santa Cruz-Watsonville, CA MSA.
- The AA is comprised of 70 census tracts, which includes five low-, 12 moderate-, 29 middle-, 23 upper-, and one unknown-income tract.
- Based upon 2020 ACS data, the AA population was 270,861, which reflects a 0.6 percent increase from the 2015 ACS data.
- The AA includes 60,870 families, 22.1 percent are low-, 16.7 percent moderate-, 19.3 percent middle-, and 42.0 percent are upper-income.
- The bank operated six branches, representing 1.5 percent of its branches.
- Comerica held \$853.6 million in deposits, representing a market share of 9.6 percent and 1.1 percent of its total deposits.

Ventura County MSA AA

- The Ventura County MSA AA is comprised of the entirety of Ventura County, which is coterminous with the Oxnard-Thousand Oaks-Ventura, CA MSA.
- The AA is comprised of 190 census tracts, including nine low-, 46 moderate-, 77 middle-,
 55 upper-, and three unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 843,843, which reflects a 0.4 percent increase from the 2015 ACS data.
- The AA includes 196,312 families, 22.0 percent are low-, 16.5 percent moderate-, 20.8 percent middle-, and 40.7 percent are upper-income.
- o The bank operated one branch, representing 0.2 percent of its branches.
- Comerica held \$58.1 million in deposits, representing a market share of 0.2 percent and 0.1 percent of its total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix D contains detailed performance and demographic information reviewed for the limited-scope AAs. Table 109 discusses conclusions regarding the bank's performance.

Table 109

Assessment Area	Lending Test	Investment Test	Service Test
Inland Empire MSA AA	Consistent	Consistent	Consistent
San Diego MSA AA	Exceeds	Consistent	Exceeds
San Francisco Bay Metropolitan AA	Consistent	Consistent	Exceeds
Santa Cruz MSA AA	Below	Below	Below
Ventura County MSA AA	Consistent	Consistent	Consistent

The institution's lending, investment, service performance in the area is generally consistent with the institution's lending, investment, service performance in the state.

STATE OF FLORIDA

CRA RATING FOR FLORIDA: Satisfactory

The Lending Test is Rated: High Satisfactory
The Investment Test is Rated: High Satisfactory
The Service Test is Rated: High Satisfactory

Major factors supporting the institution's rating include:

- Lending activity reflects good responsiveness and record of serving the credit needs of the AAs' credit needs, including low-income individuals, low-income, and very small businesses.
- The geographic distribution of loans reflects excellent penetration throughout the AAs.
- The bank's distribution of loans among individuals of different income levels and businesses of different revenue sizes is good.
- The bank has a relatively high level of CD loans.
- Comerica makes use of innovative and/or flexible lending practices in serving the AAs' needs.
- The bank is occassionally in a leadership position given its significant level of qualified CD investments and grants, particularly those not routinely provided by private investors.
- Comerica makes occasional use of innovative and/or complex investments to support CD initiatives.
- The bank exhibits good responsiveness to credit and CD needs.
- Delivery systems are accessible to individuals of different income levels throughout the bank's AAs.
- The record of opening and closing branches has not adversely affected the accessibility of its delivery systems, particularly to LMI geographies and/or LMI individuals.
- Services do not vary in a way that inconveniences the bank's AAs, particularly LMI geographies and/or LMI individuals.
- Comerica provides a relatively high level of CD services.

SCOPE OF THE EVALUATION

The scope of the review for the state of Florida is consistent with the overall scope for the institution, including evaluations under the Lending, Investment, and Service tests. The period and products evaluated for this state are also unchanged from the scope discussed in the Institution section of this report.

Comerica has two delineated AAs in the state of Florida: Fort Lauderdale-West Palm Beach Metropolitan AA and Naples MSA AA. The Fort Lauderdale-West Palm Beach Metropolitan AA was reviewed using full-scope procedures while the Naples MSA AA received a limited-scope review. Factors considered to determine the AA receiving a full-scope review include strategic importance of the AA to the bank operations; volume of lending; number of branches; percentage of total deposits; and length of time since the AA last received a full-scope review. Approximately 88.9 percent of lending activity (by number of loans), 90.6 percent of the total deposits, and 75.0 percent of total branches within the state of Florida were evaluated through the full-scope review.

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN FLORIDA

The bank delineates two of its 27 AAs and operates eight of its 409 branches in the state of Florida. As of June 30, 2022, the bank had \$424.6 million in deposits in the state, representing 0.6 percent of total deposits. According to the June 30, 2022, FDIC Summary of Deposits, the bank had a deposit market share of 0.1 percent and ranked 97th out of 186 FDIC-insured financial institutions across the state.

Of the 20,205 HMDA-reportable loans and 35,231 small business loans originated and purchased by Comerica during the review period, 432 HMDA-reportable loans (2.1 percent) and 368 small business loans (1.0 percent) were extended in the Florida AAs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the state of Florida is High Satisfactory. The Lending Test conclusions in the Fort Lauderdale-West Palm Beach Metropolitan AA are good, which is consistent with the overall state rating. The bank's performance in Naples MSA AA supports the state rating.

Lending Activity

The bank's lending activities in the state of Florida reflect good responsiveness to the credit needs of the AAs. Comerica makes use of innovative and/or flexible lending programs through its participation in numerous industry-recognized, government-guaranteed programs, including the origination of 207 SBA loans and 79 small business micro loans in the state of Florida.

As outlined in Table 110, Comerica extended 803 loans totaling \$329.0 million. The loan products and origination volumes appear consistent with the credit needs of the bank's AAs. The number of small business and HMDA loans extended by the bank was compared against the number of loans made by aggregate lenders during the review period. The bank ranked 56th out of 275 CRA reporters and 118th of 1,197 HMDA reporters in its Florida AAs.

Table 110

Summary of Lending Activity – January 1, 2020 through December 31, 2022 Florida Assessment Areas									
Loan Type	#	%	\$000s	%					
Home Purchase	127	15.8	61,218	18.6

Total Small Business	368	45.8	77,827	23.7					
Total Small Farm	3	0.4	235	0.1					
TOTAL LOANS	803	100.0	328,952	100.0					

Geographic Distribution of Loans

The overall geographic distribution of lending within the state of Florida reflects excellent penetration throughout the bank's AAs. This performance is consistent across the bank's Fort Lauderdale-West Palm Beach Metropolitan AA.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's overall lending reflects good penetration among individuals of different income levels and businesses of different sizes. This performance is consistent across the bank's AA. A detailed discussion of the facts and data supporting the overall conclusions are presented in the Conclusions with Respect to Performance Criteria section for each AA.

Community Development Lending

Comerica makes a relatively high level of CD loans, considering the bank's capacity and the need and availability of CD opportunities. As reflected in Table 111, the bank originated 16 CD loans totaling approximately \$38.6 million within the state, which comprises 1.2 percent of overall bankwide CD loan volume by number and 0.7 percent by dollar amount.

While the number of qualified CD loans decreased slightly since the previous evaluation, the dollar amount of CD lending grew by 271.0 percent. This growth occurred despite the substantial decrease in loans originated through the SBA's PPP, which made up approximately 36.4 percent of the bank's CD loans at the previous evaluation.

Comerica extended CD loans for a variety of purposes, as noted in Table 111. Specific details regarding the CD lending can be found in the Conclusions with Respect to Performance Tests section for each AA.

Table 111

Community Development Lending Florida Assessment Areas							
Purpose # \$(000s							
Affordable Housing	5	1,602					
Community Services	1	16,000					
Economic Development	9	20,757					
Revitalization and Stabilization	1	279					
Total	16	38,638					

INVESTMENT TEST

The bank's Investment Test rating is High Satisfactory. The Investment Test conclusions in the bank's Fort Lauderdale-West Palm Beach Metropolitan AA are good, which is consistent with the overall state rating. The bank's performance in the AA that received a limited-scope review was below the performance in the full-scope review area and the state.

The bank is occasionally in a leadership position given its significant level of qualified CD investments and grants. While Comerica makes rare use of innovative and/or complex investments, the bank exhibits good responsiveness to the credit and CD needs of its AAs.

In addition to the investments made within the bank's AAs, Comerica also made three investments in a broader statewide area. The bank deposited \$250,000 in a minority-owned depository institution in conjunction with a mentor-protégé relationship focused on capacity building for the depository institution. The bank also made a large investment in a Small Business Investment Corporation, providing expertise, networking, and capital to help entrepreneurs build their small businesses to their full potential.

Specific details regarding CD investments and donations made within the bank's Florida AAs can be found in the Conclusions with Respect to Performance Tests section for each AA. In addition to the investments made within the bank's delineated AAs, the bank also made four investments totaling \$2.8 million in the border statewide area. These investments included \$1.3 million worth of deposits in minority-owned financial institutions and a \$1 million investment in a Small Business Investment Company that promotes economic development in the region by financing small businesses. As the bank was sufficiently responsive to the CD needs of its AAs, the qualified activity in which the bank engaged in the broader statewide area is favorably considered as representing the bank's overall responsiveness to CD needs.

Book value of investment

SERVICE TEST

The bank's performance under the Service Test is High Satisfactory. The Service Test conclusions in the Fort Lauderdale-West Palm Beach Metropolitan AA are good, which is consistent with the overall state rating. The bank's performance in the Naples AA, which received a limited-scope review, is consistent with the performance in the full-scope review areas and the state.

Retail Services

Comerica's delivery systems are accessible to the AAs geographies and individuals of different income levels. During the review period, the bank opened one branch within the delineated Naples MSA AA. While this new branch is located within an upper-income census tract, the bank's record of opening or closing branches in the state has not adversely affected the accessibility of its delivery systems, including to LMI geographies. Banking services and hours of operations do not vary in a way that inconveniences the state, particularly in LMI geographies or to LMI individuals.

² Original market value of investment

Refer to Table 113 for the distribution of banking offices and full-service ATMs by income level of geographies.

Table 113

	Branch and Full-Service ATM Locations									
Florida Assessment Areas Tract % of % of Branches Full-Service ATMs										
Income	Geographies	Households	Businesses	#	%	#	%			
Low	5.9	4.8	3.2	0	0.0	0	0.0			
Moderate	26.6	27.7	23.5	1	12.5	1	14.3			
Middle	31.0	32.2	31.0	2	25.0	2	28.6			
Upper	33.6	34.2	40.7	4	50.0	4	57.1			
Unknown	2.9	1.1	1.6	1	12.5	0	0.0			
Total	100.0	100.0	100.0	8	100.0	7	100.0			

The bank also operates a mobile branch, which is located in its Naples Metropolitan AA. The mobile branch affords flexibility in providing retail banking services to customers in geographies not sufficiently served by the existing brick-and-mortar branches. As of April 1, 2023, the mobile branch is situated in an upper-income census tract, though the location is proximate to several moderate-income geographies that are reasonably served by the mobile branch.

Community Development Services

Comerica provides a relatively high level of CD services in its Florida AAs, which is consistent with its performance in the Fort Lauderdale-West Palm Beach Metropolitan AA. Bank representatives provided 466 CD services, totaling 1,166 hours, to 61 unique organizations within the state of Florida. This represents approximately 6.7 percent of Comerica's total CD services, despite only 1.0 percent of the bank's 7,382 employees are located in Florida. Details regarding CD services can be found in the respective Conclusions with Respect to Performance Tests section for each AA.

FORT LAUDERDALE – WEST PALM BEACH METROPOLITAN ASSESSMENT AREA (Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE FORT LAUDERDALE-WEST PALM BEACH METROPOLITAN ASSESSMENT AREA

- The Fort Lauderdale-West Palm Beach Metropolitan AA consists of Palm Beach and Broward counties. These counties, along with Miami Dade County, which is excluded from the AA, make up the Miami-Fort Lauderdale-Pompano Beach, FL MSA. See Appendix A for an AA map and Appendix B for additional demographic data.
- The AA is comprised of 790 census tracts, of which 5.7 percent are designated as low-income, 27.6 percent are moderate-income, 29.7 percent are middle-income, 34.1 percent are upper-income, and 2.9 percent are designated as unknown-income.
- As a result of the 2020 U.S. Census, the number of census tracts within the AA increase by 90 geographies (12.9 percent). Additionally, the income level designations of many existing census tracts changed, with census tracts designated as LMI increasing by 6.5 percent.
- Comerica operates six full-service branches in the AA, including one branch in moderate-income, two in middle-income, and three in upper-income census tracts.
- According to the June 30, 2022, FDIC Deposit Market Share Report, the bank had a 0.3 percent market share, ranking 29th out of 60 FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 115th out of 1,047 HMDA reporters in the AA with 117 HMDA originations and purchases, and 52nd out of 244 CRA reporters with 89 CRA small business loans.
- A community contact indicated that affordable housing is scarce and a need for AA residents.

Table 114

Table 114										
Population Change Assessment Area: Fort Lauderdale-West Palm Beach Metropolitan										
Area	2015 Population	2020 Population	Percentage Change

Source: 2011-2015 U.S. Census Bureau: American Community Survey 2016-2020 U.S. Census Bureau: American Community Survey Note: Median family incomes have been inflation-adjusted and are expressed in 2020 dollars.											

- The AA MFI grew at a rate comparable to the state MFI, with all of the AA counties and MDs reflecting MFIs greater than \$70,000 in 2020.
- Broward County and Fort Lauderdale-Pompano Beach-Sunrise, FL MD have slightly lower MFIs than other AA counties and MDs but exceed the state MFI.
- According to the 2022 FFIEC Census Data, 12 percent of AA households live below the poverty level. Additionally, a community contact stated that there are high poverty rates within the AA that adversely impact children and families.

Cost burden is housing cost that equals 30 percent or more of housel	old incom	e		•							

Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy

- Housing affordability within the AA for low-income renters is a substantially greater burden than the burden on homeowners at any other level.
- Overall, the cost burden for renters and homeowners in the AA is greater than the housing cost burden for statewide Florida renters.
- A community contact indicated that affordable housing is at a premium and that there is not much incentive for developing affordable housing in the AA.
- The AA median housing value is \$291,000, which exceeds the statewide median housing value, at \$232,000.

Florida 3.7 3.2 8.2 4.6 2.9												
Source: Bureau of Labor Statistics: Local Area Unemployment Statist	ics											

- Unemployment rates more than doubled in 2020 due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2022, the AA unemployment rate stabilized and returned to below prepandemic levels.
- Major employment industries within the AA include retail trade, healthcare and social assistance, and accommodation and food services.

Table 118 details selected AA characteristics.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's Lending Test performance in the AA is good. For this evaluation, the bank's home mortgage and small business lending carried similar weight. Additionally, home purchases and home refinance lending are the only home mortgage loan products to be separately evaluated, as the remaining products had insufficient volume to conduct a meaningful analysis.

Appendix C details the bank's 2020 mortgage and small business lending activity, as well as the corresponding aggregate data.

Lending Activity

The bank's lending activity in the AA reflects good responsiveness to credit needs. Comerica makes use of innovative and/or flexible lending practices through its participation in numerous industry-recognized, government-guaranteed programs, including the origination of 194 SBA loans and 73 small business micro loans.

For this evaluation, the total volume of loans in consisted of 368 home mortgage and 343 small business loans originated between January 1, 2020, and December 31, 2022. The loan products and origination volumes appear consistent with the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

For this analysis, the geographic distribution of small business lending and mortgage lending was compared with available demographic and aggregate data. Comerica's geographic distribution of loans reflects excellent penetration throughout the AA. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about the bank's performance in LMI geographies. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage lending reflects excellent penetration throughout the AA. The 2021 and 2022 distribution of home mortgage loans among low-income census tracts is comparable to aggregate data and the demographic figure, while it substantially exceeded these figures in moderate-income census tracts. Comerica's significant level of home mortgage lending in LMI census tracts reflects the bank's targeted efforts to meet the AA credit needs.

The bank's 2020 lending performance is consistent with the 2021 and 2022 geographic distribution of loans, as it exceeded aggregate and demographic data.

Home Purchase Lending

The geographic distribution of home purchase lending is excellent. The bank's 2021 and 2022 distribution of home purchase loans among low-income census tracts is greater than that of aggregate lending data and slightly above the percentage of owner-occupied housing units

Comerica Bank Dallas, Texas

located in these tracts (the demographic figure). Loan distribution among moderate-income geographies, is even better, as the bank originated a substantially higher percentage of home purchase loans in moderate-income census tracts than aggregate lenders. While moderate-income census tracts contained almost one quarter of the owner-occupied units in the AA, Comerica originated home purchase loans at a rate approximately three times higher than this figure.

The bank's 2020 lending performance is consistent with the 2021 and 2022 loan distribution, doubling aggregate data.

Home Refinance Lending

The geographic distribution of the bank's home refinance lending in the AA is excellent. The 2021 distribution of home refinance loans among low-income census tracts is above aggregate data and the demographic figure, though the 2022 distribution of lending is comparable to the aggregate data and below the demographic figure. Comerica's 2021 and 2022 distribution of home refinance lending among moderate-income census tracts is substantially greater than aggregate data and the demographic figure.

The bank's 2020 lending performance is consistent with its 2021 and 2022 distribution of loans, with comparable performance in low-income tracts to aggregate data and materially exceeding than the lending distribution of aggregate lenders in moderate-income geographies.

Small Business Lending

The geographic distribution of small business loans reflects good penetration throughout the AA. The distribution of 2021 small business loans among low-income census tracts is significantly greater than aggregate data and the demographic figure. Among moderate-income census tracts, the distribution of 2021 loans is comparable to the aggregate data and the percentage of businesses located in these tracts. Additionally, the bank's dispersion of 2022 small business loans among LMI census tracts is also comparable to both metrics.

Comerica's 2020 small business lending performance is consistent with the bank's performance in 2021 and 2022.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's distribution of lending to individuals of different income levels and businesses of different revenue sizes is good. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the is good when compared to demographic and aggregate data. The 2021 distribution of the bank's home mortgage loans among low-income borrowers is comparable to aggregate data, while the bank's lending to moderate-income borrowers almost doubles aggregate data and exceeds the demographic figure. Aggregate data serves as a better proxy for loan demand than the demographic figure.

The distribution of the bank's lending among LMI borrowers decreased in 2022. Home mortgage lending among low-income borrowers was slightly below the aggregate data; however, lending to moderate-income borrowers was significantly below aggregated and demographic data. Given the scarcity of affordable housing in the AA and rising interest rates, the bank's performance is good.

The bank's 2020 lending performance is consistent with that of 2021, as the distribution of loans to LMI borrowers is comparable to aggregate data.

Small Business Lending

The borrower distribution of small business loans by revenue size of businesses is adequate. In 2021, the bank outperformed aggregate data by number and dollar amount of originations, though remained well below the large percentage of AA businesses reporting annual revenues of \$1 million or less. Aggregate data serves as a better proxy for loan demand than the demographic figure.

The distribution of 2022 loan originations to businesses with revenues of \$1 million or less is below the percentage of small businesses in the AA and aggregate data by number of originations. However, the bank exceeded aggregate data by dollar amount, which is reflective of Comerica's willingness to lend larger sums to small businesses.

The bank's 2020 lending performance exceed that of 2021 and 2022. The decline in performance is primarily attributed to the cessation of the SBA's PPP and rising interests.

Community Development Lending

The bank makes a relatively high level of CD loans in the AA. Comerica originated 16 CD loans totaling \$38.6 million in the AA, making up 1.2 percent of bank-wide CD loan volume by number and 0.7 percent by dollar amount. The number volume of CD loans originated in the AA decreased by 11.1 percent since the previous evaluation, though the dollar amount increased by more than 310.4 percent. This growth occurred despite the substantial decrease in loans originated through the SBA's PPP, which represented 38.9 percent of CD loans in the AA at the previous evaluation.

The largest portion of the bank's CD lending in the AA promotes economic development through small business financing and permanent job creation, retention, or improvement impacting LMI persons or LMI geographies. Examples of the bank's CD lending activities that are considered responsive to credit needs in the AA include:

- A \$16 million line of credit to a certified home healthcare and senior care provider that provides essential medical care to Medicaid recipients in a variety of regions throughout the state of Florida, including the AA.
- A \$3.8 million line of credit for the construction of an apartment project in the AA where
 the city of Delray Beach requires 25 percent of the total units to be set aside for LMI
 residents, granting prorated CD qualification in the amount of \$952,000.

INVESTMENT TEST

Original market value of investment

The bank's performance under the Investment Test in the AA is good. Comerica is occasionally in a leadership position, as its level of qualified CD investments and grants is significant, particularly those not routinely provided by private investors. The bank's overall level of CD qualified investments and donations decreased since the previous evaluation. While the bank makes rare use of innovative and/or complex investments to support CD initiatives, the bank's activity exhibits good responsiveness to identified needs in the AA. Comerica's qualified CD investments in the AA focus on the need for affordable housing and consist entirely of LIHTC investments; however, the donations were made for a variety of purposes. Examples of the bank's CD donations that were responsive to the AA needs include:

- A recurring donation totaling \$65,000 to an organization that facilitates financial education programs as well as business, entrepreneurship, and career workshops to students in more than 400 local schools where 85 percent of students qualify for free or reduced-price lunches.
- Donations totaling \$20,000 to an organization that responds to the current food crisis among LMI individuals, especially seniors and disabled individuals.
- Donations totaling \$20,000 to a CD corporation that serves the AA in a variety of ways, including providing financial education to LMI youth as well as organizing a small business program for businesses operating in and employing LMI residents.

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

Comerica's delivery systems are accessible to the AA geographies and individuals of different income levels. The distribution of the bank's six branch offices and five ATMs as of April 1, 2023, was compared to the distribution of the households and businesses among the tract categories within the AA. Table 125 below summarizes the bank's retail locations in the AA.

Table 125

	Branch and Full-Service ATM Locations Assessment Area: Fort Lauderdale-West Palm Beach Metropolitan

Total	100.0	100.0	100.0	6	100.0	5	100.0					

The bank did not open or close any branches in the AA during the review period. Banking services and hours of operations do not vary in a way that inconveniences the AA, as the level of services and hours offered are materially the same throughout the AA.

Community Development Services

The bank provides a relatively high level of CD services in the AA. Comerica's employees served in various capacities for 40 community organizations that offer CD services targeted to LMI individuals. During the review period, bank employees provided 228 CD services totaling 613 hours. Examples of services performed include:

- Several bank employees served as subject matter experts for an organization that provides financial education and professional counseling to LMI families in financial crisis.
- Bank employees provided technical assistance on behalf of Habitat for Humanity by underwriting loan applications submitted for affordable housing in the AA.
- A bank employee served on the board of directors of an nonprofit organization with a mission of providing essential products to underprivileged youth and LMI veterans

METROPOLITAN ASSESSMENT AREA (LIMITED-SCOPE REVIEW)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN LIMITED-SCOPE FLORIDA METROPOLITAN ASSESSMENT AREA

Naples MSA AA

- The Naples MSA AA is comprised of the entirety of Collier County, which is coterminous with the Naples-Marco Island, FL MSA.
- The AA is comprised of 109 census tracts, including eight low-, 21 moderate-, 44 middle-, 33 upper-, and three unknown-income tracts.
- Based upon 2020 ACS data, the AA population was 375,752, which reflects a 10.2 percent increase from the 2015 ACS data.
- The AA includes 98,121 families, 21.9 percent are low-, 18.0 percent moderate-, 19.6 percent middle-, and 40.5 percent are upper-income.
- As of April 1, 2023, the bank operated two branches, representing 0.5 percent of its total branches.
- As of June 30, 2022, the bank held \$39.8 million in deposits, representing a market share of 0.2 percent and approximately 0.1 percent of Comerica's total deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Appendix D contains detailed performance and demographic information reviewed for the AA. Table 126 discusses conclusions regarding the bank's performance.

Table 126

Assessment Area	Lending Test	Investment Test	Service Test
Naples MSA AA	Below	Below	Consistent

The institution's lending and investment performance in the AA is below Comerica's performance in the state; however, it does not impact the assessed rating.

STATE OF ARIZONA

CRA RATING FOR ARIZONA: Satisfactory

The Lending Test is Rated: High Satisfactory
The Investment Test is Rated: High Satisfactory
The Service Test is Rated: High Satisfactory

Major factors supporting the institution's rating include:

- Lending activity reflects good responsiveness and record of serving the credit needs of its AA, including low-income individuals, low-income areas, and very small businesses.
- The geographic distribution of loans reflects good penetration throughout the sole AA in the state of Arizona.
- The bank's distribution of loans among individuals of different income levels and businesses of different revenue sizes is good.
- The bank is a leader in making CD loans.
- Comerica makes use of innovative and/or flexible lending practices in serving the AA's needs.
- The bank is occassionally in a leadership position given its significant level of qualified CD investments and donations, particularly those not routinely provided by private investors.
- Comerica makes occasional use of innovative and/or complex investments to support CD initiatives.
- The bank exhibits good responsiveness to credit and CD needs.
- Delivery systems are accessible to individuals of different income levels throughout the bank's AA.
- Comerica provides an adequate level of CD services that do not vary in a way that inconveniences the bank's AA, particularly LMI geographies and/or LMI individuals.

SCOPE OF THE EVALUATION

The scope of the review for the state of Arizona is consistent with the overall scope for the institution, including evaluations under the lending, investment, and service tests. The review period and products evaluated for this state are also unchanged from the scope discussed in the Institution section of this report.

The bank designates the Phoenix Metropolitan AA, as its single AA in the state of Arizona. As such, the Phoenix Metropolitan AA was reviewed using full-scope examination procedures. Accordingly, the statewide rating is based on the CRA performance within this AA and any other investment or services that are provided on a broader, statewide basis.

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN ARIZONA

Comerica delineates one of its 27 AAs and operates 17 of its 409 total branches in the state of Arizona. As of June 30, 2022, the bank held \$734.7 million in deposits in the state, representing approximately one percent of its total deposits. According to the June 30, 2022, Federal Deposit Insurance Corporation (FDIC) Summary of Deposits, the bank had a deposit market share of 0.3 percent and ranked 24th out of 67 FDIC-insured financial institutions across the state.

Of the 20,205 HMDA-reportable loans and 35,231 small business loans originated and purchased by Comerica during the review period, 1,050 HMDA-reportable loans (5.2 percent) and 703 small business loans (2.0 percent) were extended in the state of Arizona.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Conclusions with respect to Comerica's performance in the state of Arizona are based upon the bank's performance in the only delineated AA within the state. See the Phoenix Metropolitan AA section below for information on the bank's CRA performance in the state of Arizona.

PHOENIX METROPOLITAN ASSESSMENT AREA

(Full-Scope Review)

DESCRIPTION OF THE INSTITUTION'S OPERATIONS IN THE PHOENIX METROPOLITAN ASSESSMENT AREA

- The bank's Phoenix Metropolitan AA is comprised of Maricopa County in its entirety, which
 represents a portion of the Phoenix-Mesa-Chandler, AZ MSA. Refer to Appendix A for an
 AA map.
- The AA is made up of 1,009 census tracts, of which 6.3 percent are designated as low-income, 25.7 percent are moderate-income, 31.1 percent are middle-income, 34.5 percent are upper-income, and 2.4 percent are designated as unknown-income.
- Since the previous evaluation and the issuance of the 2020 U.S. Census data, 93 new geographies were drawn within Maricopa County and the income level designations of many existing census tracts changed. The number of low-income census tracts in the AA decreased by 39.0 percent but LMI geographies increased by 3.7 percent. Refer to Appendix B for additional demographic data.
- The bank operates 17 full-service branches in the AA, including four branches in moderate-income, five in middle-income, and eight in upper-income census tracts.
- According to the June 30, 2022, FDIC Market Share Report, the bank had a 0.4 percent market share, ranking 20th out of 61 FDIC-insured depository institutions operating in the AA.
- In 2022, the bank ranked 88th out of 978 HMDA reporters in the AA with 417 HMDA originations and purchases, and 51st out of 239 CRA reporters with 110 CRA small business and small farm loans.
- A community contact shared that the AA has experienced significant population growth due to the influx of people from areas where the cost of living and housing are much higher. The community contact noted that housing availability for LMI individuals and families is limited, resulting in the rise of homelessness throughout the AA.

Table 127

	Table 121											
Population Change												
Assessment Area: Phoenix Metropolitan												
2015 2020 Percentage												
Area	Population	Population	Change									
Phoenix Metropolitan AA	4,018,143	4,420,568	10.0									
Phoenix-Mesa-Chandler, AZ MSA	4,407,915	4,845,832	9.9									
Arizona 6,641,928 7,151,502 7.												
Source: 2020 U.S. Census Bureau Decennial Census												
2011 - 2015 U.S. Census Bureau:	American Communit	ty Survey										

- The AA's population has grown substantially since 2015, exceeding the growth rate of the Phoenix-Mesa-Chandler, AZ MSA and the state of Arizona as a whole. The AA's suburban population has doubled in size in some areas.
- Phoenix, AZ is one of the fastest growing cities in the United States over the most recent decade, surpassing Philadelphia to be the fifth largest city by population in the country. This increase has been fueled by the migration of families, as a result of job opportunities related to the arrival of technology companies and lower cost of living than in other areas of the nation. A community contact shared that the population growth in the AA is primarily driven by AA's lower cost of living and housing in comparison to other metropolitan areas.

Note:

• Several colleges and universities are located in the AA, including Grand Canyon University and Phoenix College, with approximate enrollments of 64,000 and 17,000, respectively.

Table 128

Median Family Income Change Assessment Area: Phoenix Metropolitan											
Area 2015 Median 2020 Median Percentage Family Income Family Income Change											
Phoenix Metropolitan AA	70,745	80,161	13.3								
Phoenix-Mesa-Chandler, AZ MSA	69,582	78,930	13.4								
Arizona 64,986 73,456 13.											
Source: 2011 - 2015 U.S. Census Bureau: American Community Survey 2016 - 2020 U.S. Census Bureau: American Community Survey											

Median family incomes have been adjusted for inflation and expressed in 2020 dollars.

- The AA's median family income (MFI) has increased proportionally to the MFIs for the Phoenix-Mesa-Chandler, AZ MSA and the state of Arizona, at approximately 13 percent. The FFIEC estimates the MSA MFI to grow another 12.5 percent between 2020 and 2022.
- According to 2020 FFIEC data, approximately 9.1 percent of AA families live below the poverty level, which is similar to the 10.1 percent statewide figure.

Table 129

Housing Cost Burden Assessment Area: Phoenix Metropolitan											
Cost Burden - Renters Cost Burden - Owners											
Area	Low	Moderate	All	Low	Moderate All						
	Income	Income	Renters	Income	Income	Owners					
Phoenix Metropolitan AA	79.9	48.3	43.2	61.2	36.7	20.4					
Phoenix-Mesa-Chandler, AZ MSA	79.0	47.6	43.0	60.2	35.6	20.4					
Arizona 78.6 46.9 42.8 57.9 34.5 20.3											
Cost burden is housing cost that equals 30 percent or more of household income. Source: U.S. Department of Housing and Urban Development (HUD), 2015-2019 Comprehensive Housing Affordability Strategy											

- Housing affordability within the AA varies among the income levels, with the burden on low-income renters and owners being substantially greater than the burden on renters and owners at any other income level.
- Overall, the cost burden for homeowners and renters in the AA is comparable to the housing cost burden for homeowners and renters statewide in Arizona.
- The median age of housing stock in the AA is 37 years, and the median housing value is \$278,687. Additionally, the average median gross rent in the AA is \$1,182.
- A community contact noted that affordable housing throughout the AA for LMI individuals and families is limited, resulting in the rise of homelessness.

Table 130

Unemployment Rates Assessment Area: Phoenix Metropolitan												
Region 2018 2019 2020 2021 2022												
Phoenix Metropolitan AA	4.1	4.2	7.2	4.5	3.3							
Phoenix-Mesa-Chandler, AZ MSA												
Arizona 4.8 4.9 7.7 4.9 3.8												
Source: Bureau of Labor Statistics: Local Are	ea Unemployme	ent Statistics	•	•								

- Unemployment rates in the AA remained below the overall statewide figure from 2018 to 2022.
- Unemployment rates significantly increased in 2020 due to the COVID-19 pandemic, as many businesses laid off their employees given the statewide stay at home and social distancing mandates. In 2021, the AA unemployment rate stabilized and returned to prepandemic levels. In 2022, the AA unemployment rate continued to improve, by 1.2 percent.
- Major employment industries in the AA include health care and social assistance, retail trade, and government. The top employers in the AA include the State of Arizona, City of Phoenix, Wal-Mart Stores, and the Banner Health system.

Table 131 details selected characteristics of the AA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

LENDING TEST

The bank's lending test performance in the Phoenix Metropolitan AA is good. For this evaluation, the bank's home mortgage lending was generally given greater weight as these products represent the largest volume of lending in the AA during the review period. Additionally, multifamily, other purpose closed/exempt, and loan purpose not applicable lending products were not evaluated separately from the evaluation of the bank's home mortgage lending.

Details of the bank's 2020 mortgage and small business lending and information regarding lending by aggregate lenders can be found in Appendix C.

Lending Activity

The bank's lending activity in the Phoenix Metropolitan AA reflects good responsiveness and use of innovative and/or flexible lending practices through its participation in numerous industry-recognized, government-guaranteed programs, including the origination of 535 SBA loans and 160 small business micro loans within the AA.

Comerica originated 1,050 home mortgage and 703 small business loans between January 1, 2020, and December 31, 2022. The volume of small business and home mortgage lending decreased primarily due to the increase in interest rates and the cessation of the SBA's PPP in May 2021. However, loan products and origination volumes are consistent with the general credit needs of the AA and align with the bank's strategic focus on commercial and residential real estate lending.

Geographic Distribution of Loans

The geographic distribution of lending reflects excellent penetration throughout the AA. The bank's small business and home mortgage lending reflects excellent and good penetration among geographies of different income levels, respectively. The distribution of the bank's lending in middle- and upper-income geographies did not affect conclusions about Comerica's performance

in LMI census tracts. Furthermore, the bank's loan dispersion among geographies of different income levels did not reveal any notable gaps or lapses.

Residential Real Estate (HMDA) Lending

The geographic distribution of home mortgage loans is good. The distribution of 2021 and 2022 home mortgage loans among low-income census tracts is comparable to aggregate data, though below the percentage of owner-occupied units in these tracts (the demographic figure). The penetration of the bank's HMDA lending in moderate-income census tracts is below aggregate data in 2022, though above aggregate data in 2021 by a similar margin. In both years, the bank's lending in moderate-income census tracts was below the demographic figure.

The bank's lending performance for 2020 reflected penetration levels similar than those of 2021 and 2022, with a distribution of loans to LMI tracts that was comparable to aggregate data but below the demographic figure.

Home Purchase Lending

The geographic distribution of home purchase lending is excellent. The distribution of 2021 and 2022 home purchase loans among low-income census tracts is significantly above the aggregate data. During both years, the bank's level of lending in low-income census tracts was more than twice that of aggregate lenders and the percentage of owner-occupied units in these tracts.

The distribution of the bank's home purchase loans among moderate-income census tracts is also substantially above both aggregate lending performance and the demographic figure. During the review period, almost half of home purchase loans originated by the bank in the Phoenix Metropolitan AA were in moderate-income census tracts, which contain less than 21 percent of owner-occupied units.

Home Refinance Lending

The geographic distribution of home refinance lending is excellent. The distribution of 2022 home refinance loans among low-income census tracts are comparable to aggregate data and the demographic figure. The bank's lending in moderate-income census tracts is above that of aggregate lenders and comparable to the demographic figure.

The bank's lending performance for 2021 reflected penetration levels that were above that of 2022. Distribution of 2021 home refinance loans among LMI census tracts in the Phoenix Metropolitan AA was significantly above aggregate lending performance and the demographic figure.

Home Improvement Lending

The geographic distribution of home improvement lending is adequate. The distribution of 2021 and 2022 home improvement loans among low-income census tracts is comparable to aggregate data and the demographic figure. Conversely, the bank's home improvement lending in moderate-income census tracts is below aggregate data and the demographic figure.

Other Purpose Lines of Credit Lending

The geographic distribution of other purpose lines of credit is adequate. The bank did not originate any other purpose lines of credit among low-income census tracts in 2021 or 2022, though this represents a level of performance that is comparable to aggregate data in each year. Among moderate-income census tracts, the bank's performance is comparable to aggregate data and below the percentage of owner-occupied units in these tracts, which could point to lack of loan demand.

Small Business Lending

The geographic distribution of small business loans reflects excellent penetration throughout the AA when compared to demographics and the performance of the aggregate lenders. The distribution of 2021 and 2022 small business loans among low-income census tracts is greater than aggregate data as well as the percentage of businesses in these tracts (the demographic figure). The bank's small business lending in moderate-income census tracts is also above aggregate lending, outpacing aggregate data by almost 10 percent in 2022. This performance reflects favorably on the bank's responsiveness to the credit needs of small businesses in the Phoenix Metropolitan AA.

Although the volume of small business lending has decreased, Comerica's performance in 2020 is consistent with the bank's performance in 2021 and 2022. The decrease is attributed to the conclusion of the SBA's PPP lending and the increase in interest rates.

Lending to Borrowers of Different Income Levels and Businesses of Different Sizes

The bank's borrower distribution of lending reflects a good penetration among individuals of different income levels (including LMI) and businesses of revenue different sizes. Comerica's lending distribution to middle- and upper-income borrowers did not affect conclusions about its performance to LMI borrowers.

Residential Real Estate (HMDA) Lending

Home mortgage lending by borrower income in the Phoenix Metropolitan AA is good when compared to demographic characteristics of the community, as well as the performance of aggregate HMDA lenders. In 2021, the bank's lending to LMI borrowers was comparable to the performance of aggregate HMDA lenders. Lending to low-income borrowers was also comparable to aggregate performance in 2022, though the bank's performance to moderate-income borrowers decreased.

The shift in performance toward higher income borrowers occurred as interest rates began to rise from historic lows in early 2022, making mortgage loans more expensive and pricing some lower-income borrowers out of the market. However, the bank's lending to low-income borrowers for home refinance loans and other purpose lines of credit was noteworthy as Comerica lent these products at levels well above aggregate HMDA lenders.

The bank's lending performance in 2020 is consistent with that of 2021 and 2022, with a distribution of loans to LMI borrowers that is comparable to aggregate data but below the demographic figure.

Small Business Lending

Comerica's lending distribution to businesses of different revenue size is adequate. The distribution of 2022 loan originations to businesses with revenues of \$1 million or less is below the percentage of small businesses in the AA and aggregate data by number of originations. Though the bank made a smaller percentage of loans to businesses with revenues of \$1 million or less than aggregate lenders by number volume, these loans represented a larger portion of the total dollar amount of the bank's total loans to small businesses than the comparable aggregate total loans, which reflects favorably on Comerica's willingness to lend larger sums to small businesses. In addition, Comerica's performance in comparison to aggregate lenders carried more weight as aggregate lending is a better indicator of loan demand than the percentage of small businesses in the AA.

In 2021, the bank's performance remained well below the large percentage of AA business reporting annual revenues of \$1 million or less, though the bank originated a larger percentage of small business loans to businesses with annual revenues of \$1 million or less than reflected by aggregate lending data. Conversely, Comerica's 2020 lending performance to businesses with

annual revenues of \$1 million or less significantly exceeded the volume of lending in 2021 and 2022 and outperformed aggregate lenders' performance.

Community Development Lending

The bank is a leader in making CD loans in the Phoenix Metropolitan AA. Comerica originated 33 CD loans totaling \$171.9 million in the AA, which comprised 2.4 percent of bank-wide CD loans volume by number and 3.2 percent by dollar amount. Despite the substantial decrease in loans originated through the SBA's PPP, the number of CD loan originations in the AA increased by 83.3 percent since the previous evaluation, representing a substantial increase in the dollar amount of CD loans in the AA (697.4 percent). This is reflective of the bank's focus on identifying CD opportunities and responding through qualified activities.

The largest portion of the bank's CD lending in the AA was comprised of loans that promote economic development by financing small businesses and supporting permanent job creation, retention, or improvement for LMI persons or in LMI geographies. Examples of the bank's CD lending activities that were considered responsive to AA credit needs include:

 A \$7 million loan to a mid-sized bakery and an \$8.5 million loan to a local lighting manufacturer. Combined these loans provided for the retention and improvement of more than 350 LMI jobs.

- Four loans totaling \$15 million to a 24-hour urgent care center that provides behavioral health services to patients experiencing mental health crises and primarily serves local residents receiving Medicaid, which serves as a proxy for determining LMI status.
- A \$100,000 line of credit to a non-profit that provides food, shelter, basic education, and counseling needs to LMI residents of the AA.
- Four SBA PPP loans totaling \$786,000 in response to the ongoing effects of the COVID-19 pandemic, which impacted the nation during the early portion of the review period for this evaluation.

Table 137 details Comerica's CD lending activity during the review period.

INVESTMENT TEST

The bank's performance under the Investment Test in the Phoenix Metropolitan AA is good. Although Comerica's overall dollar amount of CD investments and donations decreased since the previous evaluation, its volume is significant and occasionally positions the bank as a leader. The slight decrease in dollar amount of CD investments in the AA is attributed to the bank focusing on investments in the states in which the bank has majority of its branches, receives deposits, and originates loans. Comerica makes occasional use of innovative and/or complex investments, particularly those not routinely provided by private investors, and exhibits good responsiveness to credit and CD needs of the AA.

Table 138 illustrates the breakdown of Comerica's CD investments and donations within the AA, including prior period investments that remain on the bank's ledger, current period investments purchased during the current evaluation period, and CD donations made since the previous evaluation. Examples of CD investment and donation activities include:

- A \$500,000 equity investment in a minority-led community development financial institution (CDFI), providing financing to small business owners and their underserved communities.
- A \$2.3 million LIHTC investment in a new construction project that consists of 43 townhomes reserved for households with incomes below 60 percent of area median income. This project will include a rent-to-own component allowing tenants to accumulate value over time toward the purchase of their unit, catalyzing wealth creation through homeownership.
- An annual donation, totaling \$73,000 over the review period, to support a CDFI serving LMI minority communities in the Southwest United States, including the bank's AA.

SERVICE TEST

The bank's Service Test performance is good.

Retail Services

Comerica's delivery systems are accessible to the geographies and individuals of different income levels in the AA. The distribution of the bank's 17 branch offices and 21 ATMs as of April 1, 2023, was compared to the distribution of the population and businesses among the tract categories within the AA. Table 139 summarizes the bank's retail locations in the Phoenix Metropolitan AA.

Table 139

	Branch and Full-Service ATM Locations Assessment Area: Phoenix Metropolitan											
Tract	% of % of Branches Full-Service A											
Income	Geographies	Households	Businesses	#	%	#	%					
Low	6.3	5.3	3.7	0	0.0	0	0.0

Total	100.0	100.0	100.0	17	100.0	21	100.0					

The bank's branch offices in the AA are generally well distributed, with the exception of the city of Glendale, AZ, which contains no Comerica branches. Glendale contains approximately 8 percent of the total LMI census tracts in the AA and stands out as a corridor for which Comerica branches are not readily available. However, the 65 square miles that make up the city are well saturated with 47 branches from other financial institutions. Additionally, Comerica's branch locations are within five miles of Glendale's LMI census tracts and more than 90 percent of the 323 LMI geographies within the entire AA.

The bank did not open or close any branches in the AA during the review period. Banking services and hours of operations are materially the same and do not vary in a way that inconveniences the AA, particularly in LMI geographies or to LMI individuals.

² Original market value of investment

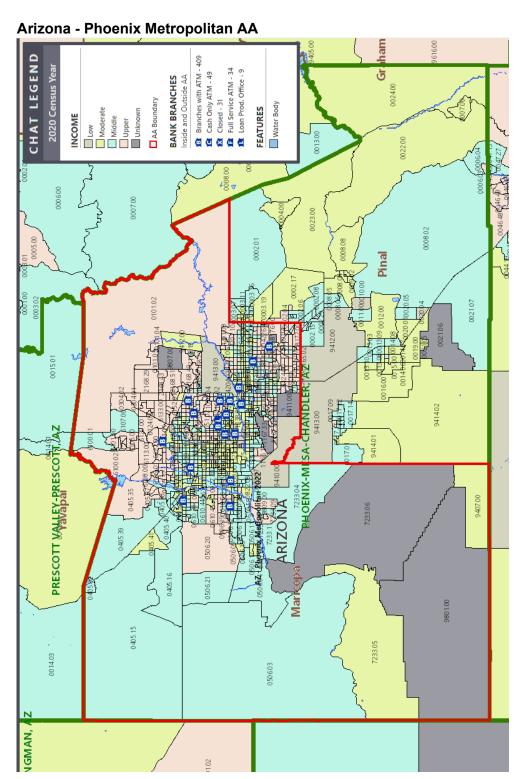

Community Development Services

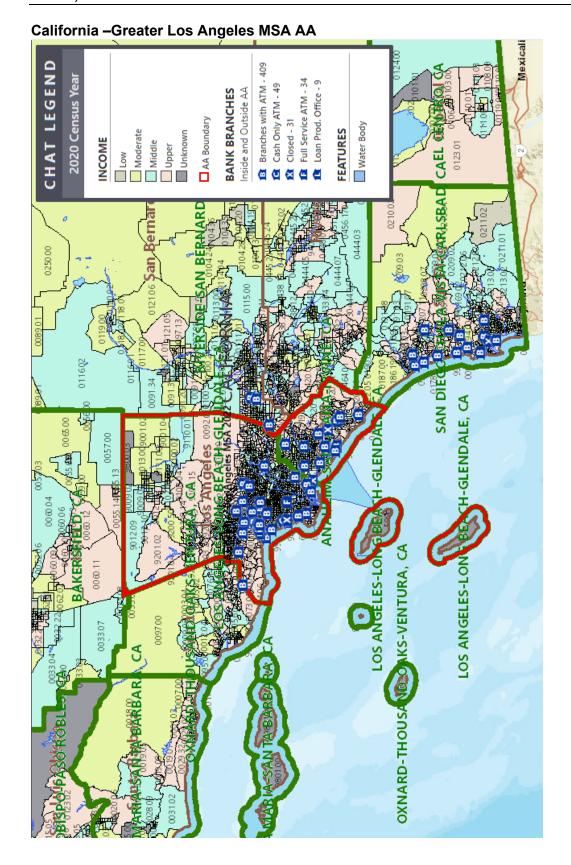

The bank provides an adequate level of CD services in the Phoenix Metropolitan AA. Comerica's employees served in various capacities, including boards of directors and as trustees, for 14 organizations offering CD services targeted toward LMI individuals. The 72 CD services provided by bank representatives during the review period total approximately 414 hours. Examples of services performed by bank employees include:

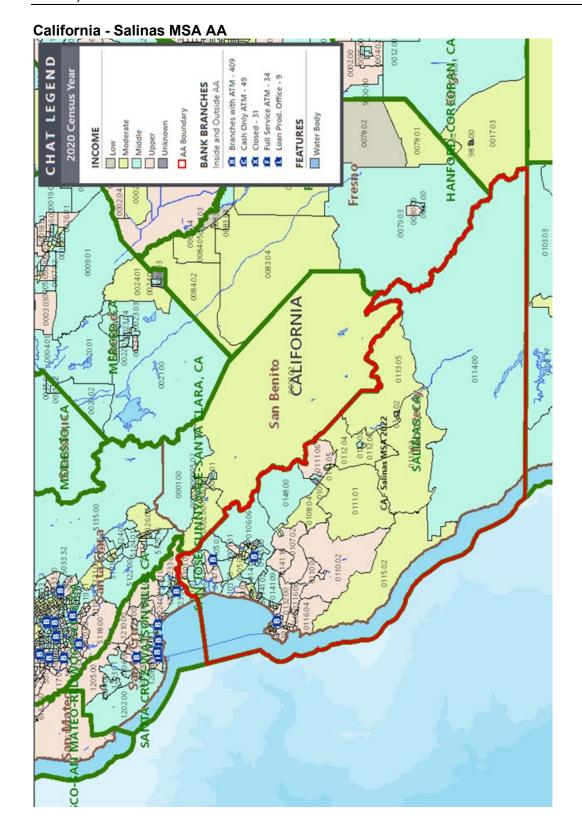

- Twenty-three bank representatives volunteer with a local organization to teach financial education at local schools where the majority of students qualify for free or reduced-price lunch. One bank employee also sits on the organization's board of directors.
- One bank representative serves as a director of a local organization that offers legal and financial services to minority-owned businesses, of which the substantial majority of owners are LMI individuals.

GLOSSARY

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small, relatively permanent statistical subdivision of a county. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. Census tracts average about 4,000 inhabitants, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to the population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language:

- 1. Affordable housing (including multi-family rental housing) for low- or moderate-income individuals.
- 2. Community services targeted to low- or moderate-income individuals.
- Activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less.
- 4. Activities that revitalize or stabilize
 - a. Low- or moderate-income geographies.
 - b. Designated disaster areas.
 - c. Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, Federal Deposit Insurance Corporation, and Office of the Comptroller of the Currency, based on
 - i. Rates of poverty, unemployment, and population loss.
 - ii. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and income of the applicants; the amount of loan requested; and the disposition of the application (for example, approved, denied, or withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multifamily (five or more families) dwelling loans, loans for the purchase of manufactured homes, and refinancing of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A metropolitan statistical area (MSA) or a metropolitan division (MD) as defined by the Office of Management and Budget. A MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. A MD is a division of a MSA based on specific criteria including commuting patterns. Only a MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA evaluation. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Call Report. These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is 120 percent or more of the area median income, or a median family income that is 120 percent or more, in the case of a geography.
